SESSION, 1920.

**THE GOVERNMENT OF IRELAND.**—After the defeat on Oct. 20, by 246 to 79, of a motion raising the question of reprisals, the House of Commons resumed the main task of the Session—the Government of Ireland Bill, the Committee stage of which had been interrupted by the adjournment. (*For provisions see pp. 553, 554.*) The third reading was carried by 183 to 52 on Armistice Day, when the spirit of the anniversary produced eloquent appeals for unity. The Lord Chancellor moved the second reading in the Upper Chamber on Nov. 23, and after three days' debate Lord Dunsraven's rejection motion was defeated by 164 to 75 and the Bill was read a second time. Three days were given to the Committee stage and several important amendments were carried against the Government. The first, debated on Dec. 1, instituted a Senate in both Northern and Southern Parliaments, and was adopted by 120 to 36. A sequel was the insertion of a provision that the two Senates sitting together should constitute the Council of Ireland. On Dec. 6, the Peers omitted the clause giving the Lord Lieutenant under certain circumstances power to set up a system of Crown Colony Government; and added clauses providing for the composition of the two Senates. The report stage was taken on Dec. 13, and on the following day the third reading was agreed to without a division. The Commons accepted the amendment setting up the two Senates, but disagreed with that altering the constitution of the Council, and with a new clause empowering the setting up of a Legislative Assembly by Order in Council in the event of a Parliament not being duly constituted through a majority of its members failing to accept the constitution. The Lords acquiesced in most of these alterations, but insisted that the Senates should have a hand in the appointment of the Council, while in regard to the question of a legislative assembly a compromise was reached, limiting the right to set up such a form of government to the period of three years from June 1, 1922. The Royal Assent was accorded on Dec. 23, when Parliament was prorogued, and when a hope was expressed in the King's speech that the measure would finally bring unity and friendship.

**TO RELIEVE UNEMPLOYMENT.**—On the day the sitting was resumed, Oct. 19, the Prime Minister outlined the Government's measures for the relief of unemployment, which included the employment of ex-service men on housing, a large scheme of new arterial roads for London, and similar schemes in the country, and the admission of additional men in trades in which there had been a serious shortage of skilled labour. The Unemployment (Relief Works) Bill, given a second reading in the Commons on Nov. 18, and the Royal Assent on Dec. 3, enabled local authorities, and any appropriate Government department, to acquire and enter upon land compulsorily for the purpose of executing works of public utility with a view to finding immediate employment for the unemployed, its operation being limited to a year. On Dec. 21, a Bill was passed through all its stages in the Commons to waive the four weeks' contribution which was a precondition to the receipt of unemployment benefit under the new Unemployment Insurance Act, and the Royal Assent was given two days later.

**COMBATING STRIKES.**—While the miners' strike was in progress, the Government passed a

Bill to deal with the situation that might arise then, and in subsequent emergencies of a similar nature, Mr. Bonar Law stating that the measure had been drafted for some time. Under this the Government were given power to declare that "a state of emergency" existed if action had been taken, or was threatened, of such a nature as to be calculated, by interfering with the supply and distribution of food, water, fuel, light or with the means of locomotion, to deprive the community of the essentials of life. No proclamation of this kind might be enforced for more than a month, and it must be immediately placed before Parliament, which must reassemble within five days, if not sitting. Regulations for securing the essentials of life to the community, and giving powers for the preservation of the peace, might be made by Order in Council while a proclamation of emergency remained in force, but no form of compulsory military service or industrial conscription might be imposed, and no regulations made to make it an offence to take part in a strike or peacefully to persuade others to do so.

**THE AGRICULTURE BILL.**—Some controversy occurred between the two Chambers over the Agriculture Bill, the keynote of which, in the words of Sir Arthur Boscawen, was security all round—for the farmers by guaranteed prices, for the labourer by ensuring him a minimum living wage, and for the State by providing that land should be so cultivated as to produce a maximum amount of food. The Bill made the Corn Production Act permanent legislation, and established guaranteed prices for wheat and oats by a new plan, under which prices were ruled by the cost of production ascertained each year by Commissioners. The Agricultural Holdings Acts were also amended by providing compensation for disturbance. After being altered in Standing Committee, against the wishes of the Government, the third reading was secured in the Commons by 161 to 22 on Nov. 25, and the Upper Chamber gave a second reading on Dec. 8, by 123 to 85, deleted certain Government clauses in Committee, and agreed to the third reading on Dec. 20, a motion for rejection being defeated by 64 to 25. The Commons devoted an all-night sitting to the consideration of the Lords' amendments, and after vigorous opposition agreed, at the Government's request, to most of the changes made, the Royal Assent being obtained on Dec. 23.

**THE DYESTUFFS INDUSTRY.**—In the closing days of the Session, a Bill was passed to regulate the importation of dyestuffs in order to establish the industry in this country securely. Sir Robert Horne explained that certain classes of dyestuffs would only be admitted to this country under licences, no licence duty being charged but merely fees to pay administrative expenses. The textile industry, he said, had been threatened with disaster at the outbreak of war because it was cut off from practically its only supply of dyes. Under this pressure the Government first lent money and afterwards established companies, in which it took shares, and later gave pledges to the industry.

SESSION, 1921.

**THE KING'S SPEECH.**—With old-time pageantry the King opened the new Session on Feb. 15, the Queen and the Prince of Wales accompanying His Majesty in the House of Lords. In his Speech from the Throne, the King referred to the

coming visit of the Overseas Premiers and the inauguration of the new Councils in India. "The determination of the Government to reduce expenditure to the lowest level consistent with the well-being of the Empire" was intimated, and, referring to the situation in Ireland, the hope was expressed that in the near future the majority of the people there would repudiate violence and work the new Act, which conferred upon them the responsibilities of self-government, and provided the machinery whereby they could attain to Irish unity by constitutional means. The legislation promised included Bills extending the provision made under the Unemployment Insurance Act, dealing with the safeguarding of essential key industries, and unfair and abnormal industrial competition, re-organising the railways, and dealing with the sale of alcoholic liquor. In the Lords the Address in reply was moved by the Duke of Abercorn and seconded by Lord Gorell, and agreed to after a brief debate. Mr. J. C. C. Davidson moved and Mr. Fildes seconded the Address in the Commons, and the Prime Minister dealt with Mr. Asquith's enquiries regarding the Paris decisions, the coming London Conference, and the new Middle Eastern Department of the Colonial Office. Replying to Mr. Thomas, Mr. Lloyd George said the Government were not going to submit to threats of strikes in Ireland. On the following day an amendment on the subject of unemployment, moved by Mr. Clynes, was discussed, and after Dr. Macnamara had outlined the Government's proposals this was defeated on Feb. 17, by 262 to 84. An amendment introduced by Mr. Bottomley, regarding the policy of securing indemnities and reparation from the Germans, was rejected by 181 to 40 on the following day, and a third, suggesting that the telephone service should be placed under private enterprise, was withdrawn. The Address was agreed to on Feb. 21, after the rejection, by 257 to 88, of an amendment condemning reprisals in Ireland.

**A NEW SPEAKER.**—In accordance with his intimation upon his re-election at the commencement of the present Parliament, Mr. Lowther announced his resignation of the Speakership on April 25, after 38 years in the House and 26 in the Chair. On the following day the Prime Minister moved a vote of thanks to Mr. Lowther in a speech that admirably voiced the high regard in which the retiring Speaker was held by the whole Chamber. Mr. Stephen Walsh and Mr. Asquith added their tributes, and this resolution and a second, praying the King to confer upon Mr. Lowther "some signal mark of his royal favour"—both put to the House by the man to whom they referred—were carried unanimously and with loud acclaim. In his reply, the Speaker declared his belief that the House had increased in usefulness and authority since he entered it. Mr. Lowther quitted the chair and walked out of the Chamber amid continuous cheers, and later shook hands with every member present. On April 27, Lieut.-Col. F. B. Mildmay proposed, and Mr. Arthur Henderson seconded, the election of Mr. J. H. Whitley as Speaker, and he was unanimously elected after some protests against the manner in which the Government had appeared to abrogate the privilege of the Chamber to choose the occupant of the distinguished office. The King's formal assent to the appointment was signified on April 28,

following which Mr. Whitley took his seat for the first time. Subsequently a Bill was passed settling an annuity upon Mr. Lowther, to whom the King granted a Viscounty.

**DECONTROLLING THE RAILWAYS.**—One of the most important measures of the Session was the Railways Bill, intended to place the railways in a new position after the period of control. In moving the second reading in the Commons on May 26, Sir Eric Geddes said the Government had come to a settlement with the majority of the railway companies by which the Government would pay £60,000,000 to the companies on handing the lines back in August after the period of control, £9,000,000 of that sum being returned in the form of income-tax. That settlement had been approved by over 75 per cent. of the capital invested the railways. Explaining the Bill, the Minister of Transport said instead of putting the railways of the country into one great system, it was proposed that they should be formed into groups, by means of which, it was believed, far-reaching economies could be made. He thought that £25,000,000 would be the value of the economies possible in six or seven years. The Bill provided a safeguard against the oppression of a monopoly, and would give a real incentive for economy, both on the part of the trader and the railway management. The rejection was moved by Mr. J. R. Clynes on the ground that it failed to provide for the public ownership and control of the railways, and would prejudice their future acquisition by the State on a fair economic basis. On May 30, Sir Eric Geddes said the Bill was the only alternative to nationalisation which the Government had been able to find. The motion for rejection was defeated by 259 to 65, and the Bill was read a second time and referred to a Standing Committee. During a debate on an amendment to exclude Scotland from the operation of the Bill, Sir Eric, on June 14, said an understanding had been arrived at with the majority of the Scottish railways that in existing circumstances fusion should be on the basis of their intrinsic value as partners in a new alliance and combination. Progress was slow, only 11 clauses having been disposed of in as many days, and the amendments on the paper ran into hundreds. On July 4, Sir Eric Geddes said it was essential that the Bill should become law before the House rose, and as a consequence the Commons two days later passed a resolution dividing the Bill into two parts, a second committee dealing with the second section, and giving five days for the report stage and third reading. The two committees had completed the consideration by July 21, and when the Bill returned to the House on July 27, the Speaker ruled that a proposed new clause, empowering the railway companies to own and run road vehicles, was outside the scope of the Bill. Various new clauses were added at the invitation of the Government, and on Aug. 9 the report stage was concluded and the third reading carried, a motion for the rejection being defeated by 237 to 62. The discussion in the Upper Chamber was limited owing to the date upon which the Bill left the Commons, and on Aug. 29, when Parliament adjourned until Oct. 28, the Royal Assent was given to the measure, and to a Bill providing for the payment of £3,000,000 in settlement of the claims arising on the de-control of the Irish railways, the money to be distributed in

accordance with an agreement arrived at between the interested parties.

**THE BUDGET.**—Owing to the industrial situation engaging the whole of Sir Robert Horne's attention, Mr. Chamberlain introduced the Budget on April 25 (see p. 501), emphasising that whatever credit attached to the proposals belonged to his successor alone. Mr. Chamberlain said the foundations had been laid for steady recovery when industrial disputes were laid to rest, and we had made it clear that the country and the city would hold the very proud position as the premier financial centre of the world. The resolutions had all been agreed to on May 2, and the Finance Bill was read a first time. The second reading was granted on May 25, after the defeat, by 213 to 46, of an amendment calling for economy. The Committee stage opened on June 16, and was completed on June 24 with but slight amendments, one of which made provision as to the determination by special commissioners of claims for relief from United Kingdom income-tax in respect of Dominion income-tax. On report on July 19, the Government opposed an amendment extending the exemption from Corporation Tax to the surplus arising out of the trading of co-operative societies with their own members, but this was carried by 137 to 135. Mr. Chamberlain announced that as the money involved was insignificant compared with the object as a whole, the Government would accept the position. The third reading was agreed to on July 29, after the defeat by 194 to 43 of an amendment declaring that in view of the serious decline in public revenue the House desired a further statement of the financial position before proceeding with the measure. The Royal Assent was accorded on Aug. 4.

**SAFEGUARDING INDUSTRY.**—The first stage in assisting British industry opened on May 9, when Mr. Baldwin moved in Committee a series of resolutions providing for the imposition for five years of a customs duty of an amount equal to 3½ per cent. of the value upon imports of various specified articles in key industries, and also upon imported articles which are being sold at prices below the cost of production in this country. He said that what was wanted was the restoration of the collapsed exchanges. The Bill which would follow the resolutions would deal with dumping by levying a special import duty whenever it was established that dumping was going on on a substantial scale. Food and drink were excluded, and it was not intended to schedule raw materials. An amendment to limit the period of the duty to one year instead of five years, moved by Sir William Barton, was on the following day defeated by 269 to 79. The resolutions were carried on May 12, after an all-night sitting, during which a number of divisions were challenged. The debate on the second reading of the Bill based upon the resolutions opened on June 6, when Sir Donald Maclean, in moving the rejection, said the only result of the Bill must be to raise prices. He declared that it intensified bureaucracy and hampered trade. Mr. Baldwin said no Government could neglect to take some steps to protect employment in this country, with a future before us so full of doubt and uncertainty. On the following day the second reading was carried by 312 to 92.

In Committee a Government amendment was agreed to providing that the Committee to be set up for the purpose of enquiring into complaints of dumping should consist of five persons instead of three. This stage was completed on July 20, and the Report stage on Aug. 11. On the following day the Speaker gave his ruling that the Bill was a Money Bill within the meaning of the Parliament Act, and therefore the Upper Chamber could not amend it, and the third reading was carried after the defeat, by 176 to 54, of a motion for rejection introduced by Mr. Asquith. The Peers gave a second reading on Aug. 16, defeating Lord Emmott's motion for rejection by 68 to 43. In Committee two important amendments were carried against the Government, despite the Speaker's certificate, but the Commons disagreed with these on the ground that they were a breach of their ancient privileges, and the Lords, after a protest, accepted this rebuff, the Royal Assent being given on Aug. 19.

**REPARATION FROM GERMANY.**—As a consequence of the refusal of the German delegates to the London Conference to accept the Allies' terms, Mr. Lloyd George, on March 11, presented a Bill, which was read a first time, to provide for the application of part of the purchase price of imported German goods towards the discharge of the obligations of Germany under the Treaty of Versailles. Under the Bill the Treasury were empowered to prescribe the payment to the Commissioners of Customs and Excise of a portion, not exceeding 50 per cent., of the value of imported German goods. Moving the second reading three days later, Mr. Chamberlain said the proposal afforded a method of collecting reparation, measured according to Germany's capacity to pay, if Germany reimbursed her exporters. He thought that more than 40 per cent. of Germany's export trade would be affected. Unless Germany co-operated in carrying out the scheme there would be an economic blockade of Germany sufficiently severe to bring her to reason. The Prime Minister appealed to the House to help them to get the measure, which he described as a substitute for the clash of arms, and the second reading was secured without a division. In Committee, amendments were agreed to fixing March 31, 1921, as the date upon which the arrangement came into operation, and excepting goods imported before April 15, 1921, in pursuance of contracts entered into before March 8, 1921. The third reading was carried on March 18, after the defeat by 132 to 15 of a motion for rejection, and the Bill, after passing through the Lords, received the Royal Assent on March 24.

**LICENSING REFORM.**—What was described by a Government spokesman as a modest and useful instalment of licensing reform was brought forward late in the Session as the result of a round-table conference. The Bill, which applied to the whole of Great Britain, limited the number of hours during which liquor might be supplied, and provided that the sale should cease for at least two hours in the afternoon. As originally introduced the maximum number of hours of sale were nine per day in London and eight elsewhere on week-days, and five on Sundays, the earliest hour on weekdays being 11 a.m., and the latest 11 p.m. in the metropolis, and so or 10.30 p.m. elsewhere. Hotels and restaurants

were permitted to remain open an hour later for the consumption of meals with or without liquor. In moving the second reading on July 22, the Attorney-General said the Central Control Board was to be abolished, and the ownership and management of the property it had acquired were to be vested in the Home Secretary and the Secretary for Scotland. He said the Bill was a sincere effort to represent what was ascertained to be the highest common measure of agreement. Mr. Bottomley moved the rejection of the measure, but this was withdrawn, and the Bill was referred to a Standing Committee. The third reading was secured on Aug. 2. After passing through the House of Lords the Royal Assent was given on Aug. 17.

**THE DECONTROL OF THE MINES.**—The measure decontrolling the mines, which led to the great strike, was introduced by Mr. Bridgeman on March 4, and read a second time four days later by 277 to 72. The Secretary of Mines said that after the cessation of hostilities the only reason for continuing control was the difference between world-prices and the cost of production at home. The moment had arisen when that reason had gone. The Bill meant that all contracts as to wages and profits ceased on March 31. After it had been considered by a Standing Committee, an unsuccessful effort was made to postpone the date of decontrol until June 30, and the Royal Assent was given on March 24. The strike commenced while Parliament had adjourned for Easter, and on the reassembling on April 4 a message from the King was read, declaring that "a state of emergency" existed under the Emergency Powers Act, a formality which was repeated at the end of each month during which the stoppage continued. The course of the negotiations was outlined from day to day, and on April 8 the Prime Minister announced that in view of the threat of the suspension of the transport services the Reserves were called up and a Defence Force established. The terms of settlement were announced on June 28 by Mr. Lloyd George, who said he believed that a new era of co-operation would be opened in the industry. The nation felt that it was an essential condition of its existence, he claimed, that there should be peace throughout the world, and above all peace in all its industries. The Commons subsequently sanctioned the subsidy of £10,000,000, upon which the settlement was conditional.

**AGRICULTURAL POLICY.**—A reversal of the Government's agricultural policy, due to the demand for economy, was effected by the introduction of the Corn Production Acts (Repeal) Bill. Moving the second reading in the Commons on July 4, Sir Arthur Griffith-Boscawen said the result would be that agriculture would be decontrolled, that the guaranteed prices would come to an end, and that the Wages Board would disappear after the year's harvest, voluntary joint councils on the lines of the Whitley Councils being established in their place. The Government, he said, had been impelled by financial reasons to take this step. The bill which would have to be presented in respect of the guarantee this year would be from 15 to 35 millions, and perhaps they would have a bigger bill year by year. A Cabinet Committee had come to the conclusion

that the only fair and just way of dealing with the question would be to get rid of the policy of the Corn Production Acts, of the subsidy, of all vestige of control and of the Wages Board at the same time. That year's crop must be paid for, and they had made a bargain with the majority of the growers that they should pay a rent of £3 an acre for wheat and £4 for oats in January, instead of waiting for the guaranteed prices. Sir Robert Horne said that without the Bill they would be committed to not less than £30,000,000 a year for the next four years. The second reading was carried by 278 to 113 on the following day, and an attempt made before the Standing Committee to retain the Wages Board and a minimum wage was rejected by 20 to 12, a similar amendment being defeated by 202 to 73 on the report stage. The third reading was granted by 193 to 66 on July 25, and various amendments made by the Lords being disagreed with by the Commons, the Royal Assent was given when Parliament adjourned.

**UNEMPLOYMENT INSURANCE.**—The House of Commons gave a first reading on Feb. 21, and a second reading on the 23rd, to a Bill to increase the rates and period of benefit under the Unemployment Insurance Act, 1920, as promised in the King's Speech. Dr. Macnamara explained that under the new measure, men and women who had been employed for 20 weeks, and ex-service men who had been employed for 10 weeks, since Dec. 31, 1919, would be eligible for 16 weeks' benefit between the passing of the measure and the end of October, and another 16 weeks between the latter date and the beginning of July, 1922, thereafter insured persons being entitled to 26 weeks' benefit in each year. The cases of disabled ex-service men would be dealt with on their merits, the 10 weeks' qualification being waived if necessary. The benefits would be 18s. for men, 15s. for women, and half these amounts for boys and girls respectively; while the contributions of employed, employer and State would be increased, the accumulated sum in the Unemployment Fund being drawn upon. The third reading was secured on the following day after the acceptance in Committee of amendments moved by Liberal members to increase the benefits to 20s. for men and 16s. for women. The Upper Chamber gave a first and second reading on March 1, on the following day the third reading was obtained, and the Royal Assent was given on March 3. As a result of the coal strike calculations were upset, and on June 8 the Commons gave a first reading to a Bill reducing the benefits from the end of the month to the rates of 1920 Act—15s. for men and 12s. for women, with proportionate reductions for boys and girls—and increasing the contributions. Dr. Macnamara said they were paying benefit at the rate of £2,000,000 a week with an income from contributions of less than £350,000, the Unemployment Insurance Fund, which stood at 22½ millions in March, having fallen to 8½ millions. In view of the position the Labour Minister asked powers to give, if necessary, an extension of six weeks' benefit to the 16 in the previous Act. The second reading was carried on June 15, and the Bill was dealt with by a Standing Committee, passed through its remaining stages, and given the Royal Assent on July 1. Further Government action in connexion with unemployment is noted on p. 513.

## THE DUCHY OF CORNWALL.

Buckingham Gate, S.W. 1.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1929, was £166,324, and was derived principally from Rents and Profits of Courts, £330,959; Annuity in lieu of Tin Coinage Duties, £21,227; and Dividends on Stock, £7,021. The Payments include £32,000 Outlay for the benefit of the Estate; £57,767 Deductions under various Acts; £28,487 Allowances,

Donations, and Charities; and £14,350 Expenses of Management. The sum of £42,000 was paid on account of His Royal Highness the Prince of Wales.

## THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of palatine privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

**FORESTRY COMMISSION, 22 Grosvenor Gardens, S.W. 1.**

The Forestry Commissioners were appointed under the Forestry Act (1909), and were created a Body Corporate in April 1920. The Commissioners are charged with the general duty of promoting the interests of forestry, the development of afforestation and the production and supply of timber in the United Kingdom. The Act transferred to the Commissioners the powers and duties of the Board of Agriculture and Fisheries, the Board of Agriculture for Scotland, and the Department of Agriculture and Technical Instruction for Ireland in relation to forestry, and also the powers of those Departments under the Destructive Insects and Fungi Acts, 1877 and 1907, so far as those powers relate to insects or pests destructive only to forest trees and timber. The net estimated expenditure on forestry operations, &c. for the year 1921-22 is £400,000.

## REGISTRAR-GENERAL'S OFFICE

(ENGLAND AND WALES),

Somerset House, W.C.2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1532, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 85. The first Registrar-General was appointed in 1836, his work being enormously increased by the Act of 1874, which made registration compulsory in England and Wales. The expenses of the Office for 1929-30 were estimated at £66,459 (Registry of Business Names, £4,628).

## HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.

#### BOARD OF INLAND REVENUE.

Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1654 and of Commissioners of Taxes from 1720. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 22 and 23 Vict. c. 3 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII. c. 35 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps, Taxes and Land Value Duties. Salaries and Expenses of the Board amounted in 1919-20 to £4,445,380.

### THE VICTORIA AND ALBERT MUSEUM, South Kensington, S.W. 7.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1852 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1857, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The older parts of the building were erected between 1860 and 1864; the new buildings were completed in 1909. The administrative expenses were estimated at £150,224 in 1912-13, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1912-13 £10,303) was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

## NATIONAL DEBT OFFICE, 29 Old Jewry, E.C. 3.

The National Debt Commissioners were appointed under 3 Geo. III. c. 32 (1788), by which a permanent Sinking Fund was to be established, and a sum of £50,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1825 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this is commonly known as the Old Sinking Fund. In 1875 The New Sinking Fund "was set up by Sir Stafford Northcote (28-29 Vic., c. 84), and this, with the Old Sinking Fund, now mainly operates in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Paymaster-General, and the Governor and Deputy-Governor of the Bank of England. The administrative expenses of the Board were estimated at £58,000 in 1924-25.

**POST OFFICE.**

**Chief Office,** St. Martin's-le-Grand, E.C. 1.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1582, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Old Age Pensions. The Penny Post was inaugurated in 1840, the Book Post in 1862, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1869, the Money Order Office in 1870, Postal Orders in 1880, the Parcel Post in 1885, and the Telephone Service in 1890. The administrative expenses of the Post Office (Salaries, Wages, etc., only) were estimated at £4,975,000 in 1911-12.

#### PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1793. At present it consists of certain eminent persons whose names are given on p. 368. Members of the Cabinet must be Privy Counsellors, and they principally form the acting Privy Council. The Council is summoned as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, e.g., the Judicial Committee, the Board of Trade, &c. The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

#### PUBLIC WORKS LOAN BOARD,

Old Jewry, E.C. 2.

The Public Works Loan Board was created in 1847 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1900-1 the Commissioners approved loans amounting to £51,642,742, viz., £55,082,428 out of the Local Loans Fund and £3,555,314 out of the Land Settlement (Public Works Loan) Account. Of the total granted out of the Local Loans Fund the sum of £33,574,430 was for purposes of the Housing Acts.

The average annual amount of loans granted by the board during the period from 1875-6 (when the Commission was constituted in its present form) to 1900-1 was £5,904,900 per annum (the lowest amounts previously granted being £499,421 in the financial year 1877-8, and the highest £10,691,774 in 1897-1900). The comparison with the total amount advanced by the board during the 25 years from its origin (in 1847) to 1900-1, is striking, for the total amount advanced during this period was only £149,434,000 as compared with £1,414,742 granted during the single financial year 1900-1; and when it is remembered that the 25 years referred to witnessed almost the entire development of local government in England, the comparison appears even more remarkable. The advances made out of the Local Loans Fund

totalled £31,87,779, compared with £1,498,320 in 1929-30. The average rate of interest was—

|          | per cent. in | 1929-30 |

Loans granted during the year to Local Authorities for the purposes of State-aided Housing Schemes amounted to £1,04,821. The sum of £29,996,954, advanced by the Commissioners under the Housing Acts, for providing dwellings for the working-classes during the year, is made up as follows:—

(A) LOANS SECURED ON LOCAL RATES.

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of the insufficiently endowed livings. These charges were originally levied on all clerical incomes and paid to the Pope, but were made part of the Crown revenue by Henry VIII. More than half of the benefices in England and Wales are free from these charges, having either been exempted from them by statute or formed since the charges were imposed. "First fruits" represent one year's income of a benefice in the time of Henry VIII.; the "tenths" an annual sum of a tenth part of that income. The income from this source amounts to about £15,000 per year, which, with the surplus income from capital held by the Governors, is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £500 in net annual value. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, in certain cases for rebuilding chancels, and for dilapidations.

Secretary & Treasurer, William R. Le Fanu.

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH.

25 & 26 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order of Council dated July 28, 1917, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organization and development of Scientific and Industrial Research. The Committee of the Privy Council is now constituted as follows:—The Lord Pres-

ident, The Secretary of State for the Colonies, The Chancellor of the Exchequer, the Secretary for Scotland, the Chief Secretary for Ireland, The President of the Board of Trade, The President of the Board of Education, The Most Hon. The Marquess of Crewe, K.S., L.L.D., The Rt. Hon. Viscount Haldane of Ocean, K.C., O.M., The Rt. Hon. Lord Gainsford of Headlam, The Rt. Hon. Sir Arthur H. D. Acland, Bart., L.L.D., The Rt. Hon. Arthur Henderson, M.P. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred. By Charter dated November 23, 1920, the official members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1926, a separate Department having its own Parliamentary Vote was created for the service of the Committee.

President of the Committee of the Privy Council, The Lord President of the Council.

Vice-Chairman of the Committee of Council, The President of the Board of Education.

Advisory Council, Sir William B. McCormick, L.L.D. (Chairman); Sir George T. Bellby, F.R.S.; Sir John Cadman, K.C.M.G., D.Sc.; Prof. J. B. Farmer, F.R.S.; Sir Maurice Fitzmaurice, K.C.M.G., F.R.S.; W. B. Hardy, Sec.R.S.; Sir Henry A. Miers, D.Sc., F.R.S.; Sir John F. C. Snell, M.Inst.C.E.; Sir J. J. Thomson, O.M., F.R.S.; Professor J. F. Thorpe, C.B.E., F.R.S.; Sir Richard Threlfall, K.B.E., F.R.S.; Professor S. Young, F.R.S.

Staff of the Department.

Secretary, Sir H. Frank Heath, K.C.B.....£2,500

Private Secretary, A. F. Barnes....."

Principal Assistant Secretary (acting), Sir Francis G. Ogilvie, C.B.....unpaid

Assistant Secs., L. S. Lloyd, C.B.; H. T. Tizard.....£1,000 to £1,500

Controller of Records, C. R. Young, O.R.E., D.Sc.

Principals, L. C. Bromley; Maj. E. O. Henrich (late R.E.); A. L. Hetherington; W. A. M. Murray; P. J. Wheelodon (Establishment Officer), and E. Barnard, D.S.O. (acting).

Assistant Principals, A. F. Barnes; I. G. Evans; J. W. Gentleman; G. R. D. Hogg; R. O. O'Flynn; A. Zalman.

Technical Officers, O. F. Brown; R. F. McKay; J. G. Mitchell; C. A. Spencer.

Co-ordinating Research Boards.

These Boards were established in 1920 (a) to provide for interchange of information between the various Government technical establishments concerning the special work which they undertake and the results achieved, so as to prevent duplication of work; though the Board should have no executive function as regards the work of these establishments; (b) to arrange for the communication of such information to interested persons outside the Government service when this can be done without detriment to the public interest; and (c) in the case of researches not otherwise adequately provided for to make the necessary arrangements to meet the requirements of Government Departments and others.

Chemistry Research Board.

Chairman, Sir Richard Threlfall, K.B.E., F.R.S.

Engineering Research Board.

Chairman, Sir Joseph E. Petavel, K.B.E., D.Sc., F.R.S.

Physics Research Board.

Chairman, Sir J. J. Thomson, O.M., F.R.S.

Radio Research Board.

Chairman, Admiral of the Fleet Sir Henry B. Jackson, G.C.B., K.C.V.O., F.R.S.

Building (Materials and Construction) Research Board.

This Board was established in 1920 to consider and direct the conduct of Research on Building Materials and methods of construction.

Chairman, The Marquess of Salisbury, K.G., G.C.V.O.

Director of Research, H. O. Weller, M.Sc.

Food Investigation Board.

Director of Food Investigation, W. B. Hardy, Sec.R.S.

Fuel Research Board.

The Fuel Research Board was appointed by the Committee of the Privy Council in February, 1921, and is entrusted with the investigation of the nature, preparation, and utilisation of fuel of all kinds, both in the laboratory and, where necessary, on an industrial scale.

**Director of Fuel Research, Sir G. Bellly, F.R.S., D.S.C.**  
**Assistant to the Director, C. H. Lander, M.Sc.**  
**Fuel Research Station.**  
 East Greenwich, S.E. 25.

The Research Station, erected in 1925-26, by H.M. Office of Works, is designed and equipped to give effect to the Board's scheme of research which was described in their Report published by the Stationery Office in September, 1927.

**Chief Engineer, Eng.-Comm. J. Fraser Shaw, M.A.**  
**Acting Superintendent of Laboratories, J. C. King.**

### Geological Survey Board.

**Chairman, Sir Francis G. Oglivie, C.B., LL.D.**

**Geological Survey of Great Britain and Museum of Practical Geology.**  
 Jermyn Street, S.W. 1.

The Geological Survey and Museum was commenced in 1835; it was under the Science and Art Department from 1839 till 1900, when that Department became merged in the Board of Education. On Nov. 1, 1922, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country, and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world.

**Director of Survey and Museum, J. S. Flett, D.Sc., LL.D., F.R.S.**  
**Assistant to Director, J. A. Howe, C.B., M.Sc.; W. Gibson, M.Sc.**

**Dist. Geologists, E. B. Bailey; T. C. Cannell, Ph.D.; R. G. Carruthers; H. Dreyer; F. L. Kitchin, Ph.D.; M. MacGregor; B. Smith; W. B. Wright.**

**Petrographer, H. H. Thomas, M.Sc.**  
**Geologists, E. M. Anderson, M.Sc.; C. E. N. Bromhead; G. A. Burnett; H. G. S. G. C. Hawker Dinham, M.A.; E. L. Dixon; T. Eastwood; V. A. Eyles; A. Fowler; D. Baldwin; S. E. Hollingsworth; G. W. Leach, M.Sc.; W. Lloyd; J. Maden; F. Marsden; R. W. Pocock; H. H. Read, M.Sc.; J. E. Richey; T. Robertson; G. Ross; R. L. Sherlock, D.Sc.; J. B. Simpson; F. M. Trotter; C. B. Wedd; T. H. Whitehead; G. V. Wilson, M.Sc.; D. A. Wray.**  
**Assistant Palaeontologists, C. P. Chatwin; J. Pringle.**

**Asst. Curator, A. F. Hallimond.**

**Asst. Librarian, C. F. Crook.**

### The National Physical Laboratory,

Teddington, Middlesex.

The National Physical Laboratory was founded in the year 1901 as a public institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. Prior to the year 1922, the property of the Laboratory was vested in the President and the Council of the Royal Society, and the Laboratory was controlled by a General Board and an Executive Committee, appointed by the President and Council of the Royal Society, and comprising representatives of the Society and of the great Technical Institutions. As from April 1, 1922, the responsibility for the maintenance of the National Physical Laboratory was undertaken by the Department of Scientific and Industrial Research.

The Laboratory comprises eight main sections:—  
 (1) The **Physics Department** includes divisions for Heat and Thermometry, Optics, Sound, and Radiology.  
 (2) The main divisions of the **Electricity Department** deal respectively with Electrical Standards, General Electrical and Magnetic Measurements, Alternating Current Tests and Research, Direct Current Measurements and Photometry.  
 (3) The **Metrology Department** is responsible for the Laboratory Standards of length, area, volume, and mass, and among the various branches of work dealt with are the verification of standards of length, standard bars, surveying tapes, the testing of engineers' gauges, including screw gauges, measurements of area, volume, and mass, the testing of barometers, hydrometers, tasimeters, watches and chronometers, and the highest class of scientific glassware for volumetric measurements. The glassware testing has recently been reorganised on an increased scale

owing to the growth in the manufacture of such uses in this country during the war. When the Ministry of Munitions was formed, the Laboratory was called upon to undertake the testing of the gauges for the Ministry; the work assumed very large dimensions, and a special building for its accommodation was provided. (4) The **Engineering Department** carries out research on general engineering problems, especially in relation to the strength and properties of materials under stress; it comprises a laboratory and experimental track for tests of road materials. (5) The **Aerodynamics Department** conducts researches on aircraft models and parts as required by the Aeronautical Research Committee of the Air Ministry; investigations on light alloys and other materials, engines and accessories, seaplane floats, fabrics, &c., are carried out in other departments, especially the Engineering, Metallurgy, and Electro-technics Departments, and the William Froude National Tank. (6) The **Department of Metallurgy and Metallurgical Chemistry**, in addition to researches on steels, and on aluminium and other alloys, is engaged on researches relating to Optical Glass. The equipment includes a rolling mill for the experimental working of alloys. The Metallurgical building was provided by Sir Julius Wernher in 1920. (7) The **William Froude National Tank**, the gift of Sir A. F. Wrenn for the service of the nation, carries out tests and researches on ship and propeller models for the information of designers and naval architects. (8) **Secretariat.**

**Chairman of the General Board and Executive Committee, The President of the Royal Society.**  
**Vice-Chairman, Sir Arthur Schuster, F.R.S.**  
**Director, Professor Sir Joseph Petavel, F.R.S., D.Sc., F.R.S.**  
**Secretary, F. J. Selby, C.B.**  
**Finance and Establishment Officer, A. Lumley.**  
**Accountant, G. E. Bailey.**  
**Librarian and Assistant to the Secretary, G. R. Edwards.**

### Physics Department.

**BOARD OF TRADE.**

Great George Street, S.W. 2.

(See also Dept. of Overseas Trade, p. 262.)

A Board of Trade and Plantations was established by Charles II. in 1660, and in place of this body a Committee of the Council on Trade was established in 1702. The duties of this Committee (which, unlike the other Council Committees, has a president of its own) are to collect Trade Statistics, control the issue of Patents, keep the Standards of Weights and Measures, the non-legal machinery of Bankruptcy, the Registration of Joint Stock Companies, Gas Companies, Electric Light,

ing, Lighthouses, and Merchant Shipping, acting under the latter heading as Auditor of the accounts of the Trinity House and the Irish and Northern Lighthouse Authorities. In 1902 the powers and duties of the Ministry of Shipping were transferred to the Board of Trade. The administrative expenses were £1,500,000 in 1902-03.

## TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1534. The Commissioners for executing the office of Treasurer of the Exchequer of Great Britain and Lord High Treasurer of Ireland consist of the First Lord, who, if a Commoner, is usually Leader of the House of Commons, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House, these plans being accepted, modified, or rejected by the House. The amount estimated to pay the salaries and other expenses was £25,500 in 1921-22.

**TRINITY HOUSE, Tower Hill, E.C. 3.**

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the institution its first charter in 1534, under which "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1801 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c. Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other marks in Scotland, Ireland, and the Channel Islands, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty

Division of the High Court of Justice, to act as Nautical Assessors in Marine Cases tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues, levied on shipping using the ports of the United Kingdom. The accounts in connection with the Lighthouse Service are rendered to the Board of Trade, who have statutory control over the expenditure, and are submitted annually to Parliament. The accounts in connection with the Charitable Trusts are rendered to the Charity Commissioners. In addition to the public and trust funds which they administer, the Corporation have at their disposal certain private funds which are applied to the maintenance of their house on Tower Hill and to other corporate purposes. The Master of the Corporation at the present time is His Royal Highness the Duke of Connaught and Strathearn, K.G. There are ten Acting Elder Brethren, one of whom is a retired officer of the Royal Navy and the other nine are retired Commanders of the Mercantile Marine, and besides three Elder Brethren who have retired from the Active List there are a number of Honorary Elder Brethren, including His Majesty The King and other members of the Royal Family. The ten Acting Elder Brethren, one of whom always is Deputy Master, form the Board which carries out the public and corporate duties of the Trinity House.

## UNIVERSITY GRANTS COMMITTEE.

Storey's Gate, Westminster, S.W. 2.

The Committee was appointed by the Chancellor of Exchequer in July, 1920, to advise the Government as to the application of grants made by Parliament towards meeting the needs of University Education in the United Kingdom.

There has been a large increase in the number of University Students since the war of 1914-1918. Excluding the Universities of Oxford and Cambridge,

Trinity College, Dublin, and Guy's Hospital Medical School, which are not in receipt of annual grant aid, and also those institutions receiving grant for the first time in 1920-21, the figures for full time students compare as follows with those of 1913-14:-

|                | 1913-14 | 1920-21 |
|----------------|---------|---------|
| England .....  | 12,254  | 19,809  |
| Wales .....    | 1,530   | 2,473   |
| Scotland ..... | 4,429   | 28,929  |
| Ireland .....  | 2,777   | 3,130   |

United Kingdom.....20,994 36,441  
The increase is mainly due to the presence of ex-Service students. In the session 1920-21 there were nearly 17,000 ex-Service students in attendance at University institutions in the United Kingdom. Of these, rather more than 21,000 were attending institutions covered by the table.

## JUDICIAL STATISTICS.

Appellate proceedings fell from 1,508 in 1913 to 1,005 in 1918, and 1,206 in 1919. In the High Court of Justice the proceedings began numbered in 1918 42,392, and in 1919 60,139, the figures for 1919 being 80 per cent. more than in 1913. The greater part of the increase occurred in the King's Bench Division, in which proceedings began increased from 33,781 in 1918 to 47,590 in 1919. In the Chancery Division the figures increased from 4,771 to 5,636.

A large proportion of the actions and suits instituted are terminated without trial. In the King's Bench Division out of about 40,000 actions commenced in 1919 judgment was signed in 10,420 cases in default of appearance or other default by the defendant, and in 2,684 cases there were summary judgments for plaintiff without trial. About 25,000 cases were settled out of court, and in only 2,128 cases were actions set down for trial. The distribution between the different Assize Towns of the actions for trial on Circuit is very unequal. Out of the 831 actions no less than 576, or 68 per cent., were set down for trial at only five of the Assize Towns, namely, Manchester (225), Birmingham (128), Leeds (100), Liverpool (82), and Cardiff (41). The only other Assize Town with twenty or more actions for trial was Lewes (22). At thirty-three Assize Towns there were not more than five actions for trial, including seven towns at which there was none.

## CRIMINAL STATISTICS.

A further increase in crime is recorded in the year 1902-03, although the figures still bear no relation to the conditions of pre-war years. Following a steady decline during the continuance of hostilities, the number of persons imprisoned rose by 11,034 to a total of 39,787 in 1919-20, and in 1902-03 there was a further increase of 9,925 to an aggregate of 49,712.

**Greenwich Hospital Department.**

34 Old Queen Street, S.W. 1.

The total estimated income of Greenwich Hospital for

1928-9 is £245,379, as compared with £236,823 last year.

To this figure is added £5,000, being the balance available

from surplus income in the previous year for transfer to

Navy votes towards the cost of providing age and in-

creased age pensions. The total estimated expenditure

is £250,251, as against £241,229 in the previous year,

leaving a surplus income of £128. Of the total figure it

is estimated that £130,378 will be spent on Greenwich

Hospital pensions to seamen and marines, including

Greenwich Hospital Canada pensions, pensions to widows

and the education of children, and £79,982 will be

devoted to the Royal Hospital School.

**Director, A. W. Smallwood, C.B.E. .... £1,200**

**and Marine Officers at the Admiralty are in receipt of Naval**

**Pay-allowance.**

**LIGHTHOUSES AND PILOTAGE.**

In 1928-9 the receipts of the General Light-

house Fund were £705,734, made up of £448,283

Light Dues collected and £256,040 Government

grant; the expenditure was £754,054, principally

upon maintenance of Lighthouses (£107,946), of

Lighthouses (£147,721) and of Steam Vessels

(£147,764). The Pilotage Receipts were £668,095

in 1923 (latest return) made up principally of

£668,535 from Pilotage Rates. The Expenditure

in 1923 was £700,281, of which £597,882 was paid

to Pilots and £92,398 to Pilots' Benefit Fund.

## THE NAVY ESTIMATES, 1921-22.

£82,479,000 net; Decrease on 1920-21, £8,500,000.

The Navy Estimates for the financial year 1921-22 provide for a gross sum of £91,286,866 and a net sum of £82,479,000 as compared with £90,872,300 net in the year 1920-21. Provision is made for 121,700 officers and men instead of 127,500 in 1920-21.

Four new vessels are to be laid down, and the cost of each vessel will probably be about £3,000,000, as compared with £4,000,000 in the case of *H.M.S. Hood*. Though the expenditure is larger, the size of these four vessels will be restricted, so as not to involve the country in heavy outlay on the provision of larger docks—stationary or floating—than are now available.

Of the ships begun during the Great War, four light cruisers, four destroyers, one submarine, two aircraft-carriers, and a hospital ship will be completed in the ensuing financial year.

The number of capital ships in full commission, which was thirty-eight at the opening of

the War, is reduced to sixteen; one flotilla of destroyers now with the Atlantic Fleet is placed in reserve; one light cruiser each is withdrawn from the North American and South African Squadrons, and the South American Squadron is temporarily abolished. In spite of the reduced strength at sea, fuel and lubricating oils are estimated to cost £20,350,000.

Apart from the battle cruisers *Australia* and *New Zealand*, no capital ships mounting 22-inch guns are to be retained in the effective fleet of the Empire, which will comprise only vessels carrying the 13.5-inch or 15-inch gun. The *New Zealand* and *Australia* are already in reserve.

The *Laurentic* was sunk off the coast of Ireland during the War while carrying to Canada gold to the value of £4,996,378. When the accounts for 1922-23 were closed £1,320,568 had been recovered. The expenses amounted to £1,014.

## ORDER OF WAR MEDALS.

THE Army Council has given instructions that stars and medals approved for service during the Great War will be worn in the following order:—1914 Star or 1914-15 Star; British War Medal; Mercantile Marine War Medal; Victory Medal; Territorial Force War Medal; India General Service Medal (for operations against Afghanistan, 1919).

## THE KING'S PRIZE.

THE King's Prize at Bialay, 1920, was won by Sergt. F. H. Morgan, Witwatersrand Rifles, with a score of 281. In 1921 the winner was Armourer-Sergt. J. Cunningham, late R.A.O.C.

## NAVIES OF THE POWERS.

On July 1, 1921, there were sixteen capital ships in full commission in the United States Navy. The United States Fleet was then being redistributed, but as far as can be judged, the number for the fiscal year to July 1, 1922, will average approximately the same. Japan had eighteen capital ships in full commission. This figure did not include one battleship attached to gunnery school, nor one battle cruiser attached to torpedo school.

The figures of capital ships in commission for the British Empire were: Battleships 13, battle cruisers 3.

The number of capital ships laid down since the battle of Jutland was:—

|                      | Built. | Building. |

The British vessels exclude those earmarked for disposal, and include six Commonwealth vessels and two Dominion of Canada vessels. Four of the forty-nine French submarines have been condemned. Italy, the return for which excludes vessels earmarked for disposal, projects building four, and in the case of Russia the twenty-three in the course of construction include "one assembling, two in cases at Nikolaev, twenty Petrograd—uncertain."

## WARSHIP LOSSES IN THE WAR.

The total Allied losses to the date of the Armistice (Nov. 11, 1918) are stated at 803,000 displacement tons; those of the enemy at 415,000 displacement tons. The Scapa Flow "losses" are not included in the enemy total.

# The Army.

## THE WAR OFFICE.

Whitehall, S.W. 1.

The business of the War Office proper appears to have been originally entrusted, about 1800, to a Committee of the Privy Council; the Clerk in attendance on that Committee being the Secretary at War. The Secretary at War had immense power in military matters, as holding the purse; but neither the Commander-in-Chief nor the Board of Ordnance was subject to him. In 1794, a Secretory of State was first appointed. The Office of Secretary at War was not terminated at this date, but, from 1855, it was amalgamated with that of Secretary of State for War until, in 1863, it was formally abolished by Act of Parliament.

In 1801, the Secretary of State for War was also given the business of the Colonies, of which he was relieved in 1864 by the appointment of a Secretary of State for the Colonies.

In 1805, the Commissariat Office, which was only a semi-military branch of the Army with headquarters at the Treasury, was transferred to the War Department; the Board of Ordnance was abolished, after an existence

of more than three centuries; and the Board of General Officers and the Army Medical Department were also successively absorbed into the War Department. The year 1870 witnessed the final welding into one War Office of the civil administrative functions of the Secretary of State and the military administrative functions hitherto exercised at the Horse Guards. In that year, the War Office Act vested the direct and immediate control of every branch of Army administration in the Secretary of State. Before the appointment of a Secretary of State, the military control of the Army was, to a very great extent, in the hands of the Commander-in-Chief, who was subordinated to the Secretary of State from 1869 until the abolition of the Office in 1904. In 1904, an Army Council was created by Letters Patent, and to this Council were thereby transferred all the powers exercised under the Royal prerogative by the Secretary of State for War and the Commander-in-Chief. Statutory powers were transferred by the Army (Annual) Act of 1909 (9 Edw. VII. C. 3).

**THE ROYAL MARINES.**

The Royal Marines (raised in 1664) consist of the Royal Marine Artillery and the Royal Marine Light Infantry. The force appears in the official Navy List as well as in the official Army List, but it is administered solely by the Admiralty. In the table of precedence in the Army the Royal Marine Light Infantry ranks between the Royal Berkshire Regt. (the 49th Foot) and the Royal West Kent Regt. (the 50th Foot).

**THE AUXILIARY FORCES.****THE MILITIA.**

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained:—The Royal Malta Artillery, the Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored. The force now comprises the following units:—

*Cavalry*.—3 Regiments (N. and S. Irish Horse and King Edward's Horse)

*Artillery*.—R.F.A. and R.G.A.

*Royal Engineers*.—All branches.

*Infantry*.—The 3rd Battalions of Infantry Regiments of the Line (with the exception of the 4-battalion regiments noted above, where the Militia Bn. is the 5th), and in some cases the battalion next in numerical order is specially retained as Militia.

**THE TERRITORIAL ARMY.**

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welch, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

**STRENGTH OF THE ARMY.**

Army Estimates of the effective and non-effective services for 1921-22 show the number of men on the Establishment of the Army, exclusive of India, at 341,000, but in the course of the financial year 1921-22 this number is expected to fall to about 235,000, including Colonial and Native Indian troops serving outside India.

This figure compares with 225,000 in 1920-21.

Including permanent staff, the regimental establishment of the *Territorial Army* numbers 218,433 of all ranks, distributed as under:—

|                        |         |                 |        |
|------------------------|---------|-----------------|--------|
| <i>Cavalry</i> .....   | 7,957   | Tank Corps..... | 980    |
| <i>Artillery</i> ..... | 39,448  | R.A.S.C.....    | 5,901  |
| <i>Engineers</i> ...   | 9,064   | R.A.M.C.....    | 10,080 |
| <i>Signals</i> .....   | 8,530   | R.A.O.C.....    | 782    |
| <i>Infantry</i> .....  | 134,710 | R.A.V.C.....    | 92     |

On July 16, 1921, the actual strength of the Territorial Army was 6,652 officers and 702,734 other ranks. The number of recruits enlisted from April 9 to July 16 was 27,380; and, in addition, of the 22,306 Territorials who were discharged on their enlistment into the Defence Force, 12,661 had rejoined the ranks. The Territorial Army was thus 5,230 stronger than when the Defence Force was formed on April 8, 1921, for the "special emergency" arising out of the coal stoppage.

**DISTRIBUTION OF THE FORCES.**

The approximate distribution of the British Army on April 1, 1921, was as follows:—

|                                    |         |
|------------------------------------|---------|
| Home .....                         | 140,523 |
| Colonies .....                     | 12,290  |
| Rhine and Plebiscitary Areas... .. | 14,200  |
| Constantinople .....               | 4,300   |
| Egypt .....                        | 10,300  |
| Palestine .....                    | 4,500   |
| Iraq (Mesopotamia) .....           | 14,300  |

In addition, there were 62,600 Colonial and native Indian troops in Mesopotamia, 3,200 in Palestine, 7,730 in Egypt, and 5,050 in Constantinople.

**COST OF THE ARMY.**

The anticipated net expenditure is £106,315,000, and the total establishment provided for is 341,000 officers and men:—

Maintenance of standing Army:

|   |             |
|---|-------------|
| Home and abroad, except Middle East .....                       | £40,570,100 |
| Middle East .....   | 19,781,500  |

## METEOROLOGICAL OFFICE.

The Meteorological Office was established as a Department of the Board of Trade in 1854. Changes have been made from time to time in the management, and in 1919 the Office was attached to the Air Ministry. The control is vested in a Director and Committee appointed by the Air Council. The General Committee of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the British Rainfall Organisation was transferred to the Meteorological Office in July, 1919.

President of Committee, Maj.-Gen. Sir F. H. Sykes,  
C.B.E., K.C.B., C.M.A. (Member of Air Council, Con-  
troller-General of Civil Aviation).

## CIVIL AVIATION.

RETURNS supplied voluntarily by civil aerial  
transport firms in the United Kingdom for the  
year 1920 show that for Great Britain and on the  
Continental route 26,803 flights were made,  
and 11,534 machine hours were flown, the mile-  
age totalling approximately 958,000. The number  
of passengers carried was 42,206, and the weight  
of goods carried amounted to 136 tons. During  
this period 163 pilots were licensed and 194  
aircraft were registered.

The following figures show the proportion of  
accidents over the whole period:

|   |        |
|---|--------|
| Total accidents reported .....                                  | 30     |
| Approximate number of machine miles<br>flown per accident ..... | 31,900 |
| Approximate number of machine flights<br>per accident .....     | 893    |
| Approximate number of machine hours<br>flown per accident ..... | 354    |

During the period under review four pilots  
were killed and eight injured, and ten passengers  
were killed and six injured. A third party was  
injured by being struck by a propeller.

# The Church of England.

The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked \* in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income. VOLUNTARY OFFERINGS OF THE CHURCH. — In the year ended Dec. 31, 1919, the sum of £50,732,428 was contributed for Church work, the sum of £5,498,484 being for General Purposes and £5,334,994 for Parochial Purposes.

## THE BOYS' BRIGADE. (Incorporated.)

THE senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of military and religious training. Every Company is connected with a Church or other Christian body. Many of the Battalions and Companies are now recognised as Cadet Units. The total strength is 60,000 officers and boys. *Sec., R. S. Peacock, 34 Paternoster Row, E.C. 4.*

## CHURCH LADS' BRIGADE.

An appendage of the religious influence of the Parish Church; was founded in 1891, and combines a military organisation with moral and religious instruction. It is estimated that 500,000 lads have had the advantage of the Brigade's training, and to-day there are 1,327 Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters, Aldwych House, Catherine Street, W.C.2. Brigade Chaplain and Secretary, Rev. Edgar Rogers, M.A.*

## BOY SCOUTS. (Incorporated.)

A Movement initiated and organised by Lieut.-General Sir Robert Baden-Powell, Bart., K.C.B., K.C.V.O., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance; inculcating loyalty and thoughtfulness for others; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

During the War some 100,000 Boy Scouts were employed on war work, over 100,000 joined the Colours, and a continuous service of coast-watching under the Admiralty was maintained. The Movement has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters, 25 Buckingham Palace Road, S.W. 2.*

## ST. PATRICK'S NATIONAL CATHEDRAL, DUBLIN.

Dean and Ordinary, Very Rev. Charles Thomas Ovenden, D.D.

## GENERAL SYNOD,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. L. A. Pooler, D.D.; J. A. Maconchy; Major E. H. C. Wellesley.

Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), A. F. Maude,

52 St. Stephen's Green E., Dublin; Asst. Sec. Canon R. A. Kernan B.D.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, and the Sovereign, as one of its members, supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the Annuitant Bishops and Clergy (which were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 23 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the Diocesan Synod. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Representatives in the General Synod, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on 31 Dec., 1920, was only £102,073, charged with annuities to 40 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £9,787,357, made up of Commutation £102,073, Parochial Sustentation £7,002,341, Episcopal Sustentation £563,685, General Synod Funds £593,765, and Miscellaneous purposes £1,627,566.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £8,818,065. The interest of the Diocesan and Parochial Sustentation Fund is approximately £347,000. The total amount of assessment for stipend paid by parishes, 1920, was £116,104, and the total amount paid for stipends under Diocesan Schemes was £319,676.

The number of members of the Church of Ireland, by the Census of 1911, was 524,375, or 12.0 per cent. of the entire population.

## The Church of Scotland.

THE CHURCH OF SCOTLAND by law established is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries, and also from the Universities and Royal Burghs. It is presided over by a Moderator (chosen annually by the Assembly), to whom the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, is divided into 16 Synods and 84 Presbyteries, and there are about 1,825 ministers and licentiates engaged in ministerial work. The Church population exceeds the aggregate of all the other Presbyterian bodies, and is estimated at about half the whole population of Scotland; the number of communicants at the close of 1920 was 739,251. The sum of £601,058 was raised in 1920 for church and missionary purposes. Within the last 50 years 500 chapels, at a cost of over £1,830,000, have been endowed and erected into parishes *quoad sacra*. The parish churches number 1,457. There are in addition 248 churches and mission stations, in all of which worship is regularly conducted.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. The *First Book of Discipline*, published in 1560, abolished the imposition of hands in the ordination of the clergy, but

superintendents were appointed to appoint ministers and to plant and erect kirks. The Church, so reformed, was governed by a General Assembly composed of the Superintendents, ministers, and lay commissioners. A *Second Book of Discipline* was sanctioned by the Scots Parliament in 1581. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1620, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form, and the very first official act of a sovereign of the British Empire on his accession is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act, 1921*, to declare the lawfulness of certain articles declaratory of the constitution of the Church of Scotland. The articles have been framed with a view to facilitating union among Presbyterian Churches in Scotland.

LORD HIGH COMMISSIONER, The Duke of Sutherland.

MODERATOR (1922), Rev. John Smith, D.D., Partick.

Principal Clerk, Rev. David Paul, D.D., Edinburgh.

Depute Clerk, Rev. J. A. McClymont, O.B.E., D.D.

Procurator, Hon. Wm. Watson, K.C.

Agent, A. L. Menzies, W.S., 54 Castle St., Edinburgh.

Parliamentary Solicitor, A. H. Spens, London.

## OTHER PRESBYTERIAN CHURCHES.

PRESBYTERIANISM HAS SEVERAL SUBDIVISIONS.

(1) *The United Free Church of Scotland* was formed by the Union on October 31st, 1900, of the *Free Church of Scotland* and the *United Presbyterian Church*. The United Church, by rearrangement of the Synods and Presbyteries, has 12 Synods and 64 Presbyteries. The Supreme Court is the General Assembly, which meets every year at the same time as that of the Established Church. In the year ending 31 Dec., 1920, there were 1,484 congregations and 45 preaching stations. The total membership was 520,680, and there were 2,058 Sunday Schools, with 127,622 scholars and 22,130 teachers. In 15 Foreign Mission Fields there are 382 European Mission Agents and 5,917 native pastors, evangelists, and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church at the close of last financial year amounted to £1,455,222.—*Moderator* (1921-2), Rev. Dr. Philip.—*Offices*, 221 George Street, Edinburgh; and 232 St. Vincent Street, Glasgow.

(2) *The Presbyterian Church in Ireland*.—According to the Census of 1911, the members of the various Presbyterian churches in Ireland were 429,896. The largest of these, under the superintendence of the General Assembly, consists of 36 presbyteries, 615 ministers, 561 congregations, with 205,462 communicants, 91,071 families, 7,099

Sabbath-school teachers, and 99,993 scholars. During the year 1920-21 this branch contributed by congregational effort £382,177 for religious, charitable, and missionary purposes. The total income for the year for all purposes was £473,829. It possesses two Colleges, with power to confer Theological Degrees, comprising a staff of 13 professors and 2 lecturers, and has 35 ministerial with 3 medical missionaries in foreign parts.—*Moderator*, Rt. Rev. W. J. Lowe, D.D., Belfast. *General Secretary*, Rev. J. H. Morton, M.A., Church House, Belfast.

(3) *The Presbyterian Church of England* has 13 presbyteries, 352 congregations, 8 preaching stations, and 82,710 members. It has a Theological College (Westminster College, Cambridge), and supports 89 missionaries abroad, including 40 women. In 1920 the amount raised for all purposes was £413,822. *Moderator*, 1921-2, Rev. Ivor J. Robertson, M.A., Regent Sq.—*Church Offices*: 7 E. India Ave., E.C. 3. *Gen. Sec.*, Rev. W. Lewis Robertson, M.A. *Fin. Sec.*, Percy Graham, P.C. *Office*, 21 Warwick Lane, Paternoster Row, E.C. 4.

(4) The less numerous divisions are: *The Free Church of Scotland*, consisting of those members who did not unite with the U.P. Church; the Reformed Presbyterian Synod, the Eastern Reformed Synod, the United Original Seceders, the Secession Presbytery in Ireland, and the Synod of the Church of Scotland in England.

## The Methodist Churches.

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revs. John and Charles Wesley. The most numerous and influential of them are—

### WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first Conference, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. This figure, however, is probably an over-estimate, and is therefore open to correction. The latest statistics are: Ministers, 56,494; local preachers, 97,531; members and probationers, 10,386,972; Sunday schools, 94,857; officers and teachers, 922,361; scholars, 9,128,637; churches and other preaching places, 100,130. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleys are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism. The Wesleyan Conference will be held at Sheffield in 1922.—*Pres.*, Rev. J. A. Sharp; *Sec.*, Rev. John E. Wakerley.

### THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists*, who sprang up in Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleys they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President*, Rev. S. Horton.

### THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists, which hitherto had been separate from and independent of each other. These were:—

*The Methodist New Connexion*, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the

Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

*The Bible Christians*, founded in 1815 by William O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

*The United Methodist Free Churches*, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

An Act of Parliament was secured in 1907 to authorise the union of these three denominations into one, to be called the United Methodist Church, and to provide for the government of the Church by a Conference consisting of an equal number of ministers and laymen, elected by districts. The act of union took place in London on September 17, 1907, when the first united Conference was held. About 700 delegates were present. A deed was adopted and signed, declaring the terms of union, defining the constitution and doctrinal tenets, and containing provisions for government and discipline.—*President*, Rev. W. Treffry; *Secretary*, R. Norman.

### INDEPENDENT METHODISTS.

4. *Independent Methodists*.—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.—*President*, W. A. Hindley.

### WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original reformers who seceded from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*Secretary*, Rev. E. Bromage, Sheffield.

### FINANCES.

*Finances*.—The Wesleys raised in 1920-21 £287,950 to sustain their very extensive missionary operations. At the same time their Home missionary income was £49,777. The *Primitive Methodists* raised £2,628 for new chapels, and the *United Methodist Church* £32,448 for their missions.

## The Calvinistic Methodist (Presbyterian) Church of Wales.

THE CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany.

In 1920 the body numbered—churches, 1,483; chapels and other buildings for Sunday-school branches, 1,779; ministers and preachers, 1,156; elders, 7,079; communicants, 187,220; on probation, 1,592; Sunday-school teachers and officers, 24,151; teachers and scholars, 189,807; adherents (including communicants), 326,415.

Contributions in aid of the Ministry in 1920, £206,418. For various religious purposes (including the ministry), £505,949.

One of the features of the Welch churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language used generally in these schools.

The English branch of the Church has 380 chapels and preaching stations, with 32,730 communicants and 89,317 adherents (including communicants). All the rest are Welch.

The churches in Assam number 522; communicants, 18,114; adherents (including communicants), 58,494. The adherents in Brittany are few.

*Moderator (South Wales) Synod*, Rev. W. D. Rowlands, Carmarthen; (*North Wales*), Prof. J. O. Thomas, M.A., Bala.

*Moderator of General Assembly*, Rev. J. Ceredig Evans, Khasia.

*Secretaries*, Revs. Griffith Parry Williams, M.A., Mold, and Evan Price, Ebbw Vale.

*Statistical Secretaries*, Revs. John Jones, Brynrodyn, and D. E. Thomas, Llanstephan.

## The Independents and the Baptists.

THE INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine districts were formed, each under a Moderator. There are 51 county and other Associations in England and Wales, with 4,701 churches and preaching stations containing 1,727,442 sittings; the number of ministers in the British Isles is 3,062. *Chairman of the Congregational Union of England and Wales*, 1921-22, Rev. A. J. Viner; 1922-23, Rev. Thomas Yates. *Secretary*, Rev. Richard J. Wells. *Chief Clerk*, C. Stancliff. *Office and Publication Department*, 22, Memorial Hall, Farringdon Street, E.C. 4.

The *Countess of Huntingdon's Connexion*, with 40 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby

Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, W.C. 1.

The BAPTISTS are, in all respects but one, similar to the Congregationalist; they have the same form of Church government, and differ but in one point of practice—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1823. In the British Isles there were, in 1920, 4,182 chapels and 2,072 pastors. The members numbered 405,104, Sunday-school teachers 54,243, and Sunday scholars 512,365. In the United States the "members" alone number 7,504,447. *President of the Baptist Union*, 1921-22, Rev. J. C. Carlile, C.B.E., D.D. *Secretary*, Rev. J. H. Shakespeare, D.D. *Office*, Baptist Church House, Southampton Row, London, W.C. 1.

## Minor Religious Denominations.

MINOR RELIGIOUS DENOMINATIONS.—The chief are the Unitarians, with about 350 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. S. H. Mellone, D.Sc., Essex Hall, Essex Street, W.C. 2. The Society of Friends (Quakers), consists of 29,049 members and has 300 places of worship in Great Britain, with 29 places of worship in Ireland and 2,281 members. *Central Office (Great Britain)*, 136 Bishopsgate, E.C. 2, (Ireland), 6 Eustace Street, Dublin. The Churches of Christ have 14,777 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The Moravian Church (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 43 congregations and preaching stations, with 3,680 communicants. The Catholic Apostolic Church has above 80 churches; the New Church (Swedenborgian), 75 societies, with about 6,700 registered members; the Latter-Day Saints (Mormons) have 22 churches. The Brethren, or Plymouth Brethren (divided into two bodies, "Open" and "Exclusive") number about 80,000; of whom five-eighths belong to the "Open" body. The Reformed Episcopal Church originated in the U.S.A. (1873) and is now working on Evangelical lines in U.S.A., Canada, Great

Britain and India. *Presiding Bishop*, Rt. Rev. F. Vaughan, D.D.; *Bishop of Southern Diocese*, Rt. Rev. J. Louis Fenn, LL.D.; *Gen. Sec.*, Rev. W. Welby Prior, B.D., Trinity Rectory, Southend-on-Sea; *Southern Diocesan Sec.*, Rev. P. T. Norris, B.A., Harlesden. The Old Roman Catholic Church: *Archbishop in Great Britain*, Most Rev. Bernard Mary Williams, The Edge, Stroud, Glos. The Greeks (*Great Archimandrite*, Very Rev. C. Pagonis, St. Sophia's Vicarage, Moscow Road, W. 2) have churches in London, Manchester, Liverpool, and Cardiff. The Armenians have churches in London and Manchester; the French, Dutch, Swedes, and Swiss in London, Norwich, and Canterbury; and there is a mosque for Moslems.

*The Jews*.—Among the inhabitants of the United Kingdom are about 300,000 Jews, mainly in London and other large towns, who possess 200 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. *Chief Rabbi's Office*, Mulberry Street, Commercial Road, E. 1. The Jews support their own poor. Their number throughout the world is computed at fourteen millions.

# The Roman Catholic Church.

In *England and Wales* there are 4 Archiepiscopal and 23 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 38 Archiepiscopal and 112 Episcopal Sees, with 54 Vicariates and 9 Prefectures.

The *Catholic Directory* of 1921 estimates the Catholic population of *England and Wales* (1920) at 2,725,475, *Scotland* (1920) 546,000, *Ireland* (Census figures 1911) 3,245,670. The figures for *India* (1911) are 1,904,886, *Ceylon* (1911) 339,300, *Canada* (1920) 3,668,837, *Australian Commonwealth* (1911) 906,804, *New Zealand* (1916) 151,605 and *Union of South Africa* (1911) 91,035, the total for the *British Empire* being 13,814,404; and the Catholic population of the world is estimated at 316,888,975.

THE SALVATION ARMY was founded by General William Booth (b. 1829, d. 1912). In Dec., 1920, the number of Officers, Cadets and Employes was 25,217, of Corps and Outposts, 12,211, Local Officers, 74,466. The number of countries occupied was 73, and of languages used 46. Connected with the Salvation Army are numerous philanthropic institutions, including 126 Industrial Homes for Fallen Women, 39 Maternity Homes and 96 Children's Homes, 186 Slum Posts, 15 Prison-Gate Homes, 282 Shelters and Cheap Food Depôts for the Homeless, 173 Workshops and Factories, 99 Labour Bureaux, 22 Farms, &c. More than 40,000 open-air meetings are held weekly, and a still larger number in the various halls of the organisation. At a large number of

police courts, many gaols, and some convict establishments, Salvation Army officers are constantly in touch with prisoners, both of the first-offender class and confirmed criminals. In many instances men and women of both classes are taken into the care of the Army at the prison gate. Magistrates sometimes commit first offenders to the care of the Army instead of to prison. The total raised during "Self-Denial Week" in 1921 amounted to £167,84s. Balance-sheets and statements for account relating to the General Funds or to the Social Funds can be obtained, post free, from 101 Queen Victoria Street, E.C. 4.—GENERAL, Bramwell Booth (1922), Queen Victoria Street, London, E.C. 4.

THE HEAD MASTERS' CONFERENCE (Secy., W. A. Bulkeley-Evans, C.B.E., M.A., 5, Paper Buildings, Temple, E.C. 4).—The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. The annual meetings are, as a rule, held in December, alternately (a) at some school represented on the Conference, (b) at London or some University town.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29, Gordon Square, W.C. 1. (Joint Hon. Secs., R. F. Cholmeley, O.B.E., M.A.; W. Jenkin Thomas, M.A.).—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

#### CONSUMPTION AND CHEST DISEASES.

The number of deaths from tuberculosis in the United Kingdom and the rate per 100,000 of the population for each year since 1915 were as follows:—

| Year. | Deaths. | Rate per 100,000. |
|-------|---------|-------------------|
| 1915  | 54,295  | 151.5             |
| 1916  | 53,852  | 150.9             |
| 1917  | 55,934  | 156.4             |
| 1918  | 58,073  | 169.4             |
| 1919  | 46,322  | 125.8             |
| 1920  | 42,545  | 112.8             |

The fall in the rate of 56.6 per 100,000 between 1918 and 1920 is attributable partly to the cessation of the War and consequent better living conditions, and partly to the valuable work done by Local Government Authorities. The increase of facilities for the treatment since 1912 is as follows:—

| Year. | No. of beds in public institutions. | Dispensaries. |
|-------|-------------------------------------|---------------|
| 1912  | 1,500                               | 8             |
| 1918  | 6,749                               | 375           |
| 1921  | 9,879                               | 470           |

At the same time the beds in voluntary institutions increased from 2,800 in 1912 to 7,568 in 1921, a total increase of beds from 4,300 in 1912 to 17,447 in 1921.

**The Victoria League (FOUNDED 1901)**

THE Victoria League was founded in 1901 as an Association destined to promote mutual understanding between British subjects throughout the Empire. It maintains active correspondence with 23 Branches in Australia, South Africa, New Zealand and Jamaica, and with its Allied Association, the Imperial Order of the Daughters of the Empire in Canada. By interchange of introductions it is enabled to extend hospitality to hundreds of visitors from the Dominions every year, and to ensure a welcome for English wives of Overseas soldiers and others settling Overseas.

During the War the Victoria League conducted large Clubs for Overseas soldiers, when 288,564 were provided with beds and 1,225,151 with meals. Its branches in Edinburgh, Glasgow and Dundee opened similar and equally successful Clubs.

Its social and educational work is carried on by branches throughout Great Britain. In co-operation with the War Office 2267 lectures were given in 1918-19 in Military Camps by Victoria League lecturers. Lantern lectures and picture talks are constantly given in numerous schools affiliated to the League, it also circulates books and other literature to settlers in remote places throughout the Empire, and has supplied

literature weekly to the men employed on the Graves Commission in France.

The visit of 150 Canadian Teachers to Edinburgh, York and London in the summer of 1921 was organized by the Victoria League. The League is now extending its activities to India.

The Annual Public Meeting of the League was held in London in 1921 in the Guildhall. H.R.H. The Prince of Wales presided.

## LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, of seven Colonial companies (marked C), and of three American offices (marked A), all of which transact business in this country.

**CLASS OF BUSINESS.**—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are indicated by letters in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches.

**FIGURES.**—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1920.

**LIFE FUNDS.**—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

**PREMIUM INCOME.**—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

**EXPENSES.**—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is

large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

**INTEREST.**—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. Owing to the unprecedentedly high rate of income-tax now leviable, a reduction in the net yield may be anticipated in nearly every case in the immediate future.

**VALUATIONS.**—The last two columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H<sup>m</sup> and O<sup>m</sup>, and the corresponding Tables H<sup>m</sup>(s) and O<sup>m</sup>(s) which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O<sup>m</sup> and O<sup>m</sup>(s) tables in conjunction are more stringent than the O<sup>m</sup> table alone, the H<sup>m</sup> is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

## FIRE INSURANCE RATES.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

*Private Dwelling Houses*, built of brick or stone and tiled or slated and in no hazardous proximity, *rs. 6d.*

*Household goods* therein, usually *as.*

Policies are issued by a number of companies embracing all risks incidental to private houses, in one amount.

*Shops and Warehouses*, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, *from as.*

*Stock and Utensils* in trade, fixtures, and household furniture in such shops and warehouses, *from as.*

*Private Dwelling Houses*, brick and timber built and tiled or slated, in no hazardous proximity, *from as. 6d.*

Most fire insurance companies transact accident and miscellaneous business, and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. A number of fire offices are prepared to issue policies of an inclusive character for household purposes, combining in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

## ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses may usually be applied either to increase sum assured or to reduce premium, if not discounted for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price"

system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

## AVERAGE ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE OF £100.

The next table shows the annual premiums payable throughout life for assurance of £100 at death with participation in profits. Premium rates alone are not sufficient for judging the relative attractions of life offices. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually

high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

#### ENDOWMENT ASSURANCES.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no

medium promising more satisfactory results than an Endowment assurance participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—see first page of Life Assurance section.

## ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death. The

annual premiums payable throughout the endowment period, or till death if previous, for the assurance of £100 at various ages of entry and maturity, participating in profits, are given in this table.

## IMMEDIATE ANNUITIES.

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable to day of death. Some Companies pay whole or part of stamp duty. See note as to rates on introductory page.

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

## GENERAL REGULATIONS.

UNPAID PACKETS (letters, newspapers, postcards) are charged double postage on delivery; UNDERPAID PACKETS, double the deficiency.

RE-DIRECTION.—(1) By agent of addressee: Letters, post-cards, printed papers, and newspapers may be re-posted free not later than the day after delivery (Sundays and public holidays not being counted), and must not have been opened or tampered with. Parcels may be re-directed free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being regarded for this purpose as one Town Delivery Area); otherwise they are charged on delivery at the ordinary prepaid rate. The above rules apply also to Registered packets, which must be taken to a Post Office. (2) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Notice of removal and for the re-direction of letters must be given on printed forms, to be obtained from the local postmaster or from postmen, and signed by the person to whom the letters are to be addressed. Separate forms must be filled in for parcels, and for the re-direction and (postal) forwarding of telegrams. The notice holds good for twelve months, and may be extended by payment of 1s. for second, 1s. third, and 2s. each subsequent year.

REGISTRATION.—Registered postal packets of all kinds must be handed to an officer of the Post Office, and a receipt taken. Parcels (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. The registration fee is 3d. exclusive of postage. With a further 3d. the sender may obtain advice of delivery. The latest time for registering for the night-mails is usually half an hour before the box closes for letters; in the case of parcels, half an hour before the latest time for posting ordinary parcels. Inland packets marked "Registered" or containing coin or jewellery, if found in a letter-box, undergo compulsory registration

(4d.), carrying no compensation. COMPENSATION for loss or damage in the post of articles adequately packed.—The fees for compensation inclusive of registration are:—Fee 3d., compensation up to 5s.; 4d., 5s.; and 1d. for each additional 5s. up to the maximum 1s. 11d. for £400. Compensation up to 5s. is given on (a) unregistered parcels (for loss, only if certificate of posting is obtained at the time of posting), (b) unregistered packets conveyed by Express Delivery Service No. (1). Compensation in respect of money of any kind (coin, notes, orders, cheques, stamps, &c.) is only given when the money is sent by Registered Letter Post in one of the special envelopes sold officially (see next page); the maximum compensation for coin is 5s. Compensation for jewellery, watches, &c., is only given on registered packets; for glass, crockery, greases, colour-powders, fish, meat, fruit, and vegetables only when sent as parcels. Compensation is not given for damage to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (2) registered packets other than parcels, unless "Fragile, with care" is written above the address.

CERTIFICATE OF POSTING unregistered parcels, free; other unregistered postal packets, ½d.

EXPRESS DELIVERY SERVICE.—There are five services of which (4) and (5) alone are available on Sundays:—(1) By special messenger all the way, from most offices which deliver telegrams. Inclusive charge, which must be prepaid, in cash or by stamps, 6d. per mile, or part of a mile, with 1d. on each separate packet after the first, up to ten, the maximum; also a special charge of 3d. on each packet over 1 lb. in weight. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram gratis. (2) By special messenger after transmission by post: (a) from the ordinary delivery office, if it is a telegraph office (maximum charge in London 8d.); or if so marked, (b) "Express Delivery from Head Office" in large provincial towns, and (c) in London "from Head District Office" or "from G.P.O." Charges as before (without weight fee) in addition to postage. (3) In advance of the ordinary deliveries upon previous application by addressee (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) and (5), see p. 417. For (1), packets must be handed over the counter with "Express" clearly marked in left-hand top corner; for (2), may be handed in or posted, and must be marked "Express," with a broad vertical line back and front. Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2d. For Sundays and Holidays, see p. 417.

RAILWAY LETTERS.—On payment of 4d. extra at a Parcel or Booking Office of most railways, during such hours as the station is open, whether on week-days or Sundays, a letter not exceeding 3 oz. will be forwarded, and passed on from one company to another at a junction, by the next available train or steamship. The letter may be called for at the station of address, or posted there in the nearest letter-box, or (except on Sundays) delivered as an Express Letter under Service as (or from the first Express Delivery office it reaches), or (by telegraphing for a messenger to meet it) under Service 1.

DISPOSAL OF UNDELIVERED POSTAL PACKETS.—Inland packets chargeable with a postage of 2d. or more

undelivered, are returned unopened if bearing sender's name and address; others are opened by the Returned Letter Office and returned to senders without charge, a registration fee of 2d. being charged should anything of value be inside. Packets containing neither sender's address nor any enclosure of importance are destroyed, except parcels which, if not applied for, are generally disposed of after 3 months; or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 1½d. are redelivered to sender on payment of a second postage, if his name and address, with a request for return in case of non-delivery, appear on the outside; those without such request are disposed of.* Undelivered foreign letters, &c., are returned, unopened, after a short detention, to the countries whence received; parcels are disposed of after a reasonable time for inquiry. If containing sender's address, he is advised, and parcel will be returned on payment of fresh postage. Packets returned from abroad are generally dealt with similarly.

**POSTS RESTANTE** (solely for the accommodation of strangers and travellers and for three months only).—Correspondence of any kind may be addressed as a rule to all Post Offices except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, or fictitious names, or Christian name only, it is not taken in, but is at once treated as undelivered. All persons applying for "Poste Restante" letters must furnish sufficient particulars to ensure delivery to the proper owner. *Poste Restante letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept two months; others, only one fortnight.* After these intervals they are treated as undelivered (see above), unless bearing a request for return at end of the interval, or some specified shorter period.

### Letter Post.

The Normal Post of the Country. Most things may be sent by it (except explosive, offensive or obscene matter, eggs, fish, game, rabbits, meat, fruit, and vegetables) (see p. 410).

### Post Cards.

Postage, 1½d. The left-hand half of the address side may be used for correspondence, both inland and foreign. Plain cards (maximum size 5½ × 3½, minimum 4 × 2½ in.), like but not thinner than official cards, may also be used both inland and abroad. Reply cards, 3d. Reply halves are available for transmission to the country of origin, and to that country alone, and must bear the words "Post Card—Gt. Britain and Ireland," and "Reply."

### Printed Papers Post (see p. 410).

This section takes the place of "Book Packet Post."

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books, printed commercial forms, e.g. invoices, receipts, estimates, share transfer notices, applications for employment; deeds and agreements; circulars; Christmas, etc., cards and "picture post-cards"; M.S. proofs and examination papers with corrections, drawings or photographic prints (when not on brittle or fragile substance); together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter; any writing must refer solely to subject-matter of the document, or consist of formulas of courtesy or of a conventional character not exceeding five words or initials.

Circulars wholly or partly printed in imitation type-writing are only admissible by this post if at least so identical copies are handed together explicitly as such over the counter at a Head or Branch Post Office.

### Newspaper Post.

This post is available for newspapers registered at the G.P.O., including any supplements thereof. Packing as for "printed papers" (see above). No writing or printing is permitted, other than the words "with compliments," name and address of sender, request for return if unde-

livered, and a reference to a page. Newspapers not registered as such at G.P.O., and Christmas or special issues of registered newspapers, may be treated as printed papers.

### Parcel Post.

For bulky and heavy matter (see p. 410). The parcel should be marked "Parcel Post," and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be on the outside of every parcel. More than 11 lb. must not be accepted from one person by a rural postman on foot or bicycle, without notice on the previous day, and he may refuse parcels if already loaded; a mounted postman must accept what he can conveniently carry.

Parcels to or from the Channel Is. or I. of Man are liable to customs duty, which may not be evaded by Letter Post; the sender must, in the former case, declare contents when posting.

### Literature for the Blind.

Papers, periodicals and books, if printed in special type and subject to certain conditions of posting, marked outside "Blind Literature," with name and address of sender: 1 lb., ½d.; 5 lb., 1s.; 8½ lb. (maximum), 2s. Maximum size, 2 × 1 × 1 ft. These rates also hold for postage abroad.

### STAMPS, ENVELOPES, POST CARDS, &c.

POSTAGE STAMPS (used also for receipts, telegrams, and certain inland Revenue duties up to 2s. 6d.—for list of latter see p. 423) are sold of the respective values of ½d., 1d., 1½d., 2d., 2½d., 3d., 4d., 5d., 6d., 9d., 10d., 1s., 2s. 6d., 5s., and 10s. Books of 18 2d. stamps, 3s.; of 12 2d. with 6 each of 1½d., 1d., and ½d., 3s. 6d. Rolls of ½d., 1d., and 2d. stamps (480 joined sideways, 500 and 1,000 lengthwise) are also sold at 2d. and 4d. extra. Stamps may be purchased at most offices between 9 a.m. and 7 p.m., and at any office open for telegraph business. Rural postmen carry ½d., 1d., and 2d. stamps and registered letter envelopes.

REGISTERED LETTER ENVELOPES for foreign and inland letters, with a 5d. embossed stamp (for registration and postage), are of four sizes: F. 5½ in. × 3½ in., 5½d. each; G. 6 in. × 3½ in., 6d. each; H. 8 in. × 5 in., 6½d. each; K. 11½ in. × 6 in., 7d. each.

LETTER CARDS with 2d. stamp, one 2½d.; 3, 7½d.; 5, 1s.; 10, 2s.

POST CARDS impressed with a 1½d. stamp: Single (usable for abroad), Thin—one, 1½d.; 3, 5d.; 5, 8d.; 10, 1s. 4d. Stout—one, 1½d.; 4, 7d.; 7, 1s. Reply (inland and foreign patterns)—one, 3½d.; 5, 1s. 4d.; 10, 2s. 8d.

EMBOSSSED ENVELOPES with 2d. stamp; 1, 2½d.; 5, 11d.; 11, 2s.

NEWSPAPER WRAPPERS with 1d. stamp; 1, 1½d.; 2, 2½d.; 5, 5½d.; 25, 2s.

### Spotted Stamps.

Embossed or impressed postage stamps (except of Queen Victoria's reign) cut out of envelopes, post-cards, letter-cards, newspaper-wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Stamps are considered defaced when marked

on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials for identification. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Applications for the recovery of the value of spoiled or unused stamps, whether postage, revenue, or insurance, can be made to the Postmaster at most large Post Offices (see also p. 408).

### LONDON POSTAL ARRANGEMENTS.

The Metropolis is divided for postal purposes into eight Head Districts, each comprising a certain number of Delivery Districts as indicated below:—

|                     |    |                      |    |
|---------------------|----|----------------------|----|
| East Central (E.C.) | 4  | North Western (N.W.) | 30 |
| West Central (W.C.) | 2  | South Eastern (S.E.) | 27 |
| Eastern (E.)        | 27 | South Western (S.W.) | 19 |
| Northern (N.)       | 15 | Western (W.)         | 14 |

To avoid delay in delivery, the initials of the Head District, and the number of the proper delivery office should appear in the address of all postal packets. Each Head District has a Head Office (addresses given on pp. 405-6), Branch Offices, and others, the total number of offices in the London Postal Area being about a thousand.

**FOREIGN MAILS** (dates and times of the latest times for posting at G.P.O.).—The more regular *Letter Mails* are (every week-day unless otherwise mentioned):—6.0 a.m. (exc. Wed.), Norway (via Newcastle-on-Tyne); 6.30 a.m., France, Switzerland, Italy, S.W. Europe, Algeria and Tunis; 6.45 a.m., Belgium, Germany, Austria and Russia; 9.0 a.m. (9.30 with 1d. late fee), France, Italy; 12.0 noon, Belgium, Germany; 1.0 p.m. (Mon. Th., Sat.), Denmark; 6.0 p.m. (7.0 with 1d. late fee), Malta, Syria, Balkans and almost all Europe (exc. Russia and Norway), also (exc. Wed.) Egypt, Cyprus, Palestine, Arabia; 6.0 p.m. (8.0 with 2d. or 3d. late fee) (Th. only), Egypt, Aden, Seychelles, E. Africa (as far south as Tanganyika Terr., Persia, Mesopotamia, India and the East (as far as E. India, China, and Philippines); 7.30 a.m. (11.15 a.m. with 6d. late fee) (Fridays only), Madeira, S.W. South and southern E. Africa (as far North as Nyasaland, Mauritius). The less regular *Letter Mails* are:—Twice weekly to N., Central, and S. America (from Venezuela and Peru northward), Bahamas, Bermuda, and Inner W. Indies, Japan and dependencies, Hawaii, Fanning and Fiji; about weekly to Canada (direct packet), Canaries, Br. and Fr. W. Africa (exc. Gambia), Liberia; about thrice monthly to Australia and S.W. Brit. Oceania; about fortnightly to Gambia, Senegal and Niger; about monthly to Belgian Congo, St. Helena and Ascension; one to three times monthly to Port. W. Africa. Frequently to outer Br. W. Indies, S. America (from Guiana, Bolivia and Chile southward), irregular to New Zealand, Newfoundland (direct packet). To other parts of the world letter mails are irregular or uncertain. *Printed Papers*, etc., must be posted half hour earlier (for Thursday 6.0 p.m. mail, by 5.30 p.m.). (See also Air Mail Service, p. 412). *Parcel Mails* are rather less frequent in general, except to N. America. The mail for S. Africa leaves Th. morning; for India, Egypt, and the East, Tu. nights.

**INLAND MAILS.** (Letters and Cards).—The latest time of posting without late fee for Provincial Mails, at G.P.O. and Head District Head Offices, Charing Cross, Paddington (Spring St. and London St.), and certain E.C. Offices, is 6 p.m., elsewhere in Head Districts, 5.30 p.m. Registered letters must, as a rule, be posted half-an-hour earlier than ordinary letters; but the times at G.P.O. are 5.30 p.m. for General, 7.30 for Late Night Mails, 9.0 for Midnight, Early Morning, and Scotch Day Mails (8.0 on Saturdays), and 9.0 p.m. for London first morning delivery, and Irish and N. Wales Day Mail.

**LATE FEES.**—Letters and cards bearing an extra stamp ( $\frac{1}{2}$ d. inland, 1d. for abroad), if posted in special boxes at certain offices or termini, after the ordinary hour of collection, but before the times given below, are included in certain mails.—*Foreign Mails*: at G.P.O. (see also above); *Inland*: General Night Mails at G.P.O. and Head District Head Offices, 7.30 p.m. (except E. and S.E. 7.15); at Railway Termini (platform box or box on Sorting Carriage) up to departure of the following mail trains: Cannon St. (S.E.) 11.45 p.m.; Liverpool St. (G.E.) Ipswich line 6.55 a.m., Cambridge line 10.15 p.m.; King's + (G.N.) 4.55 a.m., 8.25 p.m.; Euston (N.W.) 8.30 p.m., (N.W. & Irish) 8.30 a.m., 8.50 p.m., (N.W. & Scotch) 8.30 p.m.; Paddington (G.W.) 8.30 a.m., 8.5 p.m.; Waterloo (S.W.) 10 p.m. Registered letters can be received at the Sorting Carriage of the trains up to the same times, on payment of 1s. 6d. late fee, or at G.P.O. up to 7.30 (1s. 6d. for Night, 8 p.m. (8d.) for Late Night Mails. For Sunday arrangements, see p. 417.

### POSTAGE, &c., ABROAD.

N.B.—In certain colonies and foreign countries the rates of postage to the United Kingdom are higher than those from the United Kingdom given below.

#### Letters.

The letter rate from the United Kingdom to the British Possessions generally,\* and to the United States (but not dependencies, except Hawaii); also to H.M. Forces in the Rhine, Black Sea, and Palestine Armies; and to H.M. Ships in Foreign Waters (addressed c/o G.P.O., London, E.C. 3) is 2d. the first ounce and  $\frac{1}{2}$ d. for each succeeding ounce or fraction. The charge to all other destinations is 2d. the first ounce and  $\frac{1}{2}$ d. per ounce afterwards. Limits of size,  $2 \times 1 \times 1$  ft.

#### Post Cards.

$\frac{1}{2}$ d. single,  $\frac{3}{4}$ d. reply. (See also p. 411.)

#### Reply Coupons.

Coupons exchangeable for stamps of the value of 25 centimes ( $\frac{1}{2}$ d.) each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 2d. each for the purpose of preparing replies to letters. The coupons can be exchanged by the addressees at the Post Office of the place of destination for local postage stamps.

#### Books, Newspapers, Samples, &c.

(a) **PRINTED PAPERS:** Newspapers, Books, Catalogues, Photographs, Engravings, Music, and other wholly printed matter,  $\frac{1}{2}$ d. per 2 oz. There is also a special *Magazine Post* for magazines, newspapers, and trade journals sent to Canada by direct packet, and thence (or direct) to Newfoundland, if properly registered for such post (this is frequently indicated on the outside of the magazine) and packed without a cover, or with cover open at both ends, otherwise complying with conditions for Inland Newspaper Post mentioned on p. 411. Rate: 4-6 oz., 1d.;  $1\frac{1}{2}$  lb.,  $1\frac{1}{2}$ d.; and  $\frac{1}{2}$ d. per  $\frac{1}{2}$  lb. up to 5 lb., 5d. For *Literature for the Blind*, in other respects considered as a Printed Paper, the rate of postage abroad is the same as Inland.

(b) **COMMERCIAL PAPERS:** Legal and mercantile documents, MSS., invoices, etc., partly written,  $\frac{1}{2}$ d. per 2 oz.; minimum charge of 3d.

(c) **PATTERNS (bond fide), SAMPLES, AND SCIENTIFIC SPECIMENS,** keys, fresh-cut flowers, etc.,  $\frac{1}{2}$ d. per 2 oz.; minimum charge of 1d.

To the British Empire, or countries not in the Postal Union,† the limits are: Size, (a) and (b)  $8 \times 1\frac{1}{2} \times 1\frac{1}{2}$  ft., (c)  $2 \times 1 \times 1$  ft.; weight, generally 3 lb. To countries in the Union: Size, (a) and (b)  $1\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$  ft., (c)  $12 \times 8 \times 4$  in.; weight, (a) and (b) 4 lb., (c) 12 oz. If in the form of a roll, the limits of size in all cases are: (a) and (b)  $30 \times 4$  in., (c)  $12 \times 6$  in. Postage must be prepaid. Wholly unpaid packets are stopped. Double the deficit (minimum, 30 centimes gold equivalent) is charge on underpaid packets. Regulations as to packing, writing, etc., are similar to those for inland packets.

#### Parcels from abroad.

These are subject to British Customs examination and duties (if any), with a fee of 6d., must be paid before delivery to addressee.

\* Including all places in the *Red* under "Imperial British Parcel Rates" below (except that this rate applies only to Bahrain, Dubai, Koweit, and Muscat in Persia or on the Persian Gulf) with *Wei-hai-wei* and British zones in Cameroons and Samoa.

† Afghanistan, Bahrain, Friendly Is. (Tonga), Johore, Muscat, Nigeria, Nyasaland, N. Rhodesia, Trengganu.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be insured for many countries, but not registered. They are subject to Customs, and contents and value must be declared on special forms; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs Duty is allowed on British goods by the chief Colonies.) The Customs charges of certain countries can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. Packing must be substantial, and sometimes special kinds of packing are insisted upon. Delivery in many countries is only to a post office, station, or customs house, whence addressee, who is notified of its arrival, must arrange conveyance. In Belgium, France, and Spain parcels are delivered by the railway companies. Where addressee cannot be found, one alternative address is allowed in the case of the chief British Colonies (except New Zealand), together with Argentine, Belgium, Denmark, France, Sweden, and Venezuela. Certain articles are prohibited; among them letters never everywhere.

To most countries the maximum length is 3 feet 6 inches, or length and girth combined 6 feet (New Zealand, Tonga, and Apia, 4 feet). Parcels for Canada except umbrellas, etc., must not be longer than 3½ feet. To Italy and Greece and their Colonies, to Argentina, Argentine, Brazil, most French Colonies, Honduras, Rep. (Pacific Coast), the independent W. Indies, Portuguese Timor, Pitcairn I., and Paraguay, the maximum length is 3 feet, length and girth combined about 4 feet; in many cases, however, narrow parcels (umbrellas, sticks, etc.) may be longer.

Guiana, Brit. Honduras, Brit. Somaliland, Ceylon, Corsica, China (Shanghai and Wei-hai-wei only), Cyprus, Denmark, Egypt, Falkland Is. (Port Stanley only), Fiji Is., France, Gambia, £30, Gibraltar, Grenada, Hong Kong, Jamaica, Leeward Is., 4 Malay States, Malta, Mauritius, Morocco (Tangier only), New Zealand, Norway, N. Borneo, Nyasaland, £30, N. Rhodesia (4 places), S. Rhodesia, Sudan, £30, St. Lucia, Sarawak, £30, Seychelles, Str. Settlements, Sweden, Switzerland, Tobago, Trinidad, Zanzibar. Fees for collection: ½d. for Trade Charge (amount to be collected) not exceeding £1. with ½d. extra for each additional ½d. of Trade Charge up to the maximum, which is £40 (fee 8s. 6d.) where not otherwise shown in above list. Addressee has generally also to pay, besides Customs, if any, 4d. (as in U.K.) or 6d. fee (not repayable) on delivery. If Trade Charge cannot be collected at first or one alternative address, parcel is returned at sender's expense unless abandonment is definitely requested.

**INTERNATIONAL EXPRESS SERVICE.**—Delivery by special messenger of correspondence (locally including parcels) to or from certain colonies and foreign countries, or certain towns in the same, has now been arranged. 6d. extra is paid by the sender. Any further charge is collected from the addressee.

**AIR MAIL SERVICES** convey registered and unregistered, but not insured, correspondence (except parcels), provided it is fully prepaid. Packets may be posted in the usual manner, but must have "By Air Mail" prominently marked in top left-hand corner (preferably on special blue labels, obtained gratis from Head Post Offices or by writing to Secretary (Air Mails), G.P.O., London, E.C. 3). Fees are paid by postage stamps in top right-hand corner. Express delivery is obtained by further stamps (6d. per packet), the word "Express" being written just below "By Air Mail." Enquiry as to services, which change from time to time (and are liable to failure in bad weather), should be made at above addresses. The Summer Services for 1921 were as follows:—(1) *London—Paris*: 11.0 a.m. week-days, France, Switzerland, Italy, Spain and Portugal; Egypt, Palestine, Syria (exc. Wed. & Th., saving 1 or more days); India and the East (Fri. only, saving 1 week); Australia (some Frids., saving up to 14 days). Fee, 2d. per oz. (2) *London—Brussels*: 8.15 a.m. week-days, Belgium. Fee, 4d. per oz. (3) *London—Amsterdam*: 8.15 a.m. week-days, Holland, N. and Central Germany, Sweden, Finland (saving up to 24 hours). Fee, 4½d. per oz. (4) *Rotterdam—Bremen, Hamburg, Copenhagen* (for Denmark, Sweden, Finland) and *Berlin* (for other E. Baltic countries, and E. and Central Germany) saving about 1 day: 5.30 p.m. week-days. Fee, 4½d. per oz. (5) *Toulouse—Narbonne*: 6.30 a.m., Tu., Wed., Fri.: 6.0 a.m., Sun., Morocco (saving 1 or 2 days). Packets must be marked "par Avion de Toulouse" immediately under the "Air Mail." Fee, 1 oz., 6d.; 3½ oz., 1½d.; and 6d. each further 2½ oz. up to maximum, 1½ oz., 3s. 1½d.

## MONEY AND POSTAL ORDERS.

The Chief Money Order Office is at Manor Gardens, Holloway, N. 7.

**ADVANCE OF PAYMENT:** 2d. for inland, 2½d. for foreign and colonial orders (to certain countries).

## Inland Ordinary Money Orders.

The poundage charged is, for sums not exceeding £3, 4d.; £10, 6d.; £20, 8d.; £30, 10d.; £40 (maximum), 1s. No order may contain a fractional part of 1d. The rules and regulations are on the forms issued. *No poundage is charged for M.O. in payment of many Customs, Excise and Inland Revenues (including Income Tax) if the official "notice to pay" is produced, or of Savings Certificates.*

## General Regulations: Foreign and Colonial Post.

**REGISTRATION** (except of parcels) is in force to almost all countries. Fee, 3d. Compensation up to 50 francs is paid in the case of entire avoidable loss while in the custody of a country in the Postal Union (see p. 412), if claimed within a year.

**INSURANCE** (including, except for parcels, **REGISTRATION**) may be effected on packets to many countries at the following rates:—5d. for £15; and 2d. for every additional £15 up to £110. **COMPENSATION** up to £1 is also given on *uninsured* parcels to or from Egypt, Newfoundland, India and the smaller colonies, with many larger foreign countries, except U.S.A. A certificate of posting is produced. Only securities, bank notes, etc., properly packed, and sealed

\* See Morocco, India\*, under Imperial British Rates.

**Inland Telegraph Money Orders.**

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams.

Poundage at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of 2d., and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for postage must be prepaid.

**Postal Orders.**

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week-days. They are also issued and paid in almost all parts of the Empire, in Egypt, and at the British Agencies in China (p. 416, note f), and Morocco, except Babat. They are paid (but not issued) at 53 Canadian offices, and paid in Australia only when issued to soldiers. They are issued, with a counterfoil to be retained by the sender, for every 6d. up to 20s., and for 21s.; cost: 6d. to 2s. 6d., 1d.; 2s. to 15s., 1½d.; 15s. 6d. upward, 2d. The name of payee must be inserted. They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Adhesive British Postage Stamps (not perforated, and not exceeding 3 in number) may (except for Canada) be affixed to the face of an order, to increase its value by 1. 2, 3 or 4 pence.

**Ordinary Money Orders Abroad.**

Orders payable in British Dominions, Colonies, Protectorates, and Postal Agencies, or in Belgium, France, Italy, Japan, Portugal, Rumania, and most of their colonies, 3d. every £1 or fraction; elsewhere, 4d. every £1. Limits of amount, £20-£40.

**Telegraph Money Orders Abroad.**

Only to some colonies and foreign countries, e.g., to Canada and U.S.A. (also New Zealand and Union of South Africa, certain towns only), but not Australia. Poundage at same rate as for Ordinary Money Orders abroad, plus cost of official Telegram of Advice (at deferred rate if desired, in British Possessions only), plus supplementary fee of 6d. for foreign countries, Canada and Newfoundland, for other British Possessions, 1s.

**TELEGRAMS.****Inland.**

Telegrams may be handed in at a telegraph office, or, if prepaid, posted or handed to a rural postman. Rate throughout British Isles, 12 words or less 1s., each further word 1d.; the address, which may be telephonic, is charged for; payment in stamps affixed to the form by the sender. Original, redirected, or reply telegrams handed in on *Sundays*, and (except in Scotland) *Good Friday*, or *Christmas Day* are charged 6d. extra. Replies may be prepaid up to 40 words; the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1d. Certified copy 6d., sometimes more. The charge includes delivery within three miles of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6d. per

mile, calculated from the free delivery limit, to be paid by sender. Telegram forms are issued gratis. Usual hours 9 a.m. to 7 p.m. Larger Offices 8 a.m. to 7 p.m. (see below and p. 417). For Sunday and Holiday telegrams, see above, below, and p. 417.

**LATE FEES.**—A telegram may usually be got through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1s. for the telegraphist, 1s. for the messenger, and 6d. an hour for the telegraphist if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster, 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

**COUNTING.** &c.—Plain language, i.e., Latin or any modern European language, is charged for according to the number of words; all other words or unintelligible combinations of letters are charged one word per 3 letters. The following count one word:—(1) All names of towns and villages in U.K. (not of branches or sub-offices or districts in towns, unless in addition to street name); (2) all names of all ways and coastward stations (not in towns) with public telegraph; (3) words ordinarily written as one or with hyphen, including "couldn't," etc.; (4) Names with prefix "St.," "De," "De la," "O," "Mac," but not hyphenated surnames; (5) each five figures; (6) each initial, except London Postal Districts (p. 418) a.m.—p.m.—m.m.s. (in address), which are one word each group; (7) signs of punctuation, etc.

**NIGHT TELEGRAPH LETTERS** in plain language, for delivery by first morning post, may be sent before midnight between towns whose *Head Telegraph Offices* are open always (see below), at 1s. for 20 words or less, and 1d. per 3 words beyond 20.

## SUNDAY AND HOLIDAY ARRANGEMENTS.

On SUNDAY throughout the U.K. no Parcel Post, Money and Postal Order, or Savings Bank business is transacted, nor is there now any delivery whatever of letters, etc., except by Express Service (4) and (5) below. In London, all but 27 post offices are closed. These open in the morning, 21 of them (including those on pp 265-6, also in evening (stamps, telegrams). About 67 stations, chiefly 8 off the Thames, send telegrams, mostly at train times (see also p. xxi). Express (SUNDAY) DELIVERY (Service 4) is available only in and to London and a few Head Offices in the Provinces. The offices marked *x* on p. 415, together with the following in London, complete the list: E.C.O., S. and S.W. District Offices, among Branch Offices: Camberwell Green, Clapham Common, Hammermith Broadway, Holloway, Stratford, and Swiss Cottage. Parcels (other than parcels) are accepted up to time of posting for general Saturday night mails; fee 1*s.*, besides postage and usual express fees (calculated in London from G.P.O.—*6d.* to 5*s.*, 6*d.*). Express DELIVERY (Service 5) of a message dictated by telephone to an express delivery office (30 words for each express fee, besides the usual telephone charge), available on week-days generally, is on Sundays restricted to the London Postal District.

There is no general collection until between 10 p.m. and midnight, nor any "late fee" despatch of letters; but subject to a special fee of 1*s.* in addition to ordinary postage, letters are accepted up to 5.30 p.m., at the London offices open for Service 4 above, for Express DELIVERY to the provincial Head Offices there referred to, but not elsewhere. Outside London all Head Offices and most Country telegraphic Sub-offices open from 8.30-10 a.m. for stamps, telegrams (Scotland 9-10 a.m.). Many railway stations send telegrams at train times. Express Delivery (Service 4) only and Despatch are available in and to a few chief towns only (see above under In London).

CHRISTMAS DAY AND GOOD FRIDAY.—In London there is one morning delivery of letters, parcels, etc. When Christmas Day falls on a Sunday, parcels and express letters only are distributed. Offices open on Sundays are usually opened on these days also for the same kind of business, but in some cases for shorter hours. Outside London, in Scotland business is as on week-days; in England and Ireland there is one delivery of letters and parcels. Offices open as Sundays.

BANK HOLIDAYS.—London: One morning delivery of letters and parcels. Collection of letters, evening (from Head District and Branch Offices only) and late (general); of parcels, morning only. G.P.O. and Head District Offices (pp 265-6) open for all business except Savings Bank, Old Age Pensions, and non-telegraphic Money Order business. Outside London: In Scotland, business is generally as usual. In England and Ireland only one letter and parcel delivery, and generally one despatch, no Savings Bank, ordinary Money Order, or Pension business is transacted. Smaller offices are closed; the more important open in morning (Postal orders), some also in evening. Telegraph offices nearly all open 10.30 a.m. to noon and generally at the same hours, if any, as on Sunday evenings.

PUBLIC HOLIDAYS in Scotland: Telegraph as usual, other business as English Bank Holidays. One delivery only on Local Holidays and Ecclesiastical Fast Days. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., etc., and hours as on Sundays.

*Gifts made by deceased during his life for public or charitable purposes, are charged, unless made more than twelve months before death; other gifts are charged, unless made more than three years before death; gifts made in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts not exceeding £100 in value or amount also excepted.*

*Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.*

*Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30s. and 50s., and are exempt from all other death duties.*

*Interest at 4 per cent. per annum is also payable on the Estate Duty on personalty from the date of the death up to that of delivery of the affidavit or account.*

*The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 3 per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.*

## TELEPHONE CHARGES IN THE LONDON AREA.

### I. EXCHANGE LINES.

|  | Quarterly Payments. |
|--|---------------------|
| (1) (a) Exclusive Line to premises within a radius of two miles from any Exchange      | 2 2 6               |
| (b) Auxiliary Line to the same premises  | 1 17 6              |
| (a) Private Branch Exchanges—  |                     |
| (a) 1st Exchange Line to premises within a radius of two miles from any Exchange       | 2 2 6               |
| (b) Each additional Exchange Line to the same premises                                 | 1 17 6              |
| (3) Local Calls, i.e. Exchanges within a circle of ten miles radius from Oxford Circus | 0 0 1½              |

Calls to Exchanges outside these limits will be subject to the appropriate tariff for trunk calls in addition to the ordinary fee of 1½d. each, except that calls between Exchanges both of which are more than five miles, but not more than ten miles from the centre, will be charged either on the direct distance between the Exchanges or on the sum of the distances to the nearest points on the five mile circle, whichever is the less.

When a Subscriber makes more than 2,000 effective local calls a year a discount of 5 per cent. will be allowed on the fees for local calls in excess of 2,000.

### II. SUPPLEMENTAL SERVICES.

(1) Extra mileage charge. Where the distance of the Subscriber's premises from the Exchange, measured radially, exceeds two miles.

For each furlong (220 yards) or part thereof 0 6 3 |

Quarterly Payments.

### (a) Extension Lines—

|   |        |
|---|--------|
| (a) For each Extension Line in the same building not exceeding 110 yards in length. |        |
| (i) with intercommunication facilities  | 0 11 3 |
| (ii) without intercommunication facilities  | 0 7 6  |
| (b) For each additional 110 yards or less   | 0 3 9  |
| (c) For each Extension Line connecting separate buildings                           |        |
| (i) not more than 440 yards apart   | 1 3 9  |
| (ii) from 441 to 660 yards apart  | 1 10 0 |
| (iii) from 661 to 880 yards apart   | 1 16 3 |

The rental for an external extension exceeding 880 yards in length is calculated specially and may be ascertained on application.

### III. TRUNK CALLS, i.e. calls not covered by the Local Message fee.

The charges are by distance, varying from 1½d. for 7½ miles to 3d. 6d. for 150 miles, and 1s. for each additional 50 miles or part thereof; these charges are in addition to the local fee (which will be included in the trunk fee account) and will be based on the distance, measured radially, between the Exchanges with which the Subscriber originating the call and the called Subscriber are connected, except that for long distance calls to or from Exchanges within the inner London five mile circle, the distance will be measured from Oxford Circus in all cases where it exceeds 30 miles.

In addition to the above fees a special charge of 2s. per message will be made for day calls between Great Britain and Ireland, and 6d. for each night call.

## BIRTHS.

WHEN a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this regulation will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees, amounting to ten shillings. In *Scotland*, after the lapse of three months, it can only be registered on the authority of the Sheriff of the County. No birth occurring in *England* and *Wales* can be registered after the lapse of seven years from the date thereof. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

## [BRITISH NATIONALITY.]

The following is an abstract of the British Nationality and Status of Aliens Act, 1914, which consolidated and amended the common law and the statute law previously existing on the subject of British Nationality and Naturalization:—

**BRITISH NATIONALITY.**—The following are British subjects:—

1. Every person born, of whatever parentage, within His Majesty's Dominions and allegiance.

2. Every person born out of His Majesty's Dominions whose father was born within His Majesty's Dominions, and had not, at the time of the child's birth, lost the British nationality

so acquired. As to the children of naturalized British subjects, see below at (7).

3. Every person born out of His Majesty's Dominions, before Jan. 1, 1905, whose father's father was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

4. Every person born on board a British ship.

5. Every person to whom a Certificate of Naturalization under the Naturalization Act, 1870, or the British Nationality and Status of Aliens Act, 1914, or of Re-Admission to British Nationality has been granted, or who has acquired British nationality by special Act of Parliament or by conquest or annexation.

6. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

7. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions:—

(a) in the case of a child born before January 1st, 1905,

(i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1905, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1905, and his name is included therein.

(b) in the case of a child born after January 1, 1905,

(i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or

(ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1905, and his name is included therein.

**LOSS OF BRITISH NATIONALITY.**—A British subject loses his British nationality:—

(a) if by any voluntary or formal act he becomes naturalized in a foreign country;

(b) if, in certain cases, he makes a declaration of allegiance. These cases are:—

(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship and is also by birth or becomes during minority a subject of any foreign State,

(ii) where a person is a British subject, but was born out of His Majesty's Dominions, and

(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that State who has been naturalized as a British subject may divest himself of that status;

(c) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality;

(d) in the case of a woman, if she marries an alien;

(N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)

(e) in the case of a person to whom a Certificate of Naturalization is granted after January 1, 1915, if the Secretary of State revokes the Certificate;

(f) if the territory of which he is an inhabitant is severed from the Crown; *cf.*, e.g., the cases of the inhabitants of Hanover and Heligoland.

**ACQUISITION OF BRITISH NATIONALITY.**—An alien may acquire British nationality:—

(a) by special Act of Parliament;

(b) by the conquest, annexation, or cession of the territory of which he is an inhabitant;

(c) in the case of a woman, by marriage with a British subject, and

(d) by naturalization.

**Naturalization.**—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after Jan. 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

(a) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year immediately preceding the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;

(b) be of good character and have an adequate knowledge of the English language; and

(c) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization may be obtained free on application to the Home Office, Whitehall, London, S.W.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £3, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on

submission of the application is not returnable, whether or not a Certificate is granted.

**N.B.**—*In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.*

**STATUS OF ALIENS.**—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate lingue*, but are triable in the same manner as if they were natural-born subjects.

**UNDESIRABLE ALIENS.**—An undesirable alien—e.g., one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be “undesirable” within the meaning of the Aliens Act, 1905. His Majesty may by Order in Council impose further restrictions on aliens (*see* Aliens Restriction Act, 1914 as extended and amended 1919).

## BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp. 414-415 of the 1916 “WHITAKER.”

## CERTIFICATES

### OF BIRTHS, MARRIAGES, OR DEATHS.

**England and Wales.**—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3s. 7d., viz., 1s. for search, 2s. 6d. for the certificate, and 1s. for the stamp affixed thereto. They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1866, Birth or Death, 1s.; Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6d.; Savings Banks Act, 1887, Birth, Death, or Marriage, 1s.; National Insurance Acts, 1911 and 1913, Birth, 6d., Marriage, 1s.; Industrial Assurance Companies Act, 1866, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 1s., but only from the local Registrar.

**English Registers.**—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the *Society of Genealogists* at 5 Bloomsbury Square, London, W.C. 1.

**Scottish Registers of Births, Marriages, and Deaths.**—Parish registers were instituted for these in 1552, but until the Registration of Births, &c. (Scotland) Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of

ss. 12. for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1919 are now in his possession. There is a general index to the registers which may be searched on payment of ss. A search of the index of a particular parish is 1s. A fee of 20s. is payable for a search of all the Scottish registers, and 1s. is payable for a search of a particular parish. An extract of an entry may be obtained on payment of ss. 12. The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

### COPYRIGHT.

The law of copyright is contained in the Copyright Act, 1911, which repeals all the earlier acts. It should be stated that no registration of copyright at Stationers Hall is now necessary; copyright arises from mere authorship. The provisions of the Copyright Act, 1911, were explained on pp. 415-416 of the 1911 "WHITAKER."

### DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have *three days of grace* allowed; thus, a bill dated 3 Jan. at two months' date is not due until March 4. If a bill or note is payable by instalments to be paid "punctually," this does not exclude the days of grace (*Schaverien v. Morris*, 37 T.L.R. 366). There is, however, no such extension in the case of bills drawn at sight, or on demand, and these must be paid on presentation. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

### DEATHS.

*In England and Wales.*—When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in at-

tendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. Failure to obtain this certificate need not, however, delay the funeral, as it is the duty of the clergyman, if the certificate is not produced to him at the burial, to notify the Registrar thereof within seven days. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended during his last illness by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees amounting to ten shillings.

*In Scotland*, the rules of registration are similar, but (1) the death must be registered within 8 days; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, etc. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

**CORONERS' INQUESTS.**—Sudden deaths are supposed by the law to demand inquiry, and Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Coroners do not intrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a witness is bound to attend, or renders himself

liable to be fined in any sum not exceeding *£50*, the fine for defaulting *jurymen* being *£5*.

In Scotland there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see* p. 530). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public enquiry is held before the Sheriff and a jury.

### DIVORCE.

*Preliminary.*—Matrimonial suits may be conveniently divided into three classes, viz. (1) those in which a declaration against marriage is sought; (2) those in which the marriage is sought to be upheld; and (3) those in which, the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, or if one of the parties was insane; but it is only voidable if one of the parties was under the age of consent (14 in the case of males and 12 in the case of females). Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion (as to the significance of which see paragraph (6) *infra*); and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce.*—The third class of suit mentioned in paragraph (1) *supra* includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful) dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

*Divorce.*—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under ecclesiastical law, *e.g.*, cruelty, adultery, and unnatural offences; (2) those which are offences by statute, *e.g.*, incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case

he may obtain damages from the adulterer. If a wife seeks divorce it is not sufficient that she prove mere adultery. It must be coupled with desertion or cruelty. But a wife can obtain divorce if the husband has been guilty merely of incestuous adultery, or bigamy with adultery, or of rape or certain other criminal offences. "Cruelty" is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty to wilfully and recklessly communicate a venereal disease; and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief. To prove a charge of adultery the evidence of the wife or husband must be corroborated either by a witness or at least by strong surrounding circumstances especially where a respondent has made admissions. Even if the co-respondent has confessed, the Court will have to be satisfied that there is no ground for suspicion.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights; but now desertion without cause may enable the deserted spouse to obtain a decree of judicial separation. If coupled with adultery, it enables a wife to obtain a divorce.

*When the decree will be refused.*—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation, *i.e.* complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation (*Crocker v. Crocker* (1921), P. 15). There are also certain discretionary bars, *as, e.g.* where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

*Intervention by King's Proctor.*—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *visi* is made absolute, the King's Proctor may intervene to show cause against making a decree absolute.

*Decree Absolute.*—Every decree of dissolution or nullity is in the first instance a decree *nisi*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again; but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

*Children.*—When a suit has been commenced, the children should not be removed from the

person in whose custody they are *de facto*. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

**Alimony.**—A wife may in any cause file a petition for alimony (i.e., means of support) pending suit, provided *prima facie* evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one-fifth of the joint incomes is generally allowed. An order for permanent alimony may be obtained by a wife who has obtained a final decree of judicial separation.

**Protection Orders.**—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

**Costs.**—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date; and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

#### SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced, unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

#### SUMMARY JURISDICTION.

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, and by such cruelty or neglect has caused her to leave him, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the

husband may be ordered to pay a weekly sum not exceeding £s. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an infirmary home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation; and if, having obtained an order, she commits adultery, the order may be discharged. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

#### DIVORCE STATISTICS.

##### England and Wales.

The number of matrimonial suits in the High Court of Justice of England and Wales during the seven years 1913-1919 is shown below:—

| Year.     | Poor Persons. | Other Suits. | Total. |
|-----------|---------------|--------------|--------|
| 1913..... | —             | 1,867        | 1,867  |
| 1914..... | 88            | 1,860        | 1,948  |

#### DIVORCE FOR THE POOR.

**England and Wales.**—A special department in the High Court of Justice for the assistance of poor persons in litigation, including divorce, was established in 1914. The official name of the department is "London Prescribed Officers (Poor Persons)."

Under the procedure of this department, Solicitor and Counsel are provided for a litigant who is not possessed of the means to employ legal assistance.

Although no fees are payable for the help given by the department, the applicants must find the solicitor's out-of-pocket expenses, and those incidental to witnesses—a point which has been criticised by the adherents of divorce law reform. However, if witnesses are not brought from a long distance, the whole proceedings need not cost more than £20, and can in some cases be completed for less, compared with from £50 to £60 necessitated by the normal procedure. Before a case is taken up, the applicant has to satisfy the department that he or she is really poor—not possessed of more than £50, exclusive of wearing apparel and

trade tools. If this condition is fulfilled, and if he has reasonable grounds for bringing or defending a suit in the Divorce Court, he may apply to the Court for leave to do so. An application for leave is submitted to and is reported on by counsel and solicitor, who give their services voluntarily. If the report is favourable the Court may give the necessary leave, and thereupon another solicitor and counsel are assigned to the poor person to act for him. Such a litigant is not liable for Court fees, nor (generally) is he liable to pay costs to any other party. Counsel acting for him must charge him no fee, while the solicitor assigned to him generally gets nothing but his out-of-pocket expenses. Where, however, property of value is recovered for such litigant, the solicitor may (under the rules) get his usual costs. Numbers of persons take advantage of this procedure *in forma pauperis*. This explains the very large number of cases in the Divorce Court.

*Scotland*.—In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poor's Roll" is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed, and each application depends on its own circumstances. The Poor's Roll was established in 1434.

### THE FRANCHISE.

The Representation of the People Act, 1928, abolishes the voting qualifications of property owners, freemen, and lodgers, but extends the franchise to women, subject to certain limitations. To be entitled to be registered as Parliamentary or as Local Government electors, the following conditions are now required:—

#### PARLIAMENTARY.

**MEN**.—21 years of age. Residence only, for the qualifying six months in any one constituency or in any contiguous constituency or county. The occupation of land or premises of £10 annual value, for business purposes, for the same period.

A man of full age who has received a degree at any university forming, or part of, a constituency, is entitled to be registered as a voter for that constituency. Honorary degrees do no qualify.

**WOMEN**.—30 years of age, must be entitled to be registered as a Local Government elector for the occupation of land or premises of £5 yearly value, or of a dwelling house, or is the wife of a husband who is entitled to be so registered.

A woman is entitled to be registered as a parliamentary voter for a university constituency if she is of the required age, and has been admitted to a degree, or has passed the final examination and followed the conditions required of a woman by such university which did not at the time the examination was passed admit women to degrees.

#### LOCAL GOVERNMENT.

**MEN**.—21 years of age. Must have occupied for the qualifying six months, as owner or

tenant, any land or premises in a local government electoral area. A person who occupies rooms as a lodger is entitled, provided the rooms are let unfurnished.

**WOMEN**.—21 years of age. Is entitled to be registered as a local government elector where the conditions of her occupation of property would entitle her if she were a man.

Thirty years of age where she is the wife of a man who is entitled to be so registered in respect of premises in which they both reside.

#### REGISTRATION.

The qualifying periods (at present fixed by Order in Council) are for six months ending 15 Dec. for the Spring Register, and 15 June for the Autumn Register. It is the duty of the Registration Officer (in counties, the clerk to the county council; in boroughs, the town clerk) to compile the Spring and Autumn Registers containing the names of all persons entitled to vote. For this purpose instructions may be issued to the overseers of parishes, who cause house-to-house enquiries to be made to ascertain the names of all qualified voters. A householder's return may be issued, and the failure of the householder to give the required information renders such person liable to a penalty of £50. The prepared lists are publicly exhibited by the Registration Officer, together with a notice specifying the mode in which, and the time within which, claim and objections are to be made. Subsequently the Registration Officer shall make all necessary corrections of the electors' lists, and carry out all that is required to form those lists into a register, with a separate index letter and a separate series of numbers for each polling district.

#### ILLEGITIMACY.

*England and Wales*.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. By the Act which came into force on Jan. 1, 1919, the putative father may be ordered to pay 20s. a week, instead of 5s. as hitherto. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enconcinate* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enconcinate* renders the employer liable to an action.

*Scotland*.—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually is in the Sheriff Court. The father pays half of the inflying expenses, the amount usually decreed being £2 ss. The rate of aliment varies, but in 1919 it was settled by a decision of the Court of Session that £11 12s.

per annum was a proper amount. The mother has the custody of the child until the age of 7 if a male and so if a female.

An illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

### INFECTIOUS DISEASES.

**PRECAUTIONS NECESSARY TO BE OBSERVED.**—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rags, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40s.; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £50, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907, the Local Government Board (i.e. the Ministry of Health), since the passage of the Ministry of Health Act, 1909 has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Dairywomen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has

conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

### NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the January 1, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets *ss. 6d.* for every case in his private practice and *rs. 10* for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers: typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, röteln or German measles, whooping cough, chicken-pox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1891, are similar to those now extended to the rest of the country.

### JURY SERVICE.

**Preliminary.**—The juries with which the public are most concerned are, first and foremost, the grand juries; secondly, those which are summoned to try cases in the High Court, at assizes and county courts; and thirdly, those summoned to try criminal cases at assizes, the

Old Bailey, and courts of Quarter Sessions, and to assist at coroners' inquests.

**Qualifications.**—All natural-born subjects of the King and aliens domiciled for ten years or more, being men or women between 21 and 60, are liable to serve as jurors.

Although women could not formerly serve, the sex disqualification was removed in 1919, and women are now liable to serve, subject to this, that a judge may make an order that the jury shall be composed of men only or of women only, or may, on an application made by a woman to be exempted from service on a jury in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried, grant such exemption.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100; a resident in a county or borough owning £10 a year in real estate or rent charge, or £20 in leaseholds; or a householder in a county or borough assessed to the poor rate at not less than £30 a year in Middlesex and the County of London, or £20 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

**Exemptions and Disqualifications.**—Aliens (subject as above), felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries, while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of protestant dissenters and Jews, whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs' officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents, etc., of lunatic asylums, doctors and chemists (if actually practising), dentists, officers and men in Army, Navy, and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

**Grand Juries.**—The function of the grand jury is to make presentments on oath to judicial bodies or personages, mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *prima facie* case against the accused, against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill"; if not, they "ignore the bill" and the accused is discharged. During and as a consequence of the War, the employment of grand juries was suspended, but they will presently be revived.

**Lunacy Juries.**—A jury is sometimes summoned by the judge in lunacy to enquire whether a man is or is not of sound mind.

**Juries in Criminal and Civil cases.**—An accused person against whom a true bill has been found is tried by a "jury sworn." A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England*, Vol. 28, p. 246). In a criminal case the prisoner has a right of challenge which is of two kinds—a challenge to the array—i.e.,

the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, i.e., to individual jurors, which may be peremptory or for cause. Peremptory challenge, or challenge without cause, exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. "Challenge for cause" sometimes takes on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, e.g., for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous, except that in civil cases the parties may agree to take a majority verdict.

**Special Juries.**—Special Jurors are selected from persons having larger property qualifications, e.g., the occupier of dwelling house in a large town rated at not less than £100. Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

**Payment of Jurors.**—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 2s. on each cause tried in the High Court or a County Court; and on Circuit, 8d. In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners, the jurors are entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £10, while non-appearance at a county court may involve a fine of £5.

**Coroners' Juries.**—A coroner who has decided to hold an inquest must summon a jury to inquire into the cause of death. This absolute duty, however, was suspended during the War and for six months thereafter by an Act passed in 1918. As the War came officially to an end on September 1, 1918, it is presumed that after March 1, 1922, all inquests will have to be held before juries. A coroner's jury may be fined £5 for non-attendance. Broadly speaking, any "good and lawful" man or woman may be summoned on a coroner's jury. Although there is no age limit fixed by statute, the custom is to summon only persons of full age. Not less than twelve must be summoned, and at least twelve must agree on a verdict.

## MARRIAGES.

### BY Banns OR LICENCE.

**Banns of Marriage.**—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. The law is now chiefly contained in

the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force (see also 5 & 7 Will. IV. c. 83, and 1 Vict. c. 23). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage may be null and void (*Midgeley v. Wood*, 4 Sw. & Tr. 259). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 83, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the Ecclesiastical parish of the church in which the marriage is to take place.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 353). The Act of 1833 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her

adultery, but must allow another clergyman of the diocese to perform the service.

*Marriage with a deceased wife's sister*—including a sister of half blood—was legalised in 1907. No clergyman, however, can be compelled to solemnize such a marriage, but he can allow his church to be used for the purpose by another minister.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 1d. Searches in the register-books may be made on payment of small fees, viz., 1s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5s. to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

### MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knight-riding Street, Doctors' Commons, E.C., are available for London and all England and Wales; those procured at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 1), are available for London and all England and Wales, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10s. 6d. *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15s. to £2 2s. 6d. By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of such parties hath had his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

### SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Arch-

bishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knight Rider Street, Doctors Commons, E.C. 1 (tel., 6634 Central). Fees for licence stamp, &c., £55.

#### BEFORE A REGISTRAR AND IN NON-CONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

#### NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

#### NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

#### ISSUE OF CERTIFICATE (WITHOUT LICENCE) FOR MARRIAGE.

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

#### ISSUE OF CERTIFICATE AND LICENCE FOR MARRIAGE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

#### DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

##### (1) Marriage by Certificate.—

- a. If both parties live in the same district:—The certificate of the Superintendent Registrar of that district.
- b. If they live in different districts:—A certificate from the Superintendent Registrar of each district.

##### (2) Marriage by Licence.—The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

#### PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but there are exceptions, as follows:—

a. Section 14 of 19 & 20 Vict. cap. 119, provides that, if the usual place of worship of either of the parties is outside the district of his or her residence, the marriage may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given.

b. The Act 3 and 4 Vict. cap. 75, provides that, if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, the marriage may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Guillet v. Guillet*, 27 T.L.R. 416).

#### MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows:—“I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.”; and each of the parties must say to the other, “I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband].” A wedding-ring may be, and is generally, used at a marriage at a register office.

#### MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an “authorised person” (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a

marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained.

The parties must at some time during the ceremony make the following declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D."

Also each of the parties must say to the other:—

"I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]"; or, in lieu thereof:—

"I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

Rules and Regulations relating to this Act were published in October, 1909. (See *Statutory Rules and Orders*, 1909, No. 1332.)

#### NAVAL MARRIAGES ACT, 1908.

This Act, which came into force on January 1, 1909, was framed with the object of relieving sailors of the Royal Navy of the difficulties under which they laboured as regards fulfilling the necessary residential qualification for the purpose of marriage.

It provides that any officer, seaman, or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

#### FEES.

Exclusive of the fee for a certificate of the marriage (marriage lines), the total fees for a marriage by certificate, when the parties live in the same district, amount to 7s. ; if they live in different districts, to 9s.

For a marriage by licence the total fees are 10s. and 6d.

#### MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act, 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Marriage with a deceased wife's sister was rendered legal by the Deceased Wife's Sister Act, 1907. The marriage of a woman with her deceased husband's brother is still illegal, and the Act forbids the marriage of a man with the sister of his divorced wife during the wife's lifetime.

#### MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

#### MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed June 27, 1892; came into force Jan. 1, 1893. Order in Council dated Nov. 22, 1913, whereby previous Orders are repealed and regulations for marriages under the Act are laid down.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1862. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

- (a) That both the parties are British subjects; or,
- (b) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,
- (c) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,
- (d) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

- (a) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,
- (b) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or,
- (c) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the above-named Act.

It is necessary for one of the parties to the intended marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (a) in the United Kingdom, or (b) in a Colony or India (a) notice must be given in like manner as if the party so resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (b) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the

district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (a) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (b) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

- (a) That he or she believes that there is no impediment
- (b) That both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of August 18, 1862, and are payable to His Majesty's Government:—

|   |         |
|---|---------|
| For receiving notice of an intended marriage.....   | £ s. d. |
| For receiving notice of a caveat.....   | 0 10 0  |
| For every marriage solemnized by or in the presence of a Marriage Officer and registered by him ..... | 1 0 0   |

For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place..... £ s. d. 0 5 0

For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same..... 1 0 0

Marriages may be solemnized 8 a.m. to 3 p.m.

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid v. Braid*, 1909, 25 T.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

#### MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF 1906. — Under the *Marriage with Foreigners Act, 1906*, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (re *Green Noyes v. Pitkin*, 1909, 25 T.L.R. 222).

#### MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 24

years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (a) banns or (b) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. In the case of one of the parties residing in England or Ireland a certificate of the proclamation of banns in the parish church of the residence of that party is accepted. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2s. 6d. A certificate of proclamation of banns is only valid for three months.

Under the *Marriage Notices (Scotland) Act 1878* a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate; fee, 2s. 6d. Such certificate of publication is only valid for three months. Under the *Naval Marriages Act 1908* banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the *Marriage Notices (Scotland) Act* already referred to may also be filled up and the officer commanding the ship may grant a certificate.

*Irregular Marriages* are survivals of modes of marriage which were general throughout Europe in mediæval times, Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de presenti*); (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, *subsequente copula*); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*), i.e., the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 96. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5s. 1d. The other two forms of marriage before

they are held to be valid must be decreed by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that if one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

#### PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and must be accompanied by two copies of a photograph of the applicant, one copy being duly certified. Applications should be handed in personally at "The Passport Office, 1, Lake Buildings, St. James's Park, London, S.W. 1." but if the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 7s. 6d., made payable to the Passport Office, should in that case accompany the application. *Postage stamps will not be received in payment.* Applications should, if possible, reach the Passport Office not less than seven days before that on which the Passport is to be issued. The charge for a Passport is 7s. 6d. Passports are issued between the hours of 10 and 4 (Saturdays, 10 to 1), except on Sundays and Public Holidays, when the Passport Office is closed.

Foreign Office Passports are granted (1) to natural-born British subjects, viz., persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 23 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

Passports are granted (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary Public*, resident in the United Kingdom; the applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers; (2) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned; and in the case of

natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a naturalised British subject, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply personally for their Passports at the Foreign Office; if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, for delivery to the applicant. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

Foreign Office Passports are not available beyond two years from the date of issue. They may be renewed for four further periods of two years each, after which fresh Passports must be obtained. The fee for each renewal is 2s.

A Passport cannot be issued on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate. Passports must not be sent out of the United Kingdom by post.

#### PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10s. or less ..  $\frac{1}{2}$ d.  
On goods pledged for more than 10s. .... 1d.  
For INTEREST on pledges not exceeding 40s., for every 2s. or part of 2s., per month.....  $\frac{1}{2}$ d.  
And after the first month any time not exceeding 14 days to be charged as half a month.  
On pledges exceeding 40s., for every half-crown or part of half a crown, per month  $\frac{1}{2}$ d.

FORFEITURE.—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10s., if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawnbroker may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawnbroker, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—i.e., the loan and profit and 2s per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawnbroker should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one halfpenny; when the loan is above 5s., one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawnier in respect of a

pledge on which the pawnbroker makes a loan of above 40s., provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10s.

### RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

### RENT RESTRICTION

#### AND OTHER MODIFICATIONS OF THE LAW OF LANDLORD AND TENANT.

The Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, was dealt with on pp. 427-428 of the 1921 edition of "WHITAKER."

### STREETS AND FOOTPATHS.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pall, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

### VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it, have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with

glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions. [See also Vaccination Order, 1907.]

### WILLS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—e.g., the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforeseen (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases

are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

**TESTATOR OR TESTATRIX.**—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

**ESTATE.**—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

**RESIDUARY LEGATEES.**—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

**TO BEGIN A WILL.**—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

**TO END A WILL.**—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said — sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this — day of —, 19—."

**EXECUTION OF A WILL.**—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

**ATTESTING EXECUTION.**—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator or testatrix, as the case may be, in the presence of us, both present at the same time who in his (or her) presence and in the presence of each other have hereunto set our names as witnesses.

THOMAS SMITH  
[Signature of  
Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

**CODICIL.**—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

**EXECUTORS.**—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

**APPOINTMENT OF TRUSTEES.**—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. See PUBLIC TRUSTEE, post.

**TRUSTS OF THE WILL.**—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or

any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life (or during her widowhood), and after her death (or second marriage, which first happens) upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

**TESTAMENTARY CAPACITY.**—A minor cannot make a will. A married woman (married since January 1, 1863) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (1)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

**REVOCATION.**—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

**LAPSED LEGACIES.**—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

**TO ONE PERSON ABSOLUTELY.**—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

**TO CHILDREN UNDER AGE.**—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1866, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

**ALL PROPERTY TO BE INVESTED.**—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

**DUTIES OF EXECUTORS.**—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1864, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1867, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

**ADMINISTRATORS.**—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

#### WHERE TO FIND A PROVED WILL.

To find a will proved before 1st January, 1868, the date on which the Court of Probate Act, 1867 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1868 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1868 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the

former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Probate Registries were enumerated on p. 431 of the 1922 "WHITAKER."

#### SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of living persons at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vic. c. 77; but the provision has been almost a dead-letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. (See also PUBLIC TRUSTEE, post.)

#### PROBATE OF WILLS.

##### OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail under "Estate Duty."

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries" (q.v.) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £500, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

*Scotland.*—"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

#### SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s. 8d. sterling). A will may be either (1) *holograph*, i.e., written by the testator himself, in which case no witnesses are necessary; (2) *tested*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

#### TRUST FUNDS AND INVESTMENTS.

The Act of 1893 enacts that Trustees may invest in any Parliamentary Stocks or Government Securities of the United Kingdom: on real or heritable Securities in Great Britain or Ireland: in Bank of England Stock: Bank of

**Indian Stock:** India  $\frac{1}{2}$  per cent. and  $\frac{3}{4}$  per cent. stocks; any Stock hereafter issued by authority of Parliament charged on revenues of India: any Securities having interest guaranteed by Parliament: Metropolitan Board of Works or London County Council Stocks: Debenture Stock created by Metropolitan Police District Receiver: Debenture, Rent-charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any railway or canal Stock in Great Britain or Ireland leased for 100 years or more at a fixed rental to any railway specified above: Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council: "B" Annuities, Eastern Bengal, East Indian, and Kinde, Punjab, and Delhi Railway, "C" and "D" Annuities of the East Indian Railway, and any like annuities of any other railway hereafter created: any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council: any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than 5 per cent. per annum on Ordinary Stock for each of the 10 years preceding date of investment: any Corporation Stock of any borough having 50,000 inhabitants: any County Council Stock authorised by Act of Parliament or Provisional Order: any Water Stocks issued by Incorporated Commissioners levying compulsory rates over areas containing 50,000 inhabitants, such rates not having exceeded 80 per cent. of authorised amount for 10 years: and in any Securities authorised by order of the High Courts of Justice of England or Ireland. Provided Stocks redeemable within 15 years are not purchased at a premium over the redemption price, or at more than 15 per cent. premium over such redemption price if redeemable after 15 years.

**The Rule of the Supreme Court, 1883,** authorises investment in:—Debenture, Preference, Guaranteed, or Rent-charge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares, and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Debentures or Nominal Debenture Stock under the Local Loans Act, 1875, or under the Isle of Man Loans Act, 1880, provided such Stocks are not liable to redemption within fifteen years from the date of investment.

**The Trusts Amendment Act, 1884 (Scotland only),** excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks; admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

**The Colonial Stock Act, 1900,** permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United Kingdom which the Treasury publishes a list of in the London and Edinburgh Gazettes, but subject to the clause as to Redeemable Stocks in the Trustee Act, 1893.

#### THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1905) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement,

whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1912, was £166,164,702.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or—the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of investment.

The Public Trustee is not, as such, limited in his powers of investment to trustee securities, but, like a private trustee, he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts.

The progress of the Department may doubtless be ascribed to the wide public need for such an office; secondly, to the State guarantee which accompanies the remedy provided; and thirdly, to the endeavour which is made to keep the administration upon personal lines. The Public Trustee makes a point of giving the personal attention of himself or of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to produce an annual amount sufficient to discharge the salaries and other expenses of the Department and no more. A profit is not intended. Owing to the increase in general administrative expenses, and to the shrinkage of the capital values and the net income upon which the fees were assessed, it has been necessary to revise the scale prevailing since 1912. An important Committee of Investigation, presided over by Sir George Murray, G.C.S., was appointed by the Lord Chancellor in April, 1912, to inquire into the organisation of the Office and any alteration which might be required in the scale of fees.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time by letter or telephone.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C.2 (tel., Holborn 2,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester. (For list of Officers, see p. 267.)

## SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. *All charges (except scale and certain County Court matters) are now subject to an increase of 33½ per cent.*

*Scotland.*—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory." When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

## MEDICAL FEES.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

| GENERAL PRACTITIONERS.                          | RENTALS.                              |                 |                 |
|---|---------------------------------------|-----------------|-----------------|
|   | £50 to £75.                           | £75 to £100.    | £100 to £200.   |
| Ordinary Visit .....                            | 2s. to 7s. 6d.                        | 1s. to 20s. 6d. | 7s. 6d. to 12s. |
| Night Visits .....                              | Double an ordinary visit.             |                 |                 |
| Mileage beyond two miles from Home .....        | 2s. 6d.                               | 3s.             | 4s.             |
| Detection per 1 hour .....                      | 2s. to 7s. 6d.                        | 5s. to 10s. 6d. | 7s. 6d. to 12s. |
| Letters of Advice .....                         | Same charge as for an ordinary visit. |                 |                 |
| Attendance on accidents .....                   | 2s.                                   | 5s.             | 10s. to 7s. 6d. |
| Midwifery .....                                 | 12s.                                  | 15 to 25        | 25 to 40        |
| Administering Children .....                    | 2s.                                   | 2s. 6d.         | 3s.             |
| CONSULTANTS.                                    |                                       |                 |                 |
| Advice or Visit alone .....                     | 5s.                                   | 5s.             | 5s.             |
| Advice or Visit with another Practitioner ..... | 15s.                                  | 15 to 20s.      | 15 to 20s.      |
| Mileage beyond two miles from Home .....        | 2s.                                   | 2s.             | 2s.             |

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in for consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

## ACCOUNTANTS' CHARGES.

For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, £1 1s. to £5 5s.

Chief clerk's time, 20s. 6d. to £1 12s. 6d.

Other clerks' time, per day of seven hours, 7s. 6d. to 12s.

These charges to include stationery, except the forms used.

When accountants are elected auditors of a Joint Stock Company by its shareholders the fee is usually mentioned in the resolution.

## ARCHITECTS.

*Fees on New Works.*—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(a) If the contract or order exceeds £5,000 the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £5,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £5,000 as the special character of such works may render appropriate.

*Alterations and Additions.*—A percentage not exceeding twice the amount due for new works of the same cost.

*Fittings, Decorations, &c.*—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

**Omitted Works.**—In addition to the percentage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

**Partial Services.**—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows:—

(a) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such works.

(b) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works.

**Installments.**—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

**Work Executed with Old Materials, &c.**—In all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

**Services Not Included in Percentage.**—The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved:—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in

connection with fire, flood, or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

**Housing Schemes and Laying Out Estates.**—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

**Approval of Lessee's Plans.**—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease when required, the charge is as follows:—

For each £100 or part of £100 of the total cost up to £500, 2½ per cent. (minimum fee, £3 3s.).

For each £100 or part of £100 from £500 to £5,000, 1½ per cent.

For each £100 or part of £100 above £5,000, 1 guinea per cent.

**Litigation and Arbitration.**—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

**Land Surveying and Levelling.**—For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause 21.

**Sanitary Surveys.**—For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause 21, the minimum fee being £3 3s., in addition to the cost of assistance and appliances.

**Expenses.**—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

#### QUANTITY SURVEYORS.

A fee of 2½ per cent. upon the amount of the lowest tender received for the contemplated building, or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

**FOR MEASURING AND ADJUSTING VARIATIONS** the fees are 2½ per cent. on the amount of additions, and 1½ per cent. on the amount of omissions brought into account.

**FOR SERVICES IN CONNECTION WITH LITIGATION OR ARBITRATION**, a charge per day (dependent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing, lithography, and ~~for~~ copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fee.

#### CONSULTING ENGINEERS.

On **Constructional Work** the payment is usually an agreed fee or a commission (which includes the necessary drawings, &c.) of 5 per cent. on the cost of the works where the contract exceeds £5,000 and 7½ to 20 per cent. where the amount does not exceed £5,000.

For **Quantities and Accounts** (the services which in architectural work would not be

covered by the architect's fee but would be Quantity Surveyor's work) the usual charge is  $\frac{1}{4}$  to a per cent. where the amount exceeds £5,000 and 2 to  $\frac{1}{2}$  per cent. on amounts below £5,000.

## AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

### 1. Sales by Auction.

*Freehold, Leasehold, and Copyhold Properties*, including the preparation of particulars, and advising as to reserves:—On the first £300, 5 per cent.; on the next £4,700,  $\frac{1}{2}$  per cent.; on the residue,  $\frac{1}{4}$  per cent.

In addition to the above charges:—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right* under the conditions of sale, in addition to the purchase-money of the property:—5 per cent. on £500, and  $\frac{1}{2}$  per cent. on residue, to include inventory and valuation.

### Sale before Auction.

After issue of advertisements, the same scale as by auction.

### Non-Sale.

Charge equivalent to one-fourth of the commission which would have been earned on a sale up to £3,000 calculated on the reserve price, to include valuation for reserves; on larger amounts by arrangement.

### Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

*Furniture, Trade Stocks, and Chattels*.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

*Plant and Machinery*.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

*Lives and Dead Farming Stock (except Horses and Pedigree Cattle)*.— $\frac{1}{2}$  per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

*Horses and Pedigree Cattle*.—5 per cent. on the amount realised.

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor.—One half the commission on sale, calculated on the amount of reserve or buying-in price.

### 2. Private Treaty Sales.

*Freehold and Copyhold Estates and Houses, and Ground Leases*.—On the first £300, 5 per cent.; on the next £4,700,  $\frac{1}{2}$  per cent.; on the residue,  $\frac{1}{4}$  per cent.; and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, of 5 per cent. up to £500, and  $\frac{1}{2}$  per cent. on the residue, to include inventory and valuation.

### 3. Purchases.

*Freehold, Copyhold, or Leasehold Property*.—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged: one guinea per cent. on first £1,000; half a guinea on next £9,000; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5s.

### 4. Lettings.

*Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise*.—If the annual value be £200 or less 5 per cent. on one year's rent, where the term is for one year or less, and  $\frac{1}{2}$  per cent. on one year's rent where the term is for more than one year. If the annual value be over £200 the above scale shall apply to the first £200 and on the excess rental over that amount, where the term is for three years or less, 5 per cent. on one year's rent; where the term is for more than three years,  $\frac{1}{2}$  per cent. on one year's rent; in the case of *repairing leases* the commission is 10 per cent. on one year's rent. Upon the premium or consideration (in all cases), 5 per cent. up to £1,000, and  $\frac{1}{2}$  per cent. on the residue; and the commission on any sum obtained for fixtures, furniture, or effects of any kind, of 5 per cent. up to £500, and  $\frac{1}{2}$  per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell, is let by him, and the tenant afterwards purchases, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.—5 per cent. on the first year's rental, and  $\frac{1}{2}$  per cent. for the remainder of the term.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses.

On Letting Land on Building Lease.—One year's ground rent on first £50; three quarters ditto on next £50; half ditto on next £500; quarter ditto on residue.

### 5. Collections or Receivables.

10 per cent. upon gross rental of weekly property; 5 per cent. upon gross rental of other property or tithes;  $\frac{1}{2}$  per cent. upon the gross rental for the management and collection of rents on agricultural estates;  $\frac{1}{4}$  to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

### 6. Laying Out or Development of Estates.

For Road Construction, 5 per cent. upon the outlay, exclusive of expenses.

### 7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties*.—A guinea per cent. on the first £1,000; half a guinea per cent. on the next £9,000; and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers*.—The charge is on Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3. *Valuing for Annual Rental*.—(a) *Agricultural Property*.— $\frac{1}{2}$  guinea per cent. up to £500, 5 guineas per cent. on the next £500, and  $\frac{1}{2}$  guinea per cent. beyond. (b) *Urban and Residential Property*.—5 guineas per cent. up to £100, and  $\frac{1}{2}$  guinea per cent. beyond. Minimum fee 3 guineas.

4. Valuation of Furniture, Pictures, and Effects.—5 per cent. up to £500, and 2½ per cent. on the residue.

5. Valuation of Plant, Machinery, and Trade Stocks.—5 per cent. on first £500, and 2½ per cent. on the residue.

6. Valuation of Live and Dead Farming Stock.—5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue.

7. Valuation of Hotel and Public House Fixture, Fittings, and Stock.—5 guineas per cent. up to £1,000, and £3 3s. per cent. on the residue.

8. Valuation for Probate and Estate Duty Purposes.—(a) Freehold, Copyhold, and Leasehold Property.—One guinea per cent. on the first £1,000, half a guinea per cent. on the next £4,000, and one quarter-guinea per cent. on the remainder. Minimum fee, £5 5s. on each property.

(b) Of Furniture and Effects.—5 guineas per cent. on the first £500, and 2½ guineas per cent. on the next £500, and 1½ guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9. Valuations under the Finance (1909-10) Act,

1910. For Survey, Completion of Government Returns, Valuation, and Report.

Country Residential Properties, Agricultural Land, and Undeveloped Land.—One half-guinea per cent. up to a "total value" of £20,000, and one quarter-guinea per cent. on the balance above that amount.

Urban Properties.—One quarter-guinea per cent. on a "total value" of £20,000, and one-eighth guinea per cent. on the balance above that amount. Minimum fee, £3 3s.

10. Preparing Specification of Dilapidations and settling the amount if required.—5 guineas per cent. on the amount. Minimum fee, £5 5s.

11. Valuation or Sale of Timber.—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue.

12. Valuation of Tenant-Right.—5 guineas per cent. on the first £100, and 2½ guineas per cent. on the next £500, and 1½ guineas per cent. on the residue.

Where one valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916.66, or 22 carats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17s 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d. During 1921, the market price of gold has been above these figures.

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, 500; 12 troy ounces of silver are coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 12 oz. 10 dwt. (958.33), is practically obsolete. It is occasionally used, however, for high-class plate.]

On account of the high price of precious metals, the melting of British gold and silver coin is prohibited, as well as their export. The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—1911, 24½d.; 1912, 26½d.; 1913, 27½d.; 1914, 25½d.; 1915, 23½d.; 1916, 31½d.; 1917, 40½d.; 1918, 47½d.; 1919, 57½d.; 1920, 61½d. On Oct. 27, 1921, the price of silver was 40d. per oz.

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number and decimal fraction and then multiply by 1.296; to express a United States price on the English system, multiply the cents by 0.4566.

† Bronze is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

† It may be noted that the legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois. Further, the halfpenny is one inch in diameter.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £50.

Light Gold.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

Treasury Notes of the value of £1 and 10s. are issued, and are legal tender to any amount.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn; they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches.

Legal Tender of Money.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, and Treasury notes are legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

British Coinage Statistics.—During 1920 the number of coins struck at the Royal Mint was 262,072,104, of which 258,361,954 were Imperial and 3,710,150 Colonial.

## BRITISH EMPIRE ABROAD.

Imperial Sterling Coins are the sole legal metallic currency in:—

NEW ZEALAND.  
UNION OF SOUTH AFRICA AND SOUTH AFRICA  
GENERALLY.  
FALKLAND ISLANDS.  
Fiji.  
GIBRALTAR.  
ST. HELENA.  
WEST INDIES.

Special Coins are current in addition to the Imperial series in:—

AUSTRALIAN COMMONWEALTH.—Special florins, shillings, sixpences, and threepences in silver, and pence and halfpence in bronze, of the same weights and composition as Imperial coins of these denominations, but of special designs.

BRITISH GUIANA.—A special groat or fourpence.

GUERNSEY.—Eight doubles (= 1 penny), 4s, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY.—Special pence, halfpence, and farthings.

MALTA.—One-third of a farthing.  
BRITISH WEST AFRICA.—Silver and also "alloy metal," 2s., 1s., 6d., and 3d., one penny, one halfpenny, and one-tenth penny (nickel-bronze).

In many cases silver coins are reduced in fineness, in others coins in low value metals are substituted, as a consequence of the War.

\* The par value and rate of exchange of Foreign Monies and Sterling at certain dates in 1921 are shown on p. 487.

**Mint Marks.**—The designs adopted for gold coins are identically the same in the Mints of London, Sydney, Melbourne, and Perth, with minute "Mint Marks" immediately above the date on the reverse side—the letter S (Sydney), M (Melbourne), P (Perth), C (Ottawa, Canada), and I (Bombay, India); otherwise, all Imperial gold coins are of identical design.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for the United Kingdom, basing them upon the Standard Yard and the Standard Pound, in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

#### Apothecaries' Weight.

##### Measures of Weight.

60 grains = 1 scruple (91) (= 1'256 Grammes).  
3 scruples = 1 drachm (31) (= 3'888 Grammes).  
8 drachms = 1 ounce (= 31'1035 Grammes)

##### Measures of Capacity

60 minims (min.) = 1 fluid drachm (= 3'552 Millilitres).  
8 fluid drachms = 1 fluid ounce (= 1'84123 Centilitres).  
20 fluid ounces = 1 pint (= 0'568 Litre).  
8 pints = 1 GALLON (= 4'545631 Litres).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' drachm is not the same as the Avoirdupois dram, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437.5 grains). A fluid drachm (54.6875 grains) is equal in weight to two Avoirdupois drams.

##### Approximate Equivalents.—

1 sovereign = 8 drachms; 1 half-crown = 3½ drams; 1 florin = 3 drams; 1 shilling = 1½ drams; 1 3d. piece = ⅓ dram; 1 "table-spoon" = ⅔ fluid oz.; 1 "dessert-spoon" = ⅓ fluid oz.; 1 "tea-spoon" = ⅙ fluid oz.

#### Avoirdupois Weight.

7000 grains (gr.) = 1 pound (lb.).  
16 drams (dr.) = 1 ounce (oz.) (= 28'350 Grammes).  
16 ounces = 1 POUND (= 0'4539943 Kilogram).  
14 pounds = 1 stone\* (= 6'350 Kilograms).  
28 pounds = 1 quarter (of a cwt.) (= 12'70 Kilograms).  
100 pounds = 1 cental (= 45'35943 Kilograms).  
4 quarters (112 lb.) = 1 hundredweight (cwt.) (= 50'8022 Kilograms).  
20 hundredweight (2,240 lb.) = 1 ton (= 1'016 Tonnes or 1'016 Kilograms).

#### Troy Weight.

64 grains = 1 pennyweight (dwt.) (= 1'555 Grammes).  
20 dwt. = 1 ounce (= 31'1035 Grammes).  
For gold and silver the ounce, divided decimally, and not into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, of 480 Avoirdupois grains (31'1035 Grammes) in weight. There is no Troy POUND.

#### Jewellers' Weight.

The metric carat of 200 milligrammes is the legal standard of weight for precious stones and pearls.

\* The Smithfield stone (for dead meat) is 1 lb. only

#### Measures of Capacity.

4 gills = 1 pint (= 0'568 Litre).  
2 pints = 1 quart (= 1'136 Litres).  
4 quarts = 1 GALLON (= 4'545631 Litres).  
2 gallons = 1 peck (= 9'0912 Litres).  
8 gallons = 1 bushel (= 3'637 Dekalitres).  
8 bushels = 1 quarter (= 2'909 Hectolitres).  
A chaldron is 36 bushels = 4½ quarters.

#### Measures of Length.

12 inches (in.) = 1 foot (ft.) (= 0'30480 Metre).  
3 feet = 1 yard (yd.) (= 0'914399 Metre).  
6 feet = 1 fathom (= 1'8288 Metres).  
5½ yards = 1 pole (= 5'0492 Metres).  
22 yards = 1 chain (= 20'1168 Metres).  
220 yards = 1 furlong (= 201'168 Metres).  
8 furlongs = 1 mile (= 1'6093 Kilometres).  
3 miles = 1 league ( seldom used ).  
100 links = 1 chain (22 yards)  
10 chains = 1 furlong.  
8 furlongs = 1 mile.

A Pole of 5½ yards is a quarter of a chain.  
A Cricket Pitch is 22 yards (one chain) between the stumps

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single)

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

#### Birmingham Gauge.

The Weights and Measures Act of 1878 made standards on and after Nov. 1, 1914, certain new divisions of an inch. The equivalent of an inch is 15'0 B.G. The numbers proceed by units down to 1'0 B.G., which = 0'3964 inch, and from 1 B.G. (3533 inch) by units to 52 B.G. (0'0095 inch).

#### Square or Surface Measure.

144 sq. inches = 1 sq. foot (= 0'3093 Sq. Decimetres).  
9 sq. feet = 1 sq. yard (= 0'836126 Sq. Metre).  
30¼ sq. yards = 1 perch, or rod, or pole (= 25'293 Sq. Metres).  
40 perches = 1 rood (= 10'117 Area).  
4 roods (4840 sq. yards) = 1 acre (= 0'40468 Hectare).  
10 square chains = 1 acre.  
640 acres = 1 square mile (= 2'58995 Sq. Kilometres)

Note.—The Anglo-Saxon acre's length is the furlong, and the acre's breadth the chain

#### Cubic Measure.

1,728 cubic inches = 1 cubic foot (= 0'028317 Cubic metres).  
27 cubic feet = 1 cubic yard (= 0'764553 Cubic metre).

#### Angular or Circular Measure.

60 seconds (") = 1 minute (').  
60 minutes = 1 degree (°).  
30 degrees = 1 sign.  
90 degrees = 1 right angle or quadrant.  
12 signs (4 quadrants) = 1 circumference.  
Diameter of circle × 3'1416 = circumference.  
Diameter squared × 7854 = area of circle.  
Diameter squared × 3'1416 = surface of sphere.  
Diameter cubed × 5236 = solidity of sphere.  
One degree of circumference × 57'3 = radius.  
Diameter of cylinder × 3'1416; product by length or height, gives the surface.  
Diameter squared × 7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

## Miscellaneous Weights and Measures.

| Tar (Barrel) = 26½ gallons.                |
| Tea (Chest) = 84 lb.                       |
| Tobacco (Hogshead) = 12 to 18 cwt.         |
| Turpentine (Barrel) = 224 to 280 lb.       |
| Wood (Cord) = 128 cubic feet.              |
| Wool (Sack) = 364 lb.                      |

## Wheat, Corn, and Flour.

Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned :-

|                         |                 |
|-------------------------|-----------------|
| Wheat, English, 60 lb.  | Foreign, 62 lb. |
| Barley, English, 56 lb. | French, 52½ lb. |
| Mediterranean, 50 lb.   |                 |

|                       |                        |
|-----------------------|------------------------|
| Oats, English, 39 lb. | Foreign, 38 and 40 lb. |
| Rye and Malze, 60 lb. | Buckwheat, 52 lb.      |

Under the Corn Sales Act of 1892 the Corn Returns Act of 1892 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

|                                       |
|---------------------------------------|
| 220 lb. wheat produces 70 lb. flour.  |
| 220 lb. flour produces 130 lb. bread. |

A quatern loaf = 4 lb.

A last of grain = 80 bushels.

NOTE.—A Quarter is a heaped measure of 8 bushels. A bushel of English wheat is reckoned as 60 lb. weight, and a Quarter as 480 lb.

## Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.

Truss of New Hay (10 September 1st), 60 lb.

Load of hay or straw = 36 trusses

Ton of hay = 36 trusses.

An acre of grass should yield 1 to 2 tons of hay.

## Sizes of Barrels and Bottles.

|   | Gals.        |
|---|--------------|
| Firkin or Quarter Barrel.....                       | 9 = 9 × 1    |
| Kilderkin, Rundlet, or ½ Barrel                     | 18 = 9 × 2   |
| Barrel .....  | 36 = 9 × 4   |
| Hogshead (1½ barrels) .....                         | 54 = 9 × 6   |
| Punchoon (2 barrels) .....                          | 72 = 9 × 8   |
| Butt of Ale (3 barrels) .....                       | 108 = 9 × 12 |
| An Ater = 10 gallons; a Tierce = 42 gallons;        |              |
| a Pipe of Port or Madeira = 112 gals.; Teneriffe    |              |
| = 100 gals.; Marsala = 93 gals.; Madeira and        |              |
| Cape = 92 gals.; Sherry and Tent = 108 gals.;       |              |
| Butt of Lisbon and Bucellas = 117 gals.; Aum        |              |
| 1 Hock and Rhenish = 30 gals.; Hogshead of          |              |
| Brandy, 60 gals.; Claret, 46; Port, 57; Sherry, 54; |              |
| Madiera, 46 gallons; Punchoon of Brandy or          |              |
| Rum = 120 gals.                                     |              |

Bottles.—The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26½ fluid ounces.

In the drug trade two large bottles are used :-

Corbyn..... = 40 fluid oz. (quart).

Winchester quart = 80 „ (½ gallon).

## Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good :-

|   |                   |
|---|-------------------|
| Cubic inch.....                                 | = 252.458 grains. |
| Gallon (277.274 cub. in.) = 10 lb. (distilled). |                   |
| Cubic foot .....                                | = 62.321 lb.      |
| 35.943 cubic ft. (224 gals.) = 1 ton.           |                   |

Water for Ships: Tun, 252 gals., Butt 120, Punchoon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt. 2 qrs. 21.6 lb. in addition to its own weight.

## Railway Gauges.

In Great Britain = 4 ft. 8½ in.

„ Ireland = 5 ft. 3 in.

„ U.S.A. = 4 ft. 8½ in.

The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungary, Italy, Switzerland, Sweden and European Turkey.

„ Australia :-

N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in.

Victoria and South Australia = 5 ft. 3 in.

Queensland and Western Australia = 3 ft. 6 in.

„ New Zealand = 3 ft. 6 in.

„ India = 2 ft. 6 in.; 3 ft. 3½ in. and 5 ft. 6 in.

„ South Africa = 3 ft. 6 in.

„ Egypt = 4 ft. 8½ and 3 ft. 6 in.

„ Ceylon = 5 ft. 6 in.

„ Japan = 3 ft. 6 in.

„ Russia = 5 ft. 6 in.

„ Spain and Portugal = 5 ft. 6 in.

„ Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in gauge requires 12 ft. of roadway; a double track requires 23 ft. of roadway.

## Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of the units has been fixed by international agreement. The principal units are as follow. —

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to  $10^9$  units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice,  $14.4521$  grammes in mass, of a constant cross-sectional area, and of a length of  $106.3$  centimetres.

As a unit of current, the international *Ampere*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of  $0.001118$  of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampere, and which is represented sufficiently well for practical use by  $1.101$  of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of  $15^\circ \text{C}$ , and prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampere in one second.

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is  $10^7$  units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampere in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals  $3,600$  joules.

As the unit of power, the *Watt*, which is  $10^7$  units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second.  $746$  watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is  $1,000$  watt-hours, or  $3,600,000$  joules, or  $1\frac{1}{3}$  horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampere per second.

## Builders' Measurements.

Stock or kiln bricks ...  $8\frac{1}{4}$  inches  $\times$   $4\frac{1}{2}$   $\times$   $3\frac{1}{4}$   
 Welsh fire-bricks ... 9 "  $\times$   $4\frac{1}{2}$   $\times$   $3\frac{1}{4}$

 A rod of Brickwork  $16\frac{1}{2}$  feet  $\times$   $16\frac{1}{2}$  feet  $\times$   $1\frac{1}{2}$  brick thick =  $306$  cubic feet or  $11\frac{1}{2}$  cubic

yards, and contains about  $4,500$  bricks with about  $75$  cubic feet of mortar. The rod being 5 British metres, a rod of brickwork is 25 square metres  $1\frac{1}{2}$  bricks thick = very nearly 10 cubic metres.

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A Piece of Wall Paper is 12 yd. long  $\times$  21 in. wide (English), and 9 yd.  $\times$  18 in. (French).

## Timber and Wood.

100 superficial feet = 1 square of flooring.

50 cubic feet of planks = 1 load.

42 do. timber = 1 shipping ton.

108 do. do. = 1 stack.

128 do. do. = 1 cord.

A standard hundred of deals contains 120 pieces. The Petrograd standard consists of 165 cubic feet, or 120 pieces  $1\frac{1}{2}$  in.  $\times$  11 in.  $\times$  12 ft., or 120 pieces 3 in.  $\times$  11 in.  $\times$  6 ft.

A Batten is not more than 7 inches wide; a Deal not more than 9 inches; Planks are 2 to 4 inches thick, and 10 inches and up in width.

To find the weight of a cubic foot, multiply 62.325 lb. by the specific gravity. To find the number of cubic feet in one ton, divide 35.943 by the specific gravity.

## Weight of Cubic Foot and Cubic Yard.

A cubic foot of fresh water = 62½ lb.; salt water 63½ lb. Timber—ash 49 lb.; beech 43 lb.; birch 49 lb.; cork 15 lb.; elm 36 lb.; pine 41 lb.; oak 59 lb. A cubic foot of clay weighs 125 lb.; of loose earth 95 lb.

A cubic yard of anthracite coal, solid, weighs 2,160 lb.; bituminous 2,025 lb.; cannon 1,400 lb. A cubic yard of compressed hay = 225 lb.; of hay in stack, 126 lb.; of compressed straw, 125 lb.; of straw in stack, 90 lb.; of grain, 20 bushels.

## Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1906, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½ imperial gallons, or *Quarter Cran* of 9½ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 124; 10 Hundred = 1 Thousand, 1,200; 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 62½ imperial gallons, or in half-barrels of 13½ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Herring Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 100 lb.; a barrel of anchovies = 30 lb.; a "box of fish" is about 90 lb.

## Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England).

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,065 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,086½ feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 20 cables, which are assumed to be 120 fathoms, or 600 feet.

The *Polar diameter* of the Earth is 7,926 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

NOTE.—The normal temperature of the human body is 98°6' F., or 36° C., or 28°8' R. Freezing point = 32° F. = 0° C. = 32° R.; Boiling point = 212° F. = 100° C. = 80° R. Let F = Number of degrees Fahrenheit, C = Number of degrees Centigrade, and R = Number of degrees Réaumur, then—

$$F = C + R + 32$$

$$C = \frac{F - 32}{1.8}$$

$$R = \frac{F - 32}{2}$$

**Nautical Measures.**

6 feet = 1 fathom.

100 fathoms = 1 cable length.

10 cables = 1 nautical mile.

60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=184·87 metres), but it is strictly 606·97 feet (=185 metres). The conventional Nautical Mile is 60 cables, assumed at 6,080 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

**Ship Measurement.**

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the *Ton-register* used by all maritime nations, 100 English cubic feet.

*Gross tonnage* is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

*Net tonnage* is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

*Dead-weight tonnage*, or *carrying capacity*, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (q.v.).

*Displacement tonnage* is the number of tons of sea water displaced by a vessel when charged to the load water line (q.v.).

*Load water-line* is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

*Draught* is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

*Free Board* is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

**Bells and Watches on Board Ship.**

*Bells*.—Time is kept by means of a bell, which is struck every half hour, except at certain times towards the end of a watch, when the bell is struck 10 or 15 minutes before the expiration of the regular half hour, partly as a signal to the Commanding Officer that the watch is about to be changed, and partly as a signal to the Officer of the next watch to prepare for duty.

*Watches*.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon, and is thus divided:—

|                 |        |                     |
|-----------------|--------|---------------------|
| Afternoon Watch | ... .. | noon to 4 p.m.      |
| First Dog       | "      | 4 p.m. to 6 p.m.    |
| Second Dog      | "      | 6 p.m. to 8 p.m.    |
| First           | "      | 8 p.m. to midnight. |
| Middle          | "      | midnight to 4 a.m.  |
| Morning         | "      | 4 a.m. to 8 a.m.    |
| Forenoon        | "      | 8 a.m. to noon.     |

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

For TIME AT SEA see p. 95.

**Speed of Ships.**

The *Knot* is a measure of speed of ships; the expression "15 knots" indicates that the vessel in question is capable of steaming or sailing 15 nautical miles in one hour. The *Nautical Mile* is 6,080 feet (the *Statute Mile* being 5,280 feet and the *Geographical Mile* 6,076·8 feet). The following table shows the equivalents of 1 to 45 knots in land (statute) miles per hour:—

| Knots | Miles   | Knots | Miles   | Knots | Miles   |
|-------|---------|-------|---------|-------|---------|
| 1     | 1·1515  | 15    | 17·2727 | 29    | 33·3939 |

**Measures of Energy.**

In Physics the unit of force is the *dynes*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal* (the force that gives one pound a velocity of one foot per second. One *poundal* = 13,825·5 *dynes*).

*Horse power* is energy measured at 550 foot-pounds per second; an alternative unit is the *kilowatt* (1000 kilogram-meters per second) = 737·59 foot-pounds per second.

*Thermal Unit*.—The British thermal unit is the *Therm*, the amount of heat required to raise one pound of water one degree Fahrenheit. In gas heating the *therm* bears the relation of 17·6 to 44, i.e. the charge of 3s. 8d. per 1,000 cubic feet is rendered as 1s. 5·6d. per *therm*.

**Yarn Measures.**

*Cotton and Spun Silk Count*.—

Thread = 1½ yards.

Lea or Skein, skn. = 120 yards.

Hank, Ak. = 7 Skeins, or Leas = 840 yards.

Spindle, spdl. = 18 Hanks.

Counts = the number of Hanks in 1 lb.

Bundle Hanks, either of 5 lb. or 10 lb.

Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.

Bundles of Cotton are chiefly made up for export.

*Worsted Count*.—Wrap, 80 yards; Hank = 500 yards = 7 Wraps; Counts or Numbers are the number of hanks in 1 lb.

*Linen Count*.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

*Wool of England Count*.—The Hank is 300 yards, and the number of hanks in 1 lb. is the count of the yarn.

NOTE.—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams) "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

## Sizes of Type.

All Founders cast their type to one uniform height ("type high"), which is 1½ inch, though the letters may vary considerably in their breadth.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

*The Point System*.—The basic unit in American (and many British) type foundries is the "point" of 0.013837 inch (72 points to the inch), and the names of the various types in the point system are added in parentheses.

*Brilliant* (3½ point). A column the size of this in the *Almanack* if set in *Brilliant* would contain 124 lines, and about 7,500 letters.

*Printing* is the art of producing impressions from characters or figures.

*Diamond* (4½ point) is the next size; the column would contain 107 lines, and about 6,000 letters.

## METRIC WEIGHTS AND MEASURES.

Tables for the conversion of British and Metric Weights and Measures will be found on page 454, headed: "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in the United Kingdom in 1867.

In the Metric system, the standard of length is the Metre, the standard of weight is the Kilogram, and the standard of capacity is the Litre. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

For the sake of comparison, the equivalent value of the nearest British measure is given

## 1.—MEASURES OF LENGTH.

10 millimetres = 1 centimetre = 0.39370113 inch.

(mm) (cm)

10 centimetres = 1 decimetre = 3.9370113 inches.

(dm)

10 decimetres = 1 METRE (m) = 1.0936143 yards.

10 metres ... = 1 dekametre = 10.936143 yards.

(dam)

10 dekametres = 1 hectometre = 109.36143 yards.

(hm)

10 hectometres = 1 kilometre = 0.62137 mile.

(km)

A kilometre is approximately *nine eighths* of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

## 2.—MEASURES OF WEIGHT.

10 milligrams = 1 centigram = 0.15432 grains.

(mg) (cg)

10 centigrams = 1 decigram = 1.5432 "

(dg)

10 decigrams = 1 gramme = 15.4323 "

(gm)

10 grammes = 1 dekagram = 5.6438 drams.

(dag)

10 dekagrams = 1 hectogram = 3.5274 oz.

(hg)

10 hectograms = 1 KILOGRAM = 2.2046223 lb.

(kg)

10 kilograms = 1 myriagram = 22.046223 lb.

10 myriagrams = 1 quintal (q.) = 1.9584 cwt.

10 quintals ... = 1 tonne (t.) = 0.9842 ton.

## 3.—MEASURES OF CAPACITY.

10 millilitres = 1 centilitre = 0.0704 gill.

(ml.) (cl.)

10 centilitres = 1 decilitre (dl.) = 0.17598 pint.

10 decilitres = 1 LITRE (lit.) = 1.7598 pints.

10 litres ... = 1 dekalitre = 2.1997 gals.

(dal.)

10 dekalitres = 1 hectolitre = 2.7497 bushels.

(hl.)

## 4.—MEASURES OF LAND.

100 sq. metres = 1 are (a.) = 0.0088 rood.

100 ares ... = 1 hectare (ha.) = 2.4711 acres.

100 hectares = 1 sq. kilometre = 0.3861 sq. mile.

## NOTES.

1 hectolitre = 2.75 bushels.

1 dekalitre per hectare = 2.21 bushels per acre.

1 quintal = 3.67 bushels.

1 quintal per hectare ... = 2.49 bushels per acre.

1 franc a hectolitre ... = 3.67 a bushel (par).

1 " a quintal ... = { 4.35 a cental (par).

1 " a quintal ... = { 3.31 a quarter (par).

7 francs " (duty) ... = 100.64 a quarter (par).

## THE UNITED STATES.

The weights and measures are those of the United Kingdom, with the following differences:—

**Weight.**—In the short ton of 2,000 lb., the Cental of 100 lb. takes the place of the Cwt. in the long ton. There are two tons, therefore, the long ton of 2,240 lb., the short ton of 2,000 lb.

**Capacity.**—For grain, the old bushel of 2,150 43 cubic inches; its gallon = 268.8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the Imperial gallon and = 28.3178 grains of water. It is divided into 8 pints = 7.2697 grains of water = 16.6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455.6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

## BRITISH DEPENDENCIES.

## Channel Islands.

The weights and measures in use in the Channel Islands are those of the United Kingdom, the cental of 100 lb. being used as well as the cwt. of 112 lb. The Old Island Measures are as follows:—

|                              | Jersey.        | Guernsey.             |

## Egypt.

The Metric System of Weights and Measures and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their English equivalents, are as follows:—

|  |                   |
|--|-------------------|
| Length—  |                   |

## South Africa.

**Money, Weights, and Measures.**—The Metric System is compulsory in the case of chemists, and is permissible (along with British standard of weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure* Leaguer = about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity*: Muid = 3 bushels. The general surface measure is Morgen, equal to 2'1165408 acres; 1,000 Cape lineal feet are equal to 1,033 British imperial feet. The short ton of 2,000 lb. is used.

## FOREIGN WEIGHTS AND MEASURES.

The Metric System has been adopted by the whole of Europe (except the United Kingdom and Russia) and is *permissible* in all countries. In 1902 it was adopted in Japan, but the old weights and measures are permitted until otherwise determined.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £500, interest being reckoned at 4 per cent? Answer.—£1,294 years purchase, or £1,924.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £500 a year net, wishes to commute that for a present payment of interest being reckoned at 5 per cent. How much will he receive? Answer.—Looking at the Table of Expectation of Life (p. 21), it will be seen that the expectation for age 54 is about 27 years; and

from the above table an annuity certain for 27 years, interest at 5 per cent., is worth 21 7/10 years purchase. The present payment required would therefore be £1,297 approximately.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less £1, must be taken. Thus, for £1 at 4 per cent. for 25 years, take 250s. and deduct £1-4-15s.

## REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to Local Government Authorities, for housing, improvements, public buildings, schools, harbours, bridges, &c., to be repaid in a given number of years, the amounts returned including both repayment of capital and payment of interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1888, and examined by the actuary of the National Debt Office. It gives

the sums needed as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, 50, 60 and 80 years:—

| Years. | 5 per Ct. |    |    | 6 per Ct. |    |    | 6½ per Ct. |    |    |
|--------|-----------|----|----|-----------|----|----|------------|----|----|
| 10     | £         | s. | d. | £         | s. | d. | £          | s. | d. |
| 20     | 8         | 6  | 11 | 8         | 13 | 11 | 12         | 18 | 11 |
| 30     | 6         | 16 | 10 | 7         | 13 | 11 | 9          | 0  | 11 |
| 40     | 6         | 4  | 8  | 6         | 12 | 8  | 7          | 2  | 11 |
| 50     | 5         | 17 | 20 | 6         | 6  | 7  | 6          | 15 | 6  |
| 60     | 5         | 14 | 5  | 6         | 2  | 6  | 6          | 12 | 10 |
| 80     | 5         | 11 | 5  | 6         | 1  | 5  | 6          | 10 | 9  |

If the loan be for £1,000, each annual instalment as shown above must be multiplied by 10 if for £1,000, then by 20, and so on.

A "state of emergency" was at once proclaimed by Royal Proclamation, coal exports were prohibited, and consumption regulated. Effort to resume negotiations on April 6 failed because miners refused to restart pumping as preliminary to meeting owners, and upon threat of Triple Alliance to call general strike, Government called out reserves and formed Volunteer Defence Corps. On April 10 men's executive agreed to allow steps to be taken to save the mines, and negotiations were opened on following day. The conference broke down, but threatened strike action of Triple Alliance was postponed until the 15th. A few hours before the time fixed, railwaymen and transport workers cancelled the general strike because miners disavowed proposal made by their secretary, Mr. Frank Hodges, that temporary wage settlement should be discussed apart from question of national pool of profits to assist poorer districts. Miners' delegates, on April 22, rejected Government's offer involving grant of £10,000,000 to assist in tidying over period of depression and gradual and limited reduction of wages, and after further "conversations" new terms were rejected by 435,614 against 180,724. On June 27, however, owners and miners came to provisional agreement, and asked Government for financial help for temporary period. House of Commons sanctioned the grant of £10,000,000, and on the 28th terms were finally settled, and were endorsed by 232,820 to 105,762, miners returning to work on July 4 with few exceptions. ## THE TURF IN 1921.

(At the close of the Newmarket Second October Meeting.)

THE racing season was not allowed to run its usual course owing to the national strike of miners in the spring. After several meetings had been abandoned by order of the Government, including the Epsom Spring Meeting, executives were permitted to carry out their programmes on condition that no special railway facilities were provided for horses and the public. The abandonments included Newmarket, April 12, 13 and 14, while the second meeting was compressed into one day, April 29, when the Two Thousand and One Thousand Guineas were run.

As in the preceding year, the five classic races were won by five different horses as follows:—

Two Thousand Guineas, Craig an Eran; One Thousand Guineas, Battius; The Derby, Humorist; The Oaks, Love in Idleness; St. Leger, Polemarch.

Lord Astor's Craig an Eran, reputed the best colt of his age, was unluckily beaten a neck in the Derby by Humorist, whom he had defeated in the Two Thousand. He started an odds-on favourite for the St. Leger, but failed to get a place. The winner, Lord Londonderry's Polemarch, who started at 50 to 1, like Calligina, the previous year's winner, is sired by The Tetrarch.

Prices of bloodstock found a more normal level, the Sledmere yearlings at the Doncaster sales realising 8,000 guineas for seven colts and 29,500 guineas for nine fillies.

## CRICKET IN 1930-31.

UNDER the captaincy of Mr. J. W. H. T. Douglas (Essex), an M.C.C. team visited Australia and lost all the five Test matches as follows:—

Dec. 17, 1930.—At Sydney, Australia won by 377 runs.

Dec. 31, 1930.—At Melbourne, Australia won by innings and 91 runs.

Jan. 14, 1931.—At Adelaide, Australia won by 119 runs.

Feb. 11, 1931.—At Melbourne, Australia won by 8 wickets.

Feb. 25, 1931.—At Sydney, Australia won by 9 wickets.

An Australian team, under Mr. W. W. Armstrong, visited England, where the five Test matches resulted:—

May 28.—At Nottingham, Australia won by 10 wickets.

June 11.—At Lords, Australia won by 8 wickets.

July 2.—At Leeds, Australia won by 219 runs.

July 23.—At Manchester, a draw.

Aug. 13.—At Kennington Oval, a draw.

The visitors were undefeated till the last week of the tour, when they were beaten by very small margins by a scratch England XI, of amateurs at Eastbourne and by C. J. Thornton's XI at Scarborough. The team was very strong in all departments of the game. They played, in all, 38 matches, of which they won 22, drew 14, and lost 2.

## BILLIARDS IN 1921.

For the second year in succession there was a new Professional Billiards' Champion, T. Newman, who gained successive victories over Toshill, Falkiner and Rees, W. Smith, the 1920 champion, and M. Inman declined to play under the scheme drawn up by the controlling body, and the contest was therefore robbed of much of its interest.

PROFESSIONAL CHAMPIONSHIP.—In the final, Thomas Newman beat Thomas Rees by 5, 256 in 16,000 up.

AMATEUR CHAMPIONSHIP.—Mr. S. H. Fry beat J. Graham Symes by 405 in 3,000 up. An Australian, J. R. Hooper, made a good show in this event.

VICTORY TOURNAIMENT.—W. Smith won, but there were several defaults through illness, &c., including that of T. Newman, the new champion.

During the year, J. Peall, son of the old spot-stroke champion, W. J. Peall, came to the front, winning the 81 Duntan's Tournament and eight matches off the reel.

His first defeat came from a rising young player, Joseph Davies, of Chesterfield, who was in receipt of 1,000 in 8,000. Both these men will make their mark amongst the higher professionals.

BREAKS.—On Feb. 27, 1921, Falkiner made 670 with ivory balls. On May 6, 1920, T. Newman scored an all-round break of 1,002 with ivory balls, this being the largest apart from George Gray's (red ball) and anchor cannon "freak" efforts. T. Rees also made a break of 790. Best "spot" break (exhibition match), 3,394, by W. J. Peall, 1890; match for money, 2,021, by W. J. Peall, 1880. Best spot barred breaks, 1,356, by John Roberts, 1894, and 1,467, by T. Taylor, 1898. With competition balls the highest breaks are 1,298 (1921) and 1,000 off the reel, by George Gray, 1921, 1,002, by H. W. Stevenson (under B.C.C. Rules), Oct., 1921. Best breaks with ivory balls are 1,024, by George Gray (under B.C.C. Rules); 800, by H. W. Stevenson, Feb., 1920, recognised by B.A.; and last, made by John Roberts, in Scotland, in 1893. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 4,746. The highest freak break was 499, 126 by T. Rees with the anchor cannon in 1907.

to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa.

(b) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius, and Malta.

(c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, St. Vincent, Sierra Leone, Straits Settlements, Trinidad.

(d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Gibraltar, Labuan, and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King-Emperor. The protectorates of the British Empire include Egypt, Kenya, Somaliland, Nyasaland, Uganda, Tanganyika, Swaziland, and Nigeria.

(f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(g) *Mandatory Spheres*, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

**SELF-SUPPORT.**—With but few exceptions the Imperial Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Imperial Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Imperial Government, as such subjects are not directly represented in the Imperial House of Commons; this principle, "No taxation without representation," was the mainprinciple of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which has for many years been accepted in Great Britain, had become an accepted maxim of British Overseas administration.

**SELF-DEFENCE.**—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Imperial Government. Questions affecting the general

strategical defence of the Empire are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea and land forces of the Empire. In the War of 1914-1918 all the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved.

**THE IMPERIAL CONFERENCE.**—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Premiers of the various self-governing Dominions, representing their countries at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of the United Kingdom. In 1917 and 1918 the Conference was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of the United Kingdom, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference is as follows:—*President*, The Prime Minister of the United Kingdom; *Chairman* (in the absence of the President), The Secretary of State for the Colonies; *Members*, The Prime Ministers and other Ministers of Canada, Australia, New Zealand, Union of South Africa, and Newfoundland, the Secretary of State for India and other representatives of India; *Secretary*, Sir H. C. M. Lambert, K.C.M.G., C.B.; *Assistant do.*, C. T. Davis, C.M.G.; E. J. Harding, C.M.G.

**THE LEGISLATURE.**—The Parliament of the United Kingdom is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretary of State for the Colonies is a Cabinet Minister, his active participation in the government of the Imperial Dominions varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State. (See also "Self-Government" and "Imperial Conference," ante.)

**THE JUDICATURE.**—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (see p. 278) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for the United Kingdom is the House of Lords.

**EDUCATION.**—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities and University Colleges have been established and degrees are

conferred. Under the will of Cecil Rhodes scholarships were founded at various colleges of Oxford University. These *Rhodes Scholarships* are tenable for three years, are of the annual value of £300, and are open to scholars of each Province of Canada, of each State of Australia, of New Zealand, Newfoundland, Natal, Cape of Good Hope (4), Jamaica, and Bermuda. Each State of the U.S.A. has a similar nomination, and 15 scholarships, each of £300, were formerly in the nomination of the German Emperor, but this provision was rescinded by an Act of Parliament, and in 1902 the 15 scholarships in question were allocated to the Empire of India. *Organising Secretary, Rhodes Scholarship Trust, Geoffrey Dawson, M.A.*

**FINANCE.**—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the War of 1914-1918 the tariff of the United Kingdom was imposed without distinction on foreign and Imperial merchandise, but recent legislation foreshadowed a general change of fiscal policy. The tariffs of the self-governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. In the Civil Service Estimates for 1921-22 the following "Grants in Aid of Local Revenues" were included:—*Wei-hai-wei*, £8,000; *Somaland*, £100,000; *St. Helena*, £3,200; *Nyasaland*, £100,000; *Tanganyika*, £914,000; *Uganda*, £250,000; and *Cyprus* £30,000; in addition, the sum of £10,000 is set aside for Scientific Research in connexion with the Development of the Economic Resources of the Colonies and Protectorates.

**PRODUCTION.**—In 1913 the wheat crop of the world was about 452,200,000 quarters, of which 83,750,000 quarters were produced in the British Empire. India, Canada, Australia, the United Kingdom, and Egypt are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats and maize, and tea, coffee and rubber are largely cultivated. Cane sugar is produced in India (for local consumption), West Indies, Australasia, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in the United Kingdom exceeds that of every country except the U.S.A. Cotton is extensively grown in India (4,207,000 bales of 400 lb. in 1916-17), Egypt (632,000 bales), and its cultivation is increasing elsewhere—West Africa (11,500 bales in 1907), East Africa (30,700 bales), Sudan (23,000 bales), and West Indies (3,000 bales). Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Empire (particularly in the Malay peninsula), while more than half the world's supply of gold is drawn from South and South-West Africa and Australasia; it is produced also in Borneo, British East Africa, British Guiana, Canada, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. The gold supplied by the principal producing countries during the last thirty years is shown in the following table:—

| Period.   | Fine Ounces  |            |           |
|-----------|--------------|------------|-----------|
|           | Australasia. | Africa.    | Canada.   |
| 1891-95   | 9,059,505    | 7,240,835  | 276,632   |
| 1896-1900 | 15,947,275   | 13,101,508 | 3,482,339 |
| 1901-05   | 20,488,594   | 15,499,183 | 4,592,989 |
| 1906-10   | 17,769,547   | 39,008,836 | 2,430,605 |
| 1911-15   | 22,776,369   | 50,108,484 | 3,577,271 |
| 1916-20   | 7,560,724    | 49,160,253 | 3,902,682 |

Precious stones are found in various parts of the Empire, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India (8,500,000 barrels of 42 gallons in 1917), Trinidad (1,600,000 barrels), Egypt (1,000,000 barrels), and Canada (200,000 barrels) and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

**EXTERNAL TRADE.**—The total trade of the British Empire in 1920 was valued at £6,000,000,000 (Imports £3,100,000,000; Exports £2,900,000,000). The United Kingdom (Imports £2,000,000,000, Exports £1,670,000,000—Total £3,670,000,000), India (£437,000,000, exclusive of bullion and specie), Canada (£480,000,000), Australasia (£285,000,000), New Zealand (£24,000,000), South Africa (£103,000,000, exclusive of bullion and specie), and Egypt (£207,000,000) are the principal trading units of the Empire.

**SHIPPING.**—On June 30, 1921, there were 11,433 vessels (over 100 tons) flying the British flag, of which total 9,034 were registered in the United Kingdom, 615 in Australia and N.Z., 961 in Canada, 190 in India and Ceylon, and 633 in other parts of the Empire. These figures include 10,324 steam vessels of 21,588,606 tons (U.K., 8,579 vessels of 19,320,053 tons); and 1,109 sailing vessels of 428,192 tons (U.K., 455 vessels of 251,501 tons). In the War of 1914-1918 there were lost through enemy action 2,774 merchant vessels of 9,538,928 gross tonnage; of this total 2,197 (7,638,020 tons) were British, 230 (696,845 tons) French, 230 (742,365 tons) Italian, 29 (120,176 tons) Japanese, and 80 (321,522 tons) U.K.A.

**TOWNS.**—*Capital, London (England).* Population (1921), 4,483,249 (with suburbs, 7,476,168).

At the Census of 1921 there were in the British Empire 2 cities with over 1,000,000 inhabitants, 9 with 500,000 to 1,000,000 (*see p. 110*), and 24 others with over 100,000 inhabitants. Of these 97 cities 51 were in the United Kingdom (England 42, Wales 3, Scotland 4, Ireland 2), 29 in India, 4 in Canada, 4 in Australasia, 2 in Egypt, and 1 each in New Zealand, South Africa, Ceylon, Hong Kong, and the Straits Settlements.

**FLYING THE UNION JACK.**—In schools administered by the London County Council, where flagstaffs are provided, the Union Jack is flown from 8 a.m. until sunset on the following days:—*April 23.*—St. George's Day.

*May 6.*—Anniversary of the King's accession.

*May 24.*—Empire Day.

*May 26.*—The Queen's birthday.

*June 3.*—The King's Birthday.

*June 4.*—Do., Official celebration.

*June 23.*—The Prince of Wales's birthday.

*October 21.*—Anniversary of Trafalgar.

*December 1.*—Birthday of Queen Alexandra.

And on the occasion of the opening and closing of Parliament by the King.

Precious stones are found in various parts of the Empire, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India (8,500,000 barrels of 42 gallons in 1927), Trinidad (1,600,000 barrels), Egypt (1,000,000 barrels), and Canada (200,000 barrels) and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

**EXTERNAL TRADE.**—The total trade of the British Empire in 1920 was valued at £6,000,000,000 (Imports £3,100,000,000; Exports £2,900,000,000). The United Kingdom (Imports £2,000,000,000, Exports £1,670,000,000—Total £3,670,000,000), India (£431,000,000, exclusive of bullion and specie), Canada (£480,000,000), Australia (£225,000,000), New Zealand (£84,000,000), South Africa (£103,000,000, exclusive of bullion and specie), and Egypt (£207,000,000) are the principal trading units of the Empire.

**SHIPPING.**—On June 30, 1921, there were 11,433 vessels (over 100 tons) flying the British flag, of which total 9,034 were registered in the United Kingdom, 613 in Australia and N.Z., 961 in Canada, 190 in India and Ceylon, and 633 in other parts of the Empire. These figures include 10,324 steam vessels of 21,588,606 tons (U.K., 8,579 vessels of 19,320,053 tons); and 1,109 sailing vessels of 482,192 tons (U.K., 455 vessels of 251,501 tons). In the War of 1914-1918 there were lost through enemy action 2,774 merchant vessels of 9,538,918 gross tonnage; of this total 2,197 (7,638,000 tons) were British, 238 (666,845 tons) French, 230 (742,365 tons) Italian, 99 (120,176 tons) Japanese, and 80 (341,522 tons) U.S.A.

**TOWNS.**—*Capital*, London (England). Population (1921), 4,483,249 (with suburbs, 7,476,168).

At the Census of 1921 there were in the British Empire 2 cities with over 1,000,000 inhabitants, 9 with 500,000 to 1,000,000 (*see p. 110*), and 84 others with over 100,000 inhabitants. Of these 97 cities 51 were in the United Kingdom (England 42, Wales 3, Scotland 4, Ireland 2), 29 India, 4 Canada, 4 Australia, 2 Egypt, and 1 each in New Zealand, South Africa, Ceylon, Hong Kong, and the Straits Settlements.

**Religion and Languages.**

The inhabitants of the United Kingdom are almost entirely Christians, and mainly Protestants, the exceptions being 5 million Roman Catholics (principally in Ireland), 250,000 Jews, and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership. The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts have been made, under *Simm Fein* auspices, to revive the Gaelic language in Ireland. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 10,314 persons speaking Gaelic only, and 151,159 speaking Gaelic and English at the Census of 1921.

## CENSUS POPULATION OF THE BRITISH ISLES.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1823 that statisticians had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

|                    |                    |

| 1630.....5,600,527 | 1750.....6,517,035 |

The first general Census of the United Kingdom was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

## CENTRAL GOVERNMENT.

**THE BRITISH CONSTITUTION.**—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), the *Habeas Corpus Act* (1679), the *Act of Settlement* (1701), the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911) and the *Government of Ireland Act* (1920). The first secured annual parliaments and the equal administration of justice; the second established the liberty of the person; the third provided for the Protestant succession to the throne; the fourth and fifth created the United Kingdom; the sixth enabled the Commons to pass certain Acts without the adherence of the other Chamber, and the last "gives to Irishmen as a whole the right and, if they choose to exercise it, the power to manage their own affairs."

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign.*—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

a. *The Legislature.*—Parliament consists of two Houses, the Lords and the Commons.

(a) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (26) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(b) *The House of Commons.*—This body consists of 705 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one-third of the population are electors. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400.

3. *The Executive.*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (see page 513). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judiciary.*—(a) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in the United Kingdom being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench (Assizes). The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g., the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," see p. 578) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(b) *Scotland.*—Scottish civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Judiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 522) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(c) *Ireland.*—The higher courts in Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions, and there are Resident (stipendiary) Magistrates (see p. 578) who have jurisdiction in petty cases.

### LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1929). The subjects which local bodies administer are, *inter alia*, the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chairmen), for each City and County Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen. Ireland has a more elaborate system of local government than Great Britain with popularly elected Councils for Counties, Boroughs, and Rural Districts, the municipalities having Lord Mayors or Mayors.

### POLICE.

The strength of the Police force in 1919 was 56,166 in England and Wales, 6,124 in Scotland, and 10,754 in Ireland. The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office, and those of Ireland by the Irish Secretary's Office. The LONDON POLICE consists of the City Police and of the Metropolitan Police. The City Police district comprises an area of 673 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 273). Although the area is comparatively small, the rateable value is enormous, and there are 19,657 night residents. The Force comprises: Assistant Commissioner, 3 Superintendents, 6 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 103 Sergeants, and 1,006 Constables; also 22 Constables on private service duty. The cost of the maintenance of the City Police in 1921-1922 was £439,000.

The Metropolitan Police district embraces an area of 447,606 statute acres, with a population of about seven millions. There are within this area fourteen Police Courts, viz., Bow Street, Clerkenwell, North London, Lambeth, Marlborough Street, Marylebone, Old Street, Thames, Tower Bridge, Westminster, West London, Greenwich and Woolwich, South Western, and West Ham (see p. 282). The Force on Oct. 2, 1921, consisted of 39 Superintendents, 686 Inspectors, 3,030 Sergeants, and 17,512 Constables, making a total of 21,267, with 300 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 24, 1921, was 12,605. The cost of the maintenance of the Metropolitan Police in 1920-1921 was £7,924,122 (the fines at Metropolitan Police Courts reduced the gross amount by £30,600). On March 31, 1922, there were 20,841 Police pensioners, and 206 widows.

The Women's Division of the Metropolitan Police, consisted of 122 (all ranks) in 1922.

The following table shows the number of

### DEFENCE.

The Royal Navy (see pp. 286-291) is recruited by voluntary enlistment, and is administered by the "Commissioners for executing the office of Lord High Admiral of the United Kingdom."

The Army (see pp. 292-7) is recruited by voluntary enlistment in normal times, but was raised to the requirements of the War by the Military Service Act of 1916. It is administered by the Army Council (similar in membership to the Board of Admiralty).

The Royal Air Force (see pp. 298-9) is recruited by voluntary enlistment, and is administered by the Air Ministry.

### EDUCATION.

#### I.—ELEMENTARY.

Statutes require parents in England and Wales to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age; in Scotland, to provide efficient education up to 15 years; in Ireland, to cause their children to attend school from 6 to 14 years.

In order to give effect to these requirements Local Authorities are empowered to make free provision for school accommodation, attendance of pupils and teaching-staffs, whilst the State supplies nearly one-half of the maintenance funds conditionally upon receipt of satisfactory reports from government inspectors appointed by the Board of Education for England and Wales, by the Committee of Council on Education for Scotland, and by the Commissioners for National Education in Ireland. In 1922 attendance was not enforced in 27 per cent. of the Urban Districts and Towns, and in 43 per cent. of the

Rural Districts. It may be remarked—(i.) that there is no definition of "school" in the Acts; (ii.) that efficiency of instruction given is not tested except in publicly-managed schools; (iii.) that Local Authority schools increase in number though still fewer than voluntary (non-provided) schools. The latter are maintained by the Authorities whilst the responsibility for the buildings remains with the foundation-managers. Of such schools there are about 23,000 in all, including some designed for particular purposes, e.g., Higher Elementary and Central for older pupils, special for "defectives" and the like.

Teachers number 200,000, women preponderating. Except in Scotland there is a considerable proportion of teachers who are not fully qualified. The war has lessened the number of male teachers which was already diminishing. State grants for pensions on a more liberal scale than formerly are now offered under the Superannuation Act of 1918, by which it is hoped to render the profession more attractive.

Twenty per cent. of the population are of the pupil age. School life is over in the great majority of cases after about seven years of schooling, the minority proceeding to some other kind of day-school. Recent legislation requires Local Authorities in England, Wales and Scotland to make schemes for consideration by the Board of Education to provide suitable practical instruction, to give advanced instruction to those pupils who stay beyond 14, and to improve the facilities towards preparing pupils for higher education and the teaching profession: also nursery-schools for children under five.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening, handicrafts, cookery, &c.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, etc., show that the schools are valuable agencies in child-welfare generally.

## II.—EDUCATION BEYOND ELEMENTARY.

The Education Act, 1918, has in view powers for compulsory, and therefore free, education of a continuative kind in part-time day schools up to 16 and ultimately 18 years; and implies free secondary education of some type hereafter.

### Secondary.

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, etc., employments.

(i.) *England.*—The number of Secondary schools deemed efficient by the Board is 1,073, containing 243,000 pupils, of whom about one-fourth come up from elementary schools with "free places," others with scholarships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Most secondary schools are *enough* full. Of these "efficient" schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under-trusts, and their trust incomes and property form a considerable asset in secondary school finance. The Authorities aim

at securing graduate teachers as far as possible. As in Elementary schools, there is a shortage of fully-qualified teachers; but the recent Act for providing Pensions for School Teachers may be expected to make the posts more attractive.

(ii.) *Wales.*—The system is much the same as in England, though the schools are under earlier statutory provisions, and are called "Intermediate" in many cases. The number of efficient schools was (in 1914) 122, and of pupils, 22,000, girls preponderating. Three per cent. of the schools do not receive government grants, and 81 per cent. were provided by the Local Authorities. In Wales there is a Central Welsh Board.

(iii.) *Scotland: Intermediate and Secondary Schools.*—Three kinds of courses are provided: "Higher Grade and Intermediate with post-Intermediate." The former are taken in 196 schools by 33,000 pupils, and the latter in 56 schools by 20,000 pupils. All are under the same Commissioners and Local Authorities as are the Elementary schools.

(iv.) *Ireland.*—Intermediate Education is under a Special Board who have recently gained fresh statutory powers and a State grant analogous to those in force elsewhere in the United Kingdom. Up to 1917 their operations were chiefly examinational, though grants for inspection results had already been authorised and are made. Their report (1917) contains reference to schools in so far as their pupils (12,000) were presented for examination. It seems that 346 schools were affected, with some 12,000 pupils. There are also "Commissioners of Education in Ireland," whose powers are confined to certain endowed schools (800 pupils) mostly in Ulster.

### Technical.

Technical Education in England and Wales is provided in Evening and similar schools (mostly controlled by Local Authorities), 3,143 in number, and attended by 417,128 students on whom State grants are paid, and of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses (204), Tutorial Classes (100), Technical Institution Courses (24), with 1,160 grant-earning students, Day Technical Classes (127), held in 38 Institutions, with 97,225 students on whom State grants are paid; and also 121 Schools of Art, 19 Branch Schools of Art, and 49 Art Classes.

In Scotland Technical Education is provided in like manner, but in Ireland by a Department of Agriculture and Technical Instruction.

### Training.

Training is provided by the State for Elementary School Teachers, of whom 50 per cent. have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose.

### Universities.

There are 18 Universities in the United Kingdom, of which 10 are in England, 4 in Scotland, 1 in Wales, and 3 in Ireland (see pp. 314-20); and 4 independent University Colleges. Most of these institutions receive State grants in respect of technical and professional work under the Board of Education Regulations. The Acts of 1928 empower Local Authorities to give aid to University work. In 1920-1 there were 20,500 Undergraduates in England and Wales, 11,200 in Scotland, and about 4,500 in Ireland—total 42,200.

## FINANCE.

The Revenue and Expenditure of the United Kingdom for the ten years ended March 31, 1922, are stated as follows:—

| Year.        | Revenue       | Expenditure.  |
|--------------|---------------|---------------|
| 1912-13..... | £188,802,000  | £188,622,000  |
| 1913-14..... | 196,243,000   | 197,493,000   |
| 1914-15..... | 226,694,080   | 1,132,654,000 |
| 1915-16..... | 336,767,000   | 1,559,706,000 |

## The Budget, 1921-1922.

## Summary of Provisions.

The Budget of the United Kingdom for 1921-1922 was introduced on April 25th 1921, by Mr. Austen Chamberlain, on behalf of the Chancellor of the Exchequer. The ordinary receipts and expenditure were for the first time separated from the special receipts and expenditure arising out of war liquidation, the ordinary receipts being estimated at £1,058,150,000, and the ordinary expenditure at £974,023,000, showing a surplus of £84,127,000. The extraordinary receipts, from the realisation of war assets, were estimated at £198,900,000, and the extraordinary expenditure at £65,705,000, leaving a surplus of £92,795,000. The total revenue is thus estimated at £1,256,650,000 and the total expenditure at £1,039,728,000, showing an estimated surplus (subject to contingencies noted below), of £176,922,000.

## Extraordinary Receipts.

Realisation of War Assets ..... 198,900,000

TOTAL ..... £1,256,650,000

## Changes in Taxation.

There are few changes in taxation. The abolition of the *excess profits duty* had previously been announced, and the arrears are expected to realise £120,000,000. The *ad valorem* surtax of 50 per cent. on *cigars* is removed, and a specific duty of 12s. a gallon is imposed upon *sparkling wines* in place of the existing duty of 7s. a gallon together with an *ad valorem* duty of 33½ per cent.

## Conversion of War Bonds.

It was proposed to issue a *Conversion Loan* at 3½ per cent., into which the shortly maturing National War Bonds, amounting to £632,000,000, might be converted. Holders of the seven series of 5 per Cent. National War Bonds were invited to convert, before May 28th, their holdings into the new stock on terms which will give them a yield of from £5 12s. to £5 14s. per cent. The terms are as follows:—

£163 of 3½ per Cent. *Conversion Maturing.*

## GOLD AND NOTE ISSUES.

The Index (New York) gives an interesting comparison of the position as regards gold holdings and note issues of the leading nations in July, 1914, and November, 1920. The 1914 figures are as follows:—

† Gold and silver

‡ Includes \$2,125,000,000 Krassenschein notes.

Japan alone of the leading nations has increased the ratio of gold to notes. The United States, Britain, and Japan are the three countries to increase their holdings of gold, the first-named now holding almost as much gold as the other five countries together.

## REVENUE DEPARTMENTS ESTIMATES.

The net total for 1921-22 is £81,265,937, an increase on 1920-21 of £6,385,354.

|                          | Estimate.  |

| Post Office .....        | 67,165,287 |

£81,265,937

£2,705,600 of the increase in respect of the

Post Office is due to a change of accounting, and is apparent only, so that the actual net rise for all the departments appears to be £3,679,764, and the net total of the estimates £79,166,337. Originally £60,157,000 was voted for these services in 1920-21, but supplementary estimates were added amounting to £15,323,500, including nearly £10,000,000 for war bonus previously borne on another vote. In 1919-20 the total sums required for the three departments was £40,811,000, and in 1918-19 it was £31,714,500. The principal items in the Post Office estimates, and the increases as compared with the previous year, are set out below:—

|   | Estimate.<br>1921-22 | Increase<br>on 1920-21 |
|---|----------------------|------------------------|
| Salaries, wages and allowances.....         | £42,975,865          | £256,034               |

## THE DEBT OF THE UNITED KINGDOM.

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £28,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £28,000,000, part of which was paid off in the time of George I. In the reign of George II. about £97,000,000 were added, but the first twelve years of George III. saw £20,000,000 of this paid off. The American War added £121,000,000, making the total nearly £290,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:—

| Year.              | £                  | Year.              | £          | Year.      | £ |

| 1823... | 5,261,725 | 1830... | 1,235,465 | 1837... | 1,985,885 |

At the accession of Queen Victoria the amount stood at nearly £700,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837–1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1855 onwards, with slight increases in 1858, 1875, 1878, 1879 and 1886, the following being the actual amounts paid off:—

On March 31, 1899, the "Dead Weight" total was £635,070,635, being a decrease since 1837 of £153,000,000. For the South African and China wars £142,752,190 were raised, but from April 1, 1903, to March 31, 1914, the sum of £115,528,571 was paid off, and the total Debt on March 31, 1914, was £661,473,765.

In the financial year, 1914–15, an increase of £457,546,985, in 1915–16, of £1,031,931,568, in 1916–17, of £1,870,697,264, in 1917–18, of £1,860,404,723 was caused by the War. On March 31, 1921, the total of the Debt was stated at £7,831,744,300, of which the *External Debt* accounted for £1,161,560,000 (a decrease of £117,154,000 since March 31, 1920), and the *Internal Debt* accounted for £6,670,184,300.

**The Sinking Funds.**

Reductions in the Debt are made by means of (a) the *New Sinking Fund*, which is the balance of the Annual Charge after providing for interest and cost of management; (b) the *Old Sinking Fund*, which is the application of the surplus revenue of any year for the redemption of debt; (c) *Terminable Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable; (d) *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged; (e) *Depreciation Fund*, under the Finance Act of 1917, by which sums are issued by the Exchequer and applied for the purchase of various Government Stocks, &c. (£86,006,000 of 5% Stock and £10,000 of 4% Stock had been so purchased up to March 31, 1920); (f) *Payments for Death Duties*, under Section 3 of the War Loan Act, 1919 (£115,300 4% Funding Loan and £8,849,905 4% Victory Bonds were received in 1919-20 in payment of Death Duties).

**LOCAL GOVERNMENT DEBTS.**

In addition to the *National Debt* there are considerable amounts outstanding as Loans of *Local Authorities* in England and Wales, Scotland and Ireland. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, tramways, waterways and other purposes. On March 31, 1918, there were outstanding loans in England and Wales to the amount of £530,508,799, including £49,878,455 Metropolitan Water Board Stock and £7,747,930 of the Port of London Authority; against the total the sum of £49,741,616 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capitalized annuities in Scotland (on March 31, 1917) was £65,065,907, and in Ireland (on March 31, 1918) £25,778,911.

**LOCAL TAXATION.**

The Gross Rental of Rateable Hereditaments in England and Wales in 1917-8 was £291,535,480, the Rateable Value being £320,746,781. The total amount of Rates collected by the various Local Authorities in England and Wales is shown below:—

NOTE.—When the yield of wheat per acre differed from the average for the 30 years 1892-1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between 0.1 and 0.5 bushel, the year has been noted as "Slightly above (or below) Average"; when between 0.5 and 1.5 bushels, as "Decidedly above Average" or "Deficient"; when between 1.5 and 2.5 bushels, as "Good" or "Bad"; when between 2.5 and 3.5 bushels, as "Very good" or "Very bad"; and when above 3.5 bushels, as "Extremely good" or "Extremely bad."

Production per Acre.

The production per acre of cereal crops, roots and hay in the year of the outbreak of the War, and 1919, is shown in the following table:

## Fisheries.

The quantities and values of the fish landed in the United Kingdom in 1920 (exclusive of river salmon) are shown in the following table. The catch in 1920 was nearly double that of 1918, and

the 1920 catch showed a further improvement, exceeding the 1919 quantity by 225,000 tons. In 1920, however, the catch was still below that of the years immediately before the War, and, compared with the maximum year (1913), it was less by about 150,000 tons.

in 1918 807,086 (males) were employed underground, and 210,841 males and 11,761 females above ground. In the 4,362 quarries, 43,215 persons were permanently employed; of these, 27,917 (284 females) worked inside the quarries and 15,298 (548 females) outside the quarries.

## Accidents in Mines and Quarries.

The total number of deaths caused by accidents at mines and quarries (except shallow quarries) during 1920 was 1,184, and in addition 122,061 persons suffered injuries disabling them for more than seven days. From the following statement it will be seen that an increased number of fatal and non-fatal accidents were reported in 1920 under the Quarries Act:—

The number of deaths reported during 1920 under the Coal Mines Act and the Quarries Act was less than one per 1,000 persons employed at those mines and quarries (0.78 deaths per 1,000 persons employed at coal mines and 0.76 deaths per 1,000 persons employed at quarries). These are the lowest death-rates recorded. At metaliferous mines the deaths reported in 1920, though considerably fewer than in 1919—the year in which a disaster occurred at the Levant Mine in Cornwall causing 31 deaths—were 1.22 per 1,000 persons employed at the mines.

The quantity (1920) and value (1920) of the principal minerals won are shown in the following table. The total value (at the mines and quarries) of all minerals won in 1924 was £145,163,032 and in 1919 the value had increased to £233,673,503. The total number of persons employed in 1920 at the 3,273 mines in work was 1,337,297, and

**The World's Coal Output.**

According to the *Economic Review*, the world's total output was estimated at 1,200,000,000 tons in 1923 and 1,000,000,000 tons in 1929. In 1923 the United States produced 500,000,000, or 42·4 per cent. of the total, and consumed 485,500,000 tons, or 40·5 per cent. In 1929 the American production was 490,300,000 tons, or 49 per cent. of the total, and consumption was 468,500,000 tons, or 46·8 per cent. The United Kingdom comes second with a 1923 production of 287,400,000 tons and a consumption of 209,300,000 tons, representing 24 and 21·4 per cent. of the total. In 1929 the production of the U.K. is given as 236,700,000 tons, or 23·7 per cent., and consumption as 197,600,000 tons, or 19·9 per cent. The only other country to produce more than 100,000,000 tons in either year was Germany, with 190,000,000 tons (15·8 per cent.), in 1923 and 108,700,000 tons (10·9 per cent.) in 1929, the latter figure excluding the Saar and Alsace-Lorraine. Consumption was 13 per cent. of the total in 1923 and 10·4 per cent. in 1929. France's output in 1923 was 40,800,000 tons, and her consumption 63,700,000 tons. In 1929, including the Saar and Alsace-Lorraine, production was 31,400,000 tons and consumption 43,900,000 tons.

In 1921 there was a stoppage of production on 28 days, ending in a settlement of the 'Coal Dispute' on June 28, 1921, the chief points in which were the introduction of a profit-sharing scheme, a standard wage of 20 per cent. above pre-War rate for the period of the agreement and wage reductions of 2s. per shift or July, 1922, 2s. 6d. for August, and 3s. for September. To enable the mine owners and miners to effect a settlement a Government subsidy of £20,000,000 was voted by the House of Commons on July 1, 1921.

**Coal Exports of the U.K.**

The value of coal, coke, and patent fuel exported in various years is shown below. Coal bunkered by ships in the foreign and coastwise trade (21,031,530 tons in 1923 and 12,021,222 tons in 1929) and Admiralty shipments of coal (34,500,000 tons in 1918) are not included in these figures. Before the War of 1914-1918 the value of the coal consumed by the ships of the Royal Navy was about £2,500,000 annually. Oil has taken the place of coal in most of the recently built ships.

The F.O.B. value of the coal exported had risen from 38s. 1d. per ton in April, 1919, to 74s. 6d. per ton in March, 1920.

**Iron Ore.**

The production and importation of iron ore are as shown below. Values are not shown, as that of iron ore produced in the United Kingdom is taken at the place of production, while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in the United Kingdom in 1919 is stated at £7,428,366; that of the imported ore at £11,272,244, of which 3,524,794 tons (£7,667,618) came from Spain.

**Pig Iron.**

The quantity of ore smelted and pig iron made is shown below. In 1905 the quantity of coal used in the manufacture of pig iron was 2,955,555 tons; in 1918 the quantity was 2,606,840 tons of coal and 11,286,680 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1918 they numbered 318.

The production of steel ingots and castings amounted in 1919 to 7,894,000 tons, and in 1920 to 9,056,800 tons.

**World's Production of Wool 1915.**

The classes of wool grown are divided into three groups, viz., merino wool for clothing, crossbred for clothing, and low wool (mainly used

for carpets, rugs, etc.). The approximate proportion of these classes is 1,074,000,000 lb. merino, 1,000,000,000 lb. crossbred, and 700,000,000 lb. low wool.

The British Empire produced 63 per cent. of all merino wool grown, 40 per cent. of all crossbred, and 9 per cent. of carpet wools, 40 per cent. of the last-named being produced by Russia. The imports of wool and the exports of woollen and worsted manufactures are shown under "External Trade of the U.K.," *post*.

#### Textiles Industries of U.K.

The cotton and woollen industries of Great Britain are centred on the coalfields; the linen industry is centred mainly at Belfast and Dundee. Leicester, Nottingham and Derby are the chief seats of the hosiery manufactures, and Nottingham, Derby and Kilmarnock of the lace industry. The cotton industry depends entirely upon imports, and consumed over 750,000,000 lb. of imported cotton in 1918; the woollen industry consumed about 330,000,000 lb. of wool, of which about one-third was produced in the United Kingdom; the linen industry consumed about 80,000,000 lb. of flax, of which almost one-half was home grown. The total value of the textiles produced is not stated, but the quantities and values of those exported are shown under "External Trade of the U.K.," *post*.

#### Shipbuilding and Engineering.

The Metal Industries are next in importance to textiles. Engineering and metal-working centres are, generally speaking, in the neighbourhood of the coalfields, particularly on the N.E. coast at Barrow-in-Furness, and at Sheffield, London, Crewe, Swindon, Derby, Southampton, Birmingham and Coventry in England; on the Clyde in Scotland; and in Belfast, Ireland. On Jan. 1, 1921, the gross tonnage of all ships building in the world's shipyards (exclusive of Germany, for which country complete statistics are not available) amounted to 7,179,778 tons, as under:—

|                     | U.K.      | Other Countries. | Total.    |
|---------------------|-----------|------------------|-----------|
| Steamships .....    | 3,474,855 | 3,180,851        | 6,657,706 |
| Motor ships .....   | 227,010   | 227,402          | 454,412   |
| Sailing ships ..... | 7,051     | 60,519           | 67,570    |
| Total .....         | 3,708,916 | 3,470,862        | 7,179,778 |

The gross tonnage in hand at the yards of the principal countries on Jan. 1, 1921, is shown in the following table:—

|                         | No. | Gross tonnage. |
|-------------------------|-----|----------------|
| United Kingdom .....    | 921 | 3,708,916      |

| China .....             | 20  | 53,624         |

One hundred and sixty-nine steamers and motor vessels, each of over 1,000 tons, with a total tonnage of 1,169,023 tons, are building for the carriage of oil in bulk.

#### Other Industries.

The Leather Industry is important at Bristol, Leicester, Northampton, and Nottingham; Earthen and China Wares in "the Pottery District" on the South Staffordshire coalfields, where there are supplies also of coarse clay and ironstone, the "China Clay" (kaolin) being brought from Cornwall or imported from abroad; Paper-making (which also absorbs China Clay), Printing, and Brewing are also of general importance, and Distilling is a considerable industry in Scotland and Ireland.

#### Joint Stock Companies.

On Dec. 31, 1920, there were registered in the United Kingdom 79,541 Joint Stock Companies, with a total paid up capital of £3,508,022,486; in 1920 the number of companies registered during the year was 12,022 with share capital of £593,189,032.

#### Building Societies.

In 1919 there were 2,315 Incorporated Building Societies in the United Kingdom, with liabilities on shares £54,900,922, to depositors, etc., £15,868,245, a total liability of £70,769,167; the assets consisted of mortgage securities, £56,323,135, and other assets, £18,835,822, showing a balance of undivided profits and reserve funds of £4,380,780; there were also 44 unincorporated societies in England and 1 in Scotland.

#### Trade Union Membership.

The International Labour Office stated in March, 1921, that the number of Trade Unionists in the twenty leading countries of the world was 30,680,000 at the end of 1920, Germany having the largest number (9,000,000), and the U.K. 8,024,000, the smallest number being 20,000 in Serbia.

Returns for 1919 furnished to the Registrar of Friendly Societies relating to 608 Trade Unions in the United Kingdom show that at the end of the year the total membership was 6,628,663, an increase in twelve months of 236,203. The aggregate income of the Unions was £9,664,922 (against £7,150,644 in 1918), of which £4,541,400 was contributed by members, the expenditure being as under in 1918 and 1919:—

|  | 1918.     | 1919.     |
|--|-----------|-----------|
| Unemployed, travelling, and emigration ..... | £26,422   | £595,625  |
| Disputes .....                               | 22,171    | 2,255,477 |
| Sick and accident .....                      | 67,922    | 621,500   |
| Funeral .....                                | 372,025   | 322,773   |
| Others (including superannuation) .....      | 526,620   | 725,613   |
| Political fund payments .....                | 139,226   | 122,226   |
| Grants to other societies .....              | 200,222   | 622,722   |
| Management and other expenses ..             | 2,222,222 | 2,222,222 |

At the end of 1919 the total funds amounted to £15,992,822, an increase for the year of £978,337. The principal unions are contained in the List of Societies, pp. 358-362.

#### Industrial and Provident Societies.

In 1919 there were 3,219 Societies making returns to the Registrar of Friendly Societies, with 4,393,370 members, share capital, £73,377,702, liabilities, £4,522,222, and assets to the value of £34,822,222.

### Unemployment Insurance.

The Minister for Labour (Dr. Macnamara) in moving the second reading of the Unemployment Insurance Bill, stated that it was proposed to raise the rates of contribution and reduce the unemployment benefit to 15s. a week for men and 12s. a week for women, at the same time providing an additional period during which benefit will be paid during the next twelve months. The Act which was passed in March, 1921, was based on the assumption that throughout the period to July, 1922, there would be a weekly average of 1,000,000 workers unemployed, and that the fund would pay out weekly an average sum of £800,000. For this purpose the Government were borrowing to the extent of £16,000,000, with power to go to £20,000,000, and that would cost the fund £1,000,000 in interest. Under the Act of 1919 the benefit for men and women was 11s. a week for fifteen weeks. At that time the cost of living was 164 per cent. above the pre-War rate. Under the Act of 1920 the benefits were 15s. for men and 12s. a week for women for fifteen weeks. During the operation of that Act the cost of living ranged from 151 per cent. to 176 per cent. over pre-War rates. When the same rates of benefit were reintroduced the cost of living would be round about 120 per cent. over the pre-War cost, and the unemployment benefit would be extended to about twice as many weeks.

Assuming that there was an average of 1,250,000 insured persons unemployed weekly until the end of July 1922, the balance-sheet for the year 1921-22 would be, approximately, as follows:

#### INCOME.

|                                |             |
|--------------------------------|-------------|
| Employed contributions.....    | £13,750,000 |
| Employers' contributions ..... | 15,800,000  |
| State contributions .....      | 7,300,000   |

Total ..... £36,850,000

#### EXPENDITURE.

|                              |             |
|------------------------------|-------------|
| Benefit paid.....            | £46,300,000 |
| Interest on debt .....       | 750,000     |
| Administrative expenses..... | 3,900,000   |

Total ..... £50,950,000

On Oct. 20, 1921 the Prime Minister explained the steps to be taken to cope with unemployment in the acute stage then reached. He stated that, whatever the Government might do in the way of palliatives, the cure for the unemployment of 1,750,000 workers, with a percentage in the metal trades running up to 17 per cent., was a slow, steady, continuous trade recovery. No one, he said, wanted a short boom; that could only be followed by another precipitate fall. The Government's plans may be set forth as follows:

#### To Stimulate Export Trade.

Extension of the export credits scheme to all countries.

Loan guarantees up to £25,000,000.

Development of Dominion and Colonial resources.

#### Relief of Unemployment.

For road schemes, land drainage, forestry, &c.—£10,000,000.

Increased insurance benefits for dependants, based on a compulsory levy.

Loans to necessitous areas.

To settle more ex-Service men in the Dominions—£300,000.

#### COST OF COAL DISPUTE.

THE charges falling on the Exchequer as a result of the measures taken by the Government in connexion with the coal stoppage were approximately:

|   |            |
|---|------------|
| Defence Force, Army Reserve, and additional expenditure on the Regular Army ..... | £7,000,000 |
| Navy .....  | 1,225,000  |
| Air Force .....   | 330,000    |
| Civil Emergency Organisation .....  | 300,000    |
| Coal Industry Subsidy .....   | 10,000,000 |

Total..... £18,855,000

In addition there may be a further charge in respect of losses arising out of coal purchase operations which could not be estimated at the conclusion of the stoppage with accuracy, and a further addition of at least £10,000,000 for indemnification of railway profits (under the government liability) caused by the coal stoppage and the general trade depression.

## EXTERNAL TRADE OF THE UNITED KINGDOM (MERCHANDISE ONLY).

In statistics of Trade, the term **GENERAL TRADE** refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term **SPECIAL TRADE** includes only Imports for consumption in the country receiving them, and Exports of home produce or manufacture. In the first of the following tables the *General Trade* is shown for the year 1913 and for each year since that pre-War period, and the *Special Trade* for a similar period, showing the "apparent" balance of Imports over Exports. Subsequent tables show the various quantities and values of the merchandise exchanged.

The balance of Imports over Exports is not the true balance on account of the system of valuation in official returns, the Imports being taken at their CIF value (which includes the Cost of the merchandise and the charges for Insurance and Freight), whereas the Exports are taken at their FOB (free on board) value, which includes only the Cost of the merchandise delivered on the exporting ship. Such Exports have an added value by the time they reach their destination, having become loaded en route with Insurance and Freight. They leave the country with an FOB value and arrive at their destination with an acquired CIF value.
